**CUMITECH**

**13**

**Laboratory Diagnosis  
of Ocular Infections**

**Dan B. Jones, Thomas J. Liesegang, Nettie M. Robinson**

**Coordinating Editor:** John A. Washington, II

**Chairman, Editorial Board for ASM Cumitechs:**

John A. Washington, II

April 1981

The purpose of this *Cumitech* is to assist ophthalmologists and microbiologists in the use and interpretation of various laboratory procedures in ocular infectious diseases. The eye and associated structures are uniquely predisposed to infection by a variety of microorganisms, and special techniques are needed to collect and process the small quantity of material which can be obtained from various sites. This pamphlet gives needed guidance, and clear clinical detail.

**CURRENTLY AVAILABLE CUMITECHS:** 12: Laboratory Diagnosis of Bacterial Diarrhea; 11: Practical Methods for Culture and Identification of Fungi in the Clinical Microbiology Laboratory; 10: Laboratory Diagnosis of Upper Respiratory Tract Infections; 9: Collection and Processing of Bacteriological Specimens; 8: Detection of Microbial Antigens by Counterimmunoelectrophoresis; 7: Laboratory Diagnosis of Lower Respiratory Tract Infections; 6: New Developments in Antimicrobial Agent Susceptibility Testing; 5: Practical Anaerobic Bacteriology; 4: Laboratory Diagnosis of Gonorrhea; 3: Practical Quality Control Procedures for the Clinical Microbiology Laboratory; 2: Laboratory Diagnosis of Urinary Tract Infections; 1: Blood Cultures

**ORDERING INFORMATION:**

\$3.50 each, payment *must* accompany order. Standing orders billed annually. *Cumitechs* are published irregularly. Quantity Discounts: 11-50 of the same *Cumitech* @ \$3.00 each; 51-250 @ \$1.75; 251-1,000 @ \$1.00; 1,001 and over @ \$0.75. 3-Ring Binder: \$6.50.

The most recent advances in spore science—

# SPORULATION and GERMINATION

EDITORS:  
HILLEL LEVINSON  
A. L. SONENSHEIN  
DONALD J. TIPPER

Proceedings of the Eighth International Spore Conference,  
Woods Hole, Massachusetts, 9-12 October 1980

This book contains two kinds of papers—review articles and research papers—and reflects the high quality of the Conference at which advances in the application of modern molecular genetics and biochemistry to persistent questions of spore sporulation and germination were presented.

The review articles, listed below, are authoritative up-to-date surveys of the major areas written by leaders in their respective fields.

- Initiation of Bacterial Sporulation. Ernst Freese
- Biochemistry of Bacterial Forespore Development. David S. Schaeffer and Peter Setlow
- Advances in the Genetics of *Bacillus subtilis* Differentiation. Robert L. Taylor, A. Moir, and D. A. Smith
- Cloning Strategies in *Bacillus subtilis*. Paul S. Layer
- Sigma Factors, Stage 0 Genes, and Sporulation. Richard Losick
- Toxins of Sporeforming Bacteria. Robert E. Andrews, Jr., Robert C. Blair, and Robert L. Taylor
- Biophysical Studies on the Molecular Mechanisms of Spore Germination and Dormancy. W. G. Murrell

The research papers are refereed and reflect the most recent advances in spore science, including material in molecular genetics and gene cloning, *S. luteus* and *S. aureus* experiments on important and interesting topics—52 articles in all—grouped into the following six major topic areas:

- Genetics of Sporeforming Bacteria and Cloning of Spore-forming Genes
- Initiation of Sporulation and Regulation of Metabolism
- Macromolecular Synthesis During Sporulation
- Dormancy, Germination, and Outgrowth
- Resistance of Spores
- Resting Forms of Microorganisms Other than *Bacillus* and *Sporobolus*

**SPORULATION AND GERMINATION** will be of particular value to students of microbiology, undergraduate departments of microbiology, university libraries, medical microbiology, and industrial laboratories, as a handy reference for all individuals involved in spore research, and as adjunct material for teaching courses that cover spore formation.

## ORDERING INFORMATION

Publication Date: July 1981. ISBN: 0-914826-35-2. 316 pages, cloth-bound, \$16.00 to members of ASM, who must remit payment with order; \$20.00 to nonmembers at member price.

Published and distributed by:  
**American Society for Microbiology**

1913 I Street, NW • Washington, DC 20006

On the interface  
of basic and  
applied science:

## **MICROBIOLOGY 1981**

Editor: David Schlessinger

April 1981, 424 pages, clothbound.  
\$12.00 to members of ASM,  
\$22.00 to others. ISBN: 0-914826-31-X

*100 extended abstracts of recent  
conference and symposia reports  
bring to the scientist some of the  
most exciting new work in:*

- **REGULATORY  
MECHANISMS**
- **GENE MOVEMENTS AND  
LABORATORY EVOLUTION**
- **INFECTIOUS DISEASES**
- **DIAGNOSTIC IMMUNOLOGY**
- **GENETICS AND  
MOLECULAR BIOLOGY  
OF INDUSTRIAL  
MICROORGANISMS**

The world's two  
most widely used  
clinical laboratory  
manuals are now  
available in com-  
pletely revised  
and updated  
new editions:

### **Manual of Clinical Microbiology**

3rd Edition, July 1980

Editors:

Edwin H. Lennette, Albert Balows  
William J. Hausier, Jr., Joseph P. Truant  
1,047 pages, fully illustrated  
Clothbound, \$25.00, \$18.00 to  
ASM Members; Flexible binding,  
\$21.00 (\$15.00 to ASM Members)

### **Manual of Clinical Immunology**

2nd Edition July 1980

Editors:

Noel R. Rose and Herman Friedman  
1,105 pages, fully illustrated  
Clothbound, \$25.00, \$18.00 to  
ASM Members; Flexible binding,  
\$21.00, \$15.00 to ASM Members

ANTIBODIES PURIFIED

**CHOOSE FROM  
OUR GROWING  
PRODUCT LIST**

Alkaline phosphatase and peroxidase conjugated anti-bodies to Human IgG, Human IgM, Goat IgG, Rabbit IgG, Mouse IgG.

**ENZYME CONJUGATED  
ANTI-IMMUNOGLOBULINS**  
Characterized and Standardized.

**OUR NEW  
LINE OF CONJUGATED  
AFFINITY PURIFIED  
ANTI-IMMUNOGLOBULINS  
ARE STANDARDIZED  
AND CHARACTERIZED**

using the following parameters: • TITER — every lot adjusted to the same working range • ENZYME ACTIVITY — supplied with lot can be used for comparative purposes • PROTEIN CONTENT — each lot contains data on IgG concentration • SPECIFICITY — ensured by ELISA for quality control • SENSITIVITY — minimum level of detection is indicated on the package insert.

**PHONE OR WRITE US** for our catalog and product credentials. Ask about our custom immunization and conjugation programs.
