## Laboratory Diagnosis of Female Genital Tract Infections

August 1983

By David Eschenbach, Helen M. Pollock, and Julius Schachter  
Coordinating Editor: Sally Jo Rubin

This *Cumitech* discusses infections of the female genital tract. These infections can be caused by a wide variety of microorganisms, including bacteria, fungi, viruses, and chlamydiae. The pamphlet provides expert consensus on specimen types and collection, lower-tract infection, toxic shock syndrome, *Streptococcus agalactiae*, and upper-tract infection. It will be useful to clinical microbiologists, clinical pathologists, obstetricians, gynecologists, and others who are involved in diagnosis of these infections.

### **CURRENTLY AVAILABLE CUMITECHS:**

16. Laboratory Diagnosis of the Mycobacterioses 1A. Blood Cultures II (replaces *Cumitech 1, Blood Cultures*, October 1974) 15. Laboratory Diagnosis of Viral Infections 14. Laboratory Diagnosis of Central Nervous System Infections 13. Laboratory Diagnosis of Ocular Infections 12. Laboratory Diagnosis of Bacterial Diarrhea 11. Practical Methods for Culture and Identification of Fungi in the Clinical Microbiology Laboratory 10. Laboratory Diagnosis of Upper Respiratory Tract Infections 9. Collection and Processing of Bacteriological Specimens 8. Detection of Microbial Antigens by Counterimmunoelectrophoresis 7. Laboratory Diagnosis of Lower Respiratory Tract Infections 6. New Developments in Antimicrobial Agent Susceptibility Testing 5. Practical Anaerobic Bacteriology 4. Laboratory Diagnosis of Gonorrhea 3. Practical Quality Control Procedures for the Clinical Microbiology Laboratory 2. Laboratory Diagnosis of Urinary Tract Infections

### **ORDERING INFORMATION:**

*Cumitechs* cost \$4.50 each, prepaid. Standing orders are billed annually. Quantity discounts: 11-50 of the same *Cumitech* @ \$3.50 each; 51-250 @ \$2.25; 251-1,000 @ \$1.50; 1,001 and over @ \$1.00. Payment must accompany all orders (member and nonmember) for single copies of *Cumitechs*. Prices are subject to change without notice. Also available: Three-ring vinyl binder for ASM *Cumitechs*: \$7.00.

*For the first time, a discussion of*

# **HOST-PARASITE interactions in PERIODONTAL DISEASES**

**EDITORS: Robert J. Genco and Stephan E. Mergenhagen**

This new book starts with the premise that periodontal diseases are initiated by bacteria and that the host response plays an important part in the outcome of these infections. The book takes a close look at the unique host-parasite interactions. It is organized to present an up-to-date summary of the microbiology and immunology of these diseases. Its intended audience is scientists and students whose main interests are in infectious diseases or clinical periodontology. Each of the contributing authors is a recognized leader in the specific research area covered. The result is a book which will be useful, clear, and helpful to physicians, general microbiologists, immunologists and other infectious disease specialists, and to advanced students in microbiology, immunology, and dental and medical courses.

---

The papers in this book were first presented at a symposium held in Buffalo, New York, in May 1981. They are divided into six sections:

- I. Etiology and Microbial Specificity
- II. Colonization by Periodontopathic Organisms
- III. Pathogenic and Virulence Factors in Periodontal Diseases
- IV. Cellular Aspects of Host Responses
- V. Effector Systems—Specific and Nonspecific
- VI. Clinical Implications of Host-Parasite Interactions

The latest volume in ASM's  
annual **Microbiology** series:

# Microbiology— 1983

**Editor:**  
**David Schlessinger**

This volume covers a variety of topics:

- I. Termination, Antitermination, and Processing of Bacterial mRNA
- II. Genetic Control of DNA Replication of Phages and Their Hosts
- III. Impact of Genetics on the Systematics of Microorganisms
- IV. Metabolism of C<sub>1</sub> Compounds
- V. Developmental Biology of Bacteria
- VI. Mycology
- VII. Infectious Diseases
  - A. Iron and Trace Metals: Transport, Metabolism, and Disease
  - B. Obligate Intracellular Parasitism
- VIII. Short Reviews

Researchers in these areas, departmental and university libraries, and graduate students with a particular interest in any of these topics will find this volume useful.

**Also Available:** Previous volumes in the **Microbiology** series are still available. The more recent are **Microbiology—1982**, **Microbiology—1981**, and **Microbiology—1980**, but the series goes back to **Microbiology—1974**. Volumes prior to the 1983 volume are priced at \$25.00 for nonmembers, \$15.00 for ASM members. **Microbiology—1983** is priced at \$27.00 for nonmembers, \$17.00 for ASM members. It contains 412 pages and is clothbound. Publication date: May 1983. ISBN: 0-914826-53-0. Prices are subject to change without notice. Member orders must be prepaid. All orders must be paid in US dollars. Send orders and inquiries to the publisher:
