Infection and Immunity (ISSN 0019-9567), a publication of the American Society for Microbiology, 1913 I St., NW, Washington, DC 20006, is devoted to the advancement and dissemination of fundamental knowledge concerning 1) pathogenic microorganisms and infection; 2) ecology, epidemiology, and host factors; and 3) immunology. "Instructions to Authors" are published in the January issue each year. *Infection and Immunity* is published monthly, and the twelve numbers are divided into four volumes per year. The nonmember subscription price is \$85 per year. Single copies are \$8. The member subscription price is \$21 per year. Correspondence relating to subscriptions, reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Publications Office, 1913 I St., NW, Washington, DC 20006 (area 202 833-9680).

A brand new book on a topic of clinical and research concern —

Immunobiology of *Neisseria gonorrhoeae*

Editors: Geo. F. Brooks, Emil C. Gotschlich, King K. Holmes,
William D. Sawyer, Frank E. Young

Introduction by: William S. Jordan, Jr., and Milton Puziss

In the last few years, intensified interest in the study of gonococci and gonorrhea has resulted in an explosion of knowledge and understanding of the disease. In January 1978, a group of leading scientists and clinicians met in San Francisco for three days to confer about the current status of research into *Neisseria gonorrhoeae*.

The result is a book, at times controversial, always thought-provoking, on the status quo of a sexually transmitted disease which has reached epidemic proportions.

The book covers six major areas, and includes over 70 papers. The main sections are:

- I. *Neisseria gonorrhoeae* Physiology, Genetics, and Antimicrobial Susceptibility
- II. *Neisseria gonorrhoeae* Cellular Antigens and Antigenic Analysis
- III. Pathogenicity and Immunity
- IV. Immunity and Vaccine
- V. Current Concepts and Future Strategies
- VI. Panel Discussion

This new book will have wide appeal to clinical microbiologists, public health specialists, specialists in infectious diseases, venereologists, immunologists, and practicing physicians.

Note

Nongonococcal Urethritis and Related Infections is still available, and provides useful material on venereal disease caused by the microorganisms *Chlamydia trachomatis* and *Ureaplasma urealyticum*. Edited by Derek Hobson and King K. Holmes, this book was based on an interdisciplinary workshop held in April 1976.

Ordering Information

Immunobiology of *Neisseria gonorrhoeae*:

September 1978, 422 pages, clothbound. ISBN: 0-914826-18-2. \$15.00

Nongonococcal Urethritis and Related Infections:

July 1977, 391 pages, clothbound. ISBN: 0-914826-12-3. \$14.00

(Members of ASM may purchase either of these books for personal use only, at the special member price of \$10.00. Payment must accompany order. All overseas orders must be prepaid.)
