

STRIDE IN CONFIDENCE

K220	Rotavirus ELISA Kit (240 assays)	\$367.00/kit	
		<u>2 ml</u>	<u>10 ml</u>
B218	Rabbit, antihuman Rotavirus	\$104.00	\$446.00
P219	Rabbit, antihuman Rotavirus HPO conjugated	138.00	580.00
X904	Rotavirus, ELISA negative rabbit control serum	34.50	149.00

ROTAVIRUS KIT AND ANTIBODIES

For the detection of **rotavirus antigen** in human fecal material by double sandwich enzyme immunoassay.

One kit contains immunological reagents and microtest plates for assay of 240 samples with duplicate tests and duplicate negative controls.

Also suited for the detection of pig and calf rotavirus.

Bridging the gap between introductory text and original research —

ASPECTS OF MICROBIOLOGY

— a highly acclaimed series of paperback books. . .

Series editors: J. A. Cole, University of Birmingham
C. J. Knowles, University of Kent
D. Schlessinger, Washington University

Oral Microbiology

P. Marsh. 1980. 96 pages.

Bacterial Toxins

J. Stephen and R. A. Pietrowski. 1981. 112 pages.

The Microbial Cell Cycle

C. Edwards. 1981. 96 pages.

Bacterial Plasmids

K. Hardy. 1981. 110 pages.

Bacterial Respiration and Photosynthesis

C. W. Jones. 1982. 112 pages.

Bacterial Cell Structure

H. J. Rogers. 1983. 96 pages.

Microbial Control of Plant Pests and Diseases

J. W. Deacon. 1983. 96 pages.

ASM member: \$8.00 each

Nonmember (US only): \$12.00 each

Prices subject to change without notice.

The *Aspects of Microbiology* series is published in the United States by the American Society for Microbiology, by exclusive agreement with Van Nostrand Reinhold Company Ltd.

ASM members and US nonmembers should direct their orders to: American Society for Microbiology, Publication Sales, 1913 I St., NW, Washington, DC 20006. Payment must accompany member orders. Payment must be made in US dollars drawn on a US bank.

Outside the US, nonmembers should direct their orders and inquiries to: Van Nostrand Reinhold, Molly Millars Lane, Wokingham, Berkshire, RG11 2PY, England.

To: **AMERICAN SOCIETY FOR MICROBIOLOGY** Publication Sales, 1913 I Street, NW, Washington, DC 20006

AMERICAN BOARD OF MEDICAL LABORATORY IMMUNOLOGY

● **PURPOSE**

To judge by examination the competence of immunologists to direct laboratories engaged in the practice of medical laboratory immunology.

● **ELIGIBILITY REQUIREMENTS**

An earned doctoral degree acceptable to the Board. A minimum of four (4) years of acceptable postdoctoral training and experience with increasing responsibility in the field.

An enlightening discussion of

HOST-PARASITE INTERACTIONS IN PERIODONTAL DISEASES

EDITORS: Robert J. Genco and Stephan E. Mergenhagen

The papers in this book were first presented at a symposium held in Buffalo, New York, in May 1981. They are divided into six sections:

- I. Etiology and Microbial Specificity
- II. Colonization by Periodontopathic Organisms
- III. Pathogenic and Virulence Factors in Periodontal Diseases
- IV. Cellular Aspects of Host Responses
- V. Effector Systems—Specific and Nonspecific
- VI. Clinical Implications of Host-Parasite Interactions

ORDERING INFORMATION:

Publication date: January
1982. 414 pages. Clothbound.
Author and subject indexes.
ISBN: 0-914826-37-9. \$27.00
Price subject to change
without notice.

Order from the publisher:

The logo for the American Society for Microbiology (ASM), consisting of the letters 'ASM' in a bold, stylized, sans-serif font.

The latest volume in ASM's
annual **Microbiology** series:

Microbiology— 1983

Editor:
David Schlessinger

This volume covers a variety of topics:

- I. Termination, Antitermination, and Processing of Bacterial mRNA
- II. Genetic Control of DNA Replication of Phages and Their Hosts
- III. Impact of Genetics on the Systematics of Microorganisms
- IV. Metabolism of C₁ Compounds
- V. Developmental Biology of Bacteria
- VI. Mycology
- VII. Infectious Diseases
 - A. Iron and Trace Metals: Transport, Metabolism, and Disease
 - B. Obligate Intracellular Parasitism
- VIII. Short Reviews

Researchers in these areas, departmental and university libraries, and graduate students with a particular interest in any of these topics will find this volume useful.

Also Available: Previous volumes in the **Microbiology** series are still available. The more recent are **Microbiology—1982**, **Microbiology—1981**, and **Microbiology—1980**, but the series goes back to **Microbiology—1974**. Volumes prior to the 1983 volume are priced at \$25.00 for nonmembers, \$15.00 for ASM members. **Microbiology—1983** is priced at \$27.00 for nonmembers, \$17.00 for ASM members. It contains 412 pages and is clothbound. Publication date: May 1983. ISBN: 0-914826-53-0. Prices are subject to change without notice. Member orders must be prepaid. All orders must be paid in US dollars. Send orders and inquiries to the publisher:

STM *B-lymphocyte* MITOGEN

S. typhimurium Mitogen (STM) is a proteinaceous B-cell mitogen prepared from purified cell walls of the heptosless Re-mutant of *S. typhimurium*. STM is non-toxic as measured by chick embryo lethality (CELD₅₀ > 10 µg) and lymphocytes *in vitro* (dosages of 1 mg/ml). STM has extremely high mitogenic activity for B-lymphocytes from both endotoxin responder and non-responder mice, nude mice and rats.

Mitogenic Activity of STM, PHA and *E. coli* LPS on spleen cells.*

Cultured cells Tested	³ H-thymidine incorporation (CPM)			
	STM 50 µg/ml	PHA 1 µg/ml	LPS 50 µg/ml	None
C57BL/10 ScN Endotoxin non-responder	18,588	20,288	1,109	695
[C57BL/6 × DBA/2]F ₁ Endotoxin responder	56,998	43,667	11,766	769
BALB/c nu/+	70,544	53,940	11,440	1,030
BALB/c nu/nu	36,283	902	11,719	751
Rat B-cells	57,600 (10 µg/ml)	—	25,700 (10 µg/ml)	1,700
Rat T-cells	2,107 (10 µg/ml)	—	1,179 (10 µg/ml)	696

* 1 × 10⁶ cells/ml of each strain were cultured with or without mitogens in 0.2 ml of RPMI-1640 (5% FCS) in 96 well microtiter plates. One µCi ³H-thymidine was added to each well the last 18 hours of a 48 hour incubation and ³H-incorporation was measured by standard scintillation techniques. Results of triplicate samples from each of three mice per group are expressed as the mean CPM.

STM is your choice for studying the mitogenic activity and polyclonal activation of B-lymphocytes, and B-cell suppression *in vitro*.
