

# DAKO PAP KITS

ENOUGH FOR **40** TISSUE SECTIONS  
FOR PEROXIDASE-ANTIPEROXIDASE STAINING

**K504 PAP KIT . . . . \$99.00/kit**  
Stains for human kappa light chains, human lambda light chains and human lysozyme.

**K505 PAP KIT . . . . \$99.00/kit**  
Stains for human IgG, specific for gamma chains; human IgA, specific for alpha chains and secretory component; and human IgM, specific for  $\mu$  chains.

**K506 PAP KIT . . . \$120.00/kit**  
Stains for Carcinoembryonic antigen (CEA)

**K507 PAP KIT . . . \$110.00/kit**  
Glial fibrillary acidic protein (GFA)

**K508 PAP KIT . . . \$115.00/kit**  
Pregnancy specific beta-1 glycoprotein, human placental lactogen, human chorionic gonadotropin (SP1, HPL, HCG)

**K509 PAP KIT . . . \$120.00/kit**  
Stains for Prostate specific antigen (PSA)

**K510 PAP KIT . . . \$130.00/kit**  
Factor VIII related antigen

**K511 PAP KIT . . . \$120.00/kit**  
Hepatitis B surface antigen (HB<sub>s</sub>Ag)

**K512 PAP KIT . . . \$145.00/kit**  
insulin glucagon somatostatin

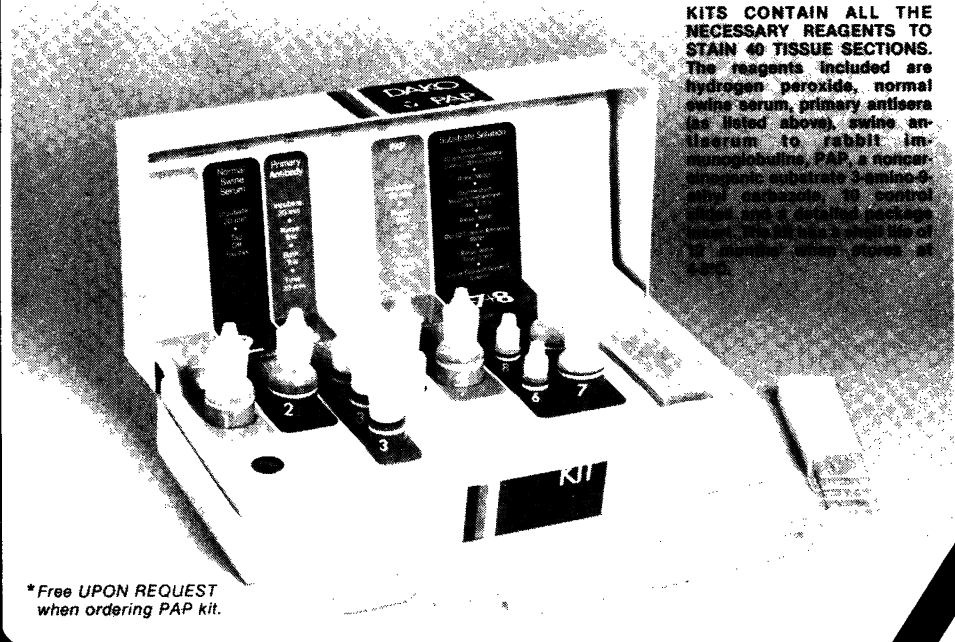

**K513 PAP KIT . . . \$115.00/kit**  
Neurophysin

**K514 PAP KIT . . . \$145.00/kit**  
Human growth hormone (HGH), prolactin, ACTH

**K515 PAP KIT . . . \$145.00/kit**  
Herpes Simplex Virus Type 1 & 2

**K220 PAP KIT . . . \$367.00/kit**  
Rota Virus ELISA Kit

PAP REFERENCE GUIDE . . . \$7.50\*

**KITS CONTAIN ALL THE NECESSARY REAGENTS TO STAIN 40 TISSUE SECTIONS.** The reagents included are hydrogen peroxide, normal swine serum, primary antisera (as listed above), swine antiserum to rabbit immunoglobulin, PAP, a non-enzymic substrate 3-amino-9-ethyl carbazole, 10 control slides and 2 control tissue slides. The kit is packaged in a sturdy plastic case.

\*Free UPON REQUEST when ordering PAP kit.

*How technological progress is advancing  
the state of the art of clinical microbiology—*

# **RAPID METHODS and AUTOMATION in Microbiology**

**EDITOR:** Richard C. Tilton

This new collection of research papers on a topic of increasing and critical interest promises to be of real assistance to clinical microbiologists, clinical pathologists, immunologists, medical technologists, and others who are caught up in the rapidly changing environment of microbiology. The speed of publication lends added utility to this survey of technologically advanced—and advancing—methods and procedures. The book, indeed, captures some of the excitement that was in the air at the meeting in May 1981 on which this volume is based: the Third International Symposium on Rapid Methods and Automation in Microbiology.

---

As the keynote seminar of the symposium suggested, topics of particular concern include systems approaches, evaluation, and the future of diagnostic systems in microbiology. The book fully develops the following areas:

- Computer Systems in Clinical Microbiology
- Rapid Detection of Microorganisms in Body Fluids
- Hydrophobic Grid-Membrane Microbiology
- Rapid Reporting in Microbiology
- Immunological Diagnosis of Infectious Diseases
- Chromatographic Analysis: A New Future for Clinical Microbiology
- Rapid Detection of Microorganisms in Urine
- Rapid Methods in Food Microbiology
- Systems Approaches to Diagnostic Microbiology
- Rapid Identification of Viral, Chlamydial, and Mycoplasmal Agents
- Rapid Identification of Clinically Important Anaerobes
- Applications of the Autobac System
- Clinical and Research Applications of the MS-2 System
- Nonautomated Rapid Methods in Microbiology

---

Now available in a completely revised second edition —

# MANUAL OF CLINICAL IMMUNOLOGY

Editors: Noel R. Rose and Herman Friedman

MCIZ will be completely unsurpassed as a source of information for clinical laboratory immunology, dealing as it does with the applications of immunology to the detection and analysis of a wide variety of diseases, including, but not limited to those induced by microorganisms. The best methods for conducting specific immunological tests are painstakingly and thoroughly detailed. The clinical interpretations of each procedure are discussed, as are pitfalls and problems that may be encountered in carrying out specific laboratory procedures.

Specifically, the second edition differs from the first in that a new initial section has been added dealing with general methods for precipitin reactions, cytolytic reactions, neutralization, immunofluorescence, enzyme-linked techniques, and lymphocyte characterization. The second section includes procedures for detection of immunogenetic markers on immunoglobulins. A new section dealing with complement and immune complexes has been added. The section on cellular components of immunological responses has been rewritten and expanded to include many of the newer methodologies being developed for cellular immune reactions. In addition, all the work embodied in this definitive book reflects the accelerated development of new and improved methods for clinical laboratory immunology since 1976, when the first, widely acclaimed edition was published.

Ordering Information:  
**MANUAL OF CLINICAL  
IMMUNOLOGY,  
2nd Edition,**

is available in two  
bindings: Clothbound  
(ISBN: 0-914826-25-5);  
\$28.00 (\$20.00  
to ASM Members)

Flexible binding  
(ISBN: 0-914826-27-1);  
\$24.00 (\$17.00 to  
ASM Members)

Please note that members of the Society must remit payment with order, and that books sold to ASM members are for personal use only. Orders from overseas must be prepaid.

The new third edition of the classic laboratory manual,

# Manual of Clinical Microbiology

is now available.

Edited by: Edwin H. Lennette, Albert Balows, William J. Hausler, Jr., Joseph P. Truant

MCM3 is the result of intensive updating and revision. This new edition will be indispensable to the clinical microbiologist, graduate and undergraduate student, medical technologist, clinical pathologist, and to all clinical laboratory personnel.

July 1980. 1,047 pages. Fully illustrated. Clothbound (ISBN: 0-914826-24-7), \$28.00; (\$20.00 to ASM Members). Flexible binding (ISBN: 0-914826-26-3), \$24.00; (\$17.00 to ASM Members). *Members of the Society must remit payment with orders, and books sold to members are for personal use only. All orders from overseas must be prepaid.*

The American Society for Microbiology introduces

## New, exciting slide/tape programs in microbiology

Learn from comprehensive audiovisual programs prepared by authoritative, leading experts in their field. These programs, produced by the American Society for Microbiology, cover the essentials and recent developments in medical microbiology and sporulation. They are ideal teaching systems to be used either as adjuncts to or as integral parts of other programs.

### Clinical Microbiology

**Malaria Parasite Detection and Identification** No. 6710-\$125

Dean "Ike" Armstrong

This program discusses the identification and detection of the three species of malarial parasite found in man.

**Mycoplasma** No. 6701-\$125

Michael G. Gabridge, PhD

An overview of mycoplasmas designed specifically to introduce the basic cell structure and functions of the mycoplasmas.

**Pathogenic Mycoplasma** No. 6702-\$125

Michael G. Gabridge, PhD

An overview with special focus on key pathogens of plants, animals, and humans.

### Sporulation

**Bacterial Sporulation** No. 6801-\$125

Roy H. Doi, PhD

This program is an introduction to the process of sporulation.

**The Bacterial Spore: Dormancy and Germination** No. 6802-\$125

Roy H. Doi, PhD

This program explores the conditions that regulate and maintain dormancy, and studies the spore's response to germination agents and biochemical changes that accompany germination.

## RIBI IMMUNOCHEM RESEARCH, INC.

PRODUCERS OF REFINED BIOLOGICAL RESPONSE MODIFIERS

ANNOUNCES THE AVAILABILITY OF:

# ENDOTOXINS

### Refined Standard

- Isolated from purified cell walls from *S. typhimurium*
- Forms clear solution in water
- High biological activity
- Protein content less than 0.3%

### Detoxified

- Non-toxic Lipid A
- 1,000 times less toxic than Refined Standard Endotoxin
- High biological activity
- Prepared from Refined Standard Endotoxin

On the interface of basic and applied science:

# MICROBIOLOGY 1981

Editor: David Schlessinger

April 1981, 424 pages, clothbound. \$15.00 to members of ASM,  
\$25.00 to others. ISBN: 0-914826-31-X

*100 extended abstracts of recent conference and symposia reports bring to the scientist some of the most exciting new work in:*

- REGULATORY MECHANISMS
- GENE MOVEMENTS AND LABORATORY EVOLUTION
- INFECTIOUS DISEASES ■ DIAGNOSTIC IMMUNOLOGY
- GENETICS AND MOLECULAR BIOLOGY OF INDUSTRIAL MICROORGANISMS

*For the first time, a discussion of*

# **HOST-PARASITE interactions in PERIODONTAL DISEASES**

**EDITORS: Robert J. Genco and Stephan E. Mergenhagen**

This new book starts with the premise that periodontal diseases are initiated by bacteria, and that the host response plays an important part in the outcome of these infections. The book takes a close look at the unique host-parasite interactions. It is organized to present an up-to-date summary of the microbiology and immunology of these diseases. Its intended audience is scientists and students whose main interests are in infectious diseases or clinical periodontology. Each of the contributing authors is a recognized leader in the specific research area covered. The result is a book which will be useful, clear, and helpful to physicians, general microbiologists, immunologists and other infectious disease specialists, and to advanced students in microbiology, immunology, and dental and medical courses.

---

The papers in this book were first presented at a symposium held in Buffalo, New York, in May 1981. They are divided into six sections:

- I. Etiology and Microbial Specificity
- II. Colonization by Periodontopathic Organisms
- III. Pathogenic and Virulence Factors in Periodontal Diseases
- IV. Cellular Aspects of Host Responses
- V. Effector Systems—Specific and Nonspecific
- VI. Clinical Implications of Host-Parasite Interactions
