INTERNATIONAL JOURNAL OF SYSTEMATIC BACTERIOLOGY

official organ of the
International Committee on Systematic Bacteriology
and of its
Judicial Commission

E. F. Lessel, H. P. R. Seeliger, and V. B. D. Skerman, Editorial Board

The Publications Committee of the International Committee on Systematic Bacteriology announces that beginning with the January 1971 issue the *International Journal of Systematic Bacteriology* (originally the *International Bulletin of Bacteriological Nomenclature and Taxonomy*) will be published by the American Society for Microbiology in the same general format used by the ASM for the other journals it publishes.

Original papers are published in the IJSB in the area of systematic bacteriology, primarily on (1) taxonomy, (2) nomenclature, (3) characterization, (4) identification, and (5) preservation. In addition, the journal publishes the business of the ICSB and its Judicial Commission, such as opinions, amendments to the *International Code of Nomenclature of Bacteria*, and minutes of meetings. The journal may also serve as a means of communication of information from the World Federation of Culture Collections, another organization of the IAMS. This journal is essential for those who wish to keep abreast of the ever-changing field of bacterial systematics.

Published quarterly, subscription rates are \$12 per year for institutions and \$8 per year for individuals.
