Infection and Immunity (ISSN 0019-9567), a publication of the American Society for Microbiology, 1913 I St., NW, Washington, DC 20006, is devoted to the advancement and dissemination of fundamental knowledge concerning 1) pathogenic microorganisms and infection; 2) ecology, epidemiology, and host factors; and 3) immunology. "Instructions to Authors" are published in the January issue each year. *Infection and Immunity* is published monthly, and the twelve numbers are divided into four volumes per year. The nonmember subscription price is \$85 per year. Single copies are \$8. The member subscription price is \$21 per year. Correspondence relating to subscriptions, reprints, defective copies, availability of back issues, lost or late proofs, disposition of submitted manuscripts, and general editorial matters should be directed to the ASM Publications Office, 1913 I St., NW, Washington, DC 20006 (area 202 833-9680).

ANTIBIOTICS

Origin, Nature, and Properties

By Tadeusz Korzybski, M.D.,
Zuzanna Kowszyk-Gindifer, Ph.D.,
and Włodzimierz Kuryłowicz, M.D.

This 3-volume work contains data from the scientific and patent literature concerning 1,300 groups of antibiotics, and about 3,000 antibiotic compounds. It includes the earliest natural antibiotics produced by microorganisms of the orders *Eubacteriales*, *Actinomycetales*, *Fungi imperfecti*, *Basidiomycetes*, and *Ascomycetes*, as well as antibiotics produced by lichens and algae, and semi-synthetic antibiotics.

Descriptions of each antibiotic include their origin, methods of isolation and purification, structure, physiochemical properties, in vitro and in vivo biological activity, pharmacological properties and therapeutic applications. The biogenesis and mode of action of the antibiotics, insofar as known, are given. Antibiotics are also discussed as chemical compounds, biochemical tools and, above all, as drugs.

The unique biogenetic classification of the antibiotics used in this monograph permits their ordered discussion regardless of the amount of information available and whether their structure is known. Particular attention is given to the nomenclature of antibiotics, a problem of interest to physicians. Three types of nomenclature are used: chemical, generic and commercial. All names and synonyms of the antibiotics are cited.

From a review in *Nature* of a previous edition:

"The presentation, in view of the virtual impossibility of achieving an ideal classification of the antibiotics, is excellent. ...Workers in the many faceted area of antibiotic research will find it hard to resist the acquisition (of these volumes), for they provide a rapid and convenient source of comprehensive information and references to the original literature."

The present English edition, in 3 volumes, is published in the U.S.A., in limited quantities, by the American Society for Microbiology.

Available mid-1979. Over 2,000 pages. Three clothbound volumes.

ISBN: 0-914826-14-X LC #77-24612 \$48.00 for the three-volume set.

ASM
American Society
for Microbiology

Plan now to attend the Third ASM Conference on Diagnostic Immunology

Clearwater Beach, Florida, 19-21 May 1980
(immediately following the ASM Annual Meeting in Miami Beach).

This conference is the third in a continuing series dealing with diagnostic immunology, and will feature contributed papers and the following three major symposia:

- **Clinical Application of β_2 Microglobulin Determination**
- **Newer Developments in Immunodiagnosis of Virus Infections**
- **Rapid Methods in Clinical Immunology**

The organizing committee is composed of H. Friedman, University of South Florida, Tampa (Chairman); Noel Rose, Wayne State University, Detroit, MI; John Kately, Edward Sparrow Hospital, East Lansing, MI; Mario Escobar, Medical College of Virginia, Richmond; Steven Specter, University of South Florida, Tampa.

Preregistration must be received at ASM headquarters before 1 May 1980. For Preregistration Form and Hotel Reservation Form, see the February 1980 *ASM News*, or contact the Executive Secretary, American Society for Microbiology, 1913 I Street, NW, Washington, DC 20006. For further information on the Program, contact Dr. Herman Friedman, Department of Medical Microbiology, University of South Florida, 12901 N. 30th Street, Box 10, Tampa, FL 33620.

1913 I Street, NW, Washington, DC 20006

BET MEANS VALUABLE INFORMATION FOR MICROBIOLOGY EDUCATORS

MANUALS — Practical, up-to-date manuals, ideal for use in the laboratory, are available on several vital topics. See below.

AUDIOVISUALS — *Multimedia Programs in Microbiology* is a unique guide to over 725 audiovisual teaching aids, with 90 sources listed.

CERTIFICATION — Programs of importance for professional advancement are offered by the National Registry of Microbiologists (NRM), the American Board of Medical Microbiology (ABMM), and the American Board of Medical Laboratory Immunology (ABMLI).

BET ALSO OFFERS: a Directory of Degree-Granting Institutions — Individual Projection Slides — Highlights of Microbiology — Traveling Workshops — Evaluation of Continuing Education Programs (ECEP).

Ordering Information

To order, complete the attached form, and mail with your remittance and a self-addressed mailing label to: American Society for Microbiology, Attn.: Finance, 1913 I Street, NW, Washington, DC 20006. Make checks payable to the American Society for Microbiology. Prices include fourth class postage within the United States. Foreign countries and Canada, please add \$2.00 for postage to the total amount required. Payment and self-addressed mailing label MUST accompany all orders.

Requests for information only should be directed to:

**BOARD OF EDUCATION AND TRAINING, American Society for Microbiology,
1913 I Street, NW, Washington, DC 20006**

Please send me:

- Quantity**
- _____ **Identification of Saprophytic Fungi Commonly Encountered in a Clinical Environment @ \$10.00 ea.**
 - _____ **Identification of Glucose-Nonfermenting Gram-Negative Rods @ \$6.00 each.**
 - _____ **Photographic Survey of Glucose-Nonfermenting Gram-Negative Rods @ \$3.00 each.**
 - _____ **Systemic Mycoses @ \$4.50 each.**
 - _____ **Infection Control in the Hospital Environment @ \$6.00 each.**
 - _____ **Unusual Organisms of Clinical Significance @ \$7.00 each.**
 - _____ **1980 Multimedia Programs in Microbiology @ \$5.50 each.**

MICROBIOLOGY

1980

Editor: David Schlessinger

This new volume in the popular annual **Microbiology** series features the proceedings of several recent symposia, and one particularly important NIH Conference on **Endogenous Mediators of the Host Response to Endotoxin**. While the volume has obvious appeal to infectious disease specialists and applied microbiologists, the material on endotoxins and viruses is of particularly wide interest to many microbiologists.

This timely and up-to-date record traces the progress being made in the following major areas of microbiology:

- Endogenous Mediators of the Host Response to Endotoxin
 - Host Response to Viral Infections
 - Interferon: Induction and Action
 - Comparative Mechanisms of Viral DNA Replication
 - Integration of the Viral Genome
 - Hybridomas
 - DNA-Surface Interactions
 - Aquatic Microbial Ecology
-

Ordering Information

January 1980. 400 pages. Clothbound. ISBN: 0-914826-23-9. \$22.00. (ASM Members may purchase this volume, for personal use only, at the special price of \$12.00. **Payment must accompany member orders.** Orders from overseas must be prepaid before shipment.)

Standing orders to the ASM **Microbiology** series are welcome. The previous volumes in this series are still available, all priced at \$12.00 prepaid for ASM Members, \$22.00 for others:

Microbiology — 1979, Microbiology — 1978
Microbiology — 1977, Microbiology — 1976
Microbiology — 1975, Microbiology — 1974
