BACTERIAL INFECTIONS AND IMMUNITY

Role of Resident Macrophages, Peripheral Neutrophils, and Translymphatic Absorption in Bacterial Clearance from the Peritoneal Cavity. David L. Dunn, Roderick A. Barke, Napoleon B. Knight, Edward W. Humphrey, and Richard L. Simmons ................................................................. 257–264

Immunological Characterization of Vibrio cholerae O:1 Lipopolysaccharide, O-Side Chain, and Core with Monoclonal Antibodies. Bjorn Gustafsson and Tord Holme ................................................................. 275–280

Prevention of Urinary Tract Infection in Rats with an Indigenous Lactobacillus casei Strain. Gregor Reid, Raphael C. Y. Chan, Andrew W. Bruce, and J. William Costerton ......................................................... 320–324

Surface Proteins of Mycoplasma hyopneumoniae Identified from an Escherichia coli Expression Plasmid Library. Mo-Quen Klinkert, Richard Herrmann, and Heinz Schaller ................................................................. 329–335

Antibodies to O-Antigen of Lipopolysaccharide are Protective against Neonatal Infection with Escherichia coli K1. Gerd Pluschke and Mark Achtman ......................................................... 365–370

Quantitative Determination of Bacterial Replication In Vivo. Anne Morris Hooke, Daniel O. Sordelli, M. Cristina Cerquetti, and Andrew J. Vogt ......................................................... 424–427

Isotype Commitment of B Cells and Dissemination of the Primed State after Mucosal Stimulation with Mycoplasma pulmonis. Faina Varshavsky Rose and John J. Cebra ................................................................. 428–434

Ultrastructural Studies of Adherence of Staphylococcus aureus in Experimental Acute Hematogenous Osteomyelitis. David J. Speers and Sydney M. L. Nade ................................................................. 443–446

Kinetics of Growth and Toxigenicity of Clostridium botulinum in Experimental Wound Botulism. Manouchehr Dezfulian and John G. Bartlett ................................................................. 452–454

FUNGAL AND PARASITIC INFECTIONS AND IMMUNITY

Identification of a Surface Antigen of Trichomonas vaginalis. Roberta J. Connelly, Bruce E. Torian, and Henry H. Stibbs ................................................................. 270–274

Continued on following page
In Vitro Parasite-Monocyte Interactions in Human Leishmaniasis: Possible Role of Fibronectin in Parasite Attachment. David J. Wyler, Joseph P. Sypek, and John A. McDonald ................................................................. 305–311
Trypanolytic Activity, Agglutinins, and Opsonins in Sera from Animals Refractory to Trypanosoma lewisi. Antonio Ferrante ................................................... 378–382
Specific Suppressor T Cells for Delayed-Type Hypersensitivity in Susceptible Mice Immunized against Cutaneous Leishmaniasis. Jasbir S. Dhalwal, Foo Y. Liew, and Francis E. G. Cox .................................................... 417–423
Relationship between Delayed Hypersensitivity Response and Acquired Cell-Mediated Immunity in C57BL/6J Mice Infected with Leishmania donovani. James R. Fahey and Robert Herman ........................................ 447–451

ORAL MICROBIOLOGY AND IMMUNITY
Immunoglobulin A Subclass Distribution of Naturally Occurring Salivary Antibodies to Microbial Antigens. Thomas A. Brown and Jiri Mestecky ...... 459–462

PATHOGENESIS
Activation and Inhibition of Limulus Amebocyte Lysate Coagulation by Chemically Defined Substructures of Lipid A. Richard A. Proctor and Jacquelyn A. Textor ................................................................. 286–290
Demonstration of a Capsule Plasmid in Bacillus anthracis. Brian D. Green, Laurie Battisti, Theresa M. Koehler, Curtis B. Thorne, and Bruce E. Ivins 291–297
Trypsin-Sensitive, Bovine Serum Albumin-Dependent Hemolysis Activity in Mycoplasma pulmonis. F. Chris Minion and Jon D. Goguen .............. 440–442
Detection of Mycoplasma pneumoniae Adhesin (P1) in the Nonhemadsorbing Population of Virulent Mycoplasma pneumoniae. Itzhak Kahane, Susan Tucker, and Joel B. Baseman ........................................ 457–458

IMMUNE MECHANISMS
Dissociation between Interleukin-1 and Interleukin-2 Production in Proliferative Response to Microbial Antigens: Restorative Effect of Exogenous Interleukin-2. Daniela Vismara, Giovanna Lombardi, Enza Piccolella, and Vittorio Colizzi ................................................................. 298–304
Marked Enhancement In Vivo of Adjuvant Activity of Muramyl Dipeptide to Protein Antigens and to Synthetic Weak Immunogens with Monoclonal Anti-Muramyl Dipeptide Antibodies. George M. Bahr, Diana S. Tello, and Louis A. Chedid ................................................................. 312–319
Effect of Listeria monocytogenes Infection on Serum Levels of Colony-Stimulating Factor and Number of Progenitor Cells in Immune and Nonimmune Mice. Edward J. Wing, Lisa C. Barczynski, Abdul Waheed, and Richard K. Shadduck ................................................................. 325–328

Continued on following page
Antibody Specificity and Antigen Characterization of Rat Monoclonal Antibodies against *Streptococcus mutans* Cell Wall-Associated Protein Antigens. Fabienne Ackermans, Jean-P. Klein, Françoise Cormont, Hervé Bazin, Joëlle A. Ogier, Robert M. Frank, and José Vreven 344–350

Activation of Neonatal and Adult Human Macrophages by Alpha, Beta, and Gamma Interferons. Christopher B. Wilson and Judith Westall 351–356

Enhanced Oxidative Burst in Immunologically Activated but Not Elicited Polymorphonuclear Leukocytes Correlates with Fungicidal Activity. Elmer Brummer, Alan M. Sugar, and David A. Stevens 396–401

Date of Issue: 26 July 1985
