

AGAROSE FROM MILES

When you need agarose, one of ours is sure to meet your requirements.

Perhaps you need a high electroendosmosis (EEO) for counter-immunoelectrophoresis? Either HEEO Agarose or Agarose (HE) should be suitable.

Perhaps you require a high gel strength, low EEO agarose for zone electrophoresis or electroimmunodiffusion? HGT Agarose or Agarose (LE) should be ideal.

You may require extremely high purity like that of HGT(P) Agarose, or an exceptionally low gelling temperature like that of LGT Agarose (GT = 28°C), or perhaps an agarose that exhibits minimum binding to borate buffers as does HGT Agarose.

On the other hand, you may only want a high quality, general purpose product of consistent manufacture, such as Agarose (ME).

Research Products is pleased to offer seven different and highly characterized preparations manufactured by Marine Colloids, Inc. and distributed through our offices around the world.

For specifications and prices in various package sizes call or write the office nearest you.
