

# ACCURATE PNEUMOCOCCAL ANTISERA

## • Omni-Serum

Contains antibodies to all 83 known pneumococcal capsular, polysaccharide type antigens.

## • Nine Pooled Sera

Each reacting with 7-11 types, together covering all 83 types, pool sera A to I.

## • 46 Type or Group Sera

## • Haemophilus influenzae antiserum.

Type b, concentrated.

SSI-OMNI-SERUM . . . . .	1 ml.	\$215.00
SSI-POOLED SERA . . . . .	1 ml.	70.00
(SPECIFY POOL A, B, C, D, E, F, G, H OR I)		
SSI-TYPE SERA . . . . .	1 ml.	70.00
(SPECIFY TYPE)		
SSI-GROUP SERA . . . . .	1 ml.	70.00
(SPECIFY GROUP)		
SSI-HAEMOPHILUS INFLUENZAE SERUM . . . . .	1 ml.	70.00
(TYPE B CONCENTRATED)		

**FOR RESEARCH USE ONLY. Not for diagnostic procedures**

A new book that defines the problems, presents new data,  
and indicates directions for future research:

# LEGIONELLA

## *Proceedings of the 2nd International Symposium*

Editors: Clyde Thornsberry  
Albert Balows  
James C. Feeley  
Walter Jakubowski

LEGIONELLA is a multidisciplinary, international work reflecting the breadth of ongoing studies of legionella and legionellosis. Contributions from the medical community include reports of research and clinical practice in microbiology, immunology, epidemiology, pathology, infectious disease, and other specialties. From the environmental community come studies in environmental microbiology, ecology, and environmental engineering, including heating, air conditioning, refrigeration, and sanitary engineering.

The material is divided into six sections:

**CLINICAL FEATURES AND LABORATORY  
DIAGNOSIS  
MICROBIOLOGY  
PATHOLOGY AND PATHOPHYSIOLOGY  
IMMUNOLOGY  
EPIDEMIOLOGY  
ECOLOGY AND ENVIRONMENTAL CONTROL:**  
Methods  
Habitat  
Ecological Interactions with Other Organisms  
Disinfection

Each section contains one or more state-of-the-art lectures and a summary lecture, and résumés of a number of round table discussions are presented. The lecturers include Paul H. Edelstein, Harry N. Beaty, Sydney M. Finegold, Don J. Brenner, Paul Hoffman, Albert Balows, Washington C. Winn, Jr., A. Baskerville, Herman Friedman, Thomas Klein, Raymond Widen, William Johnson, Marcus A. Horwitz, R. van Furth, Claire V. Broome, Christopher L. R. Bartlett, David W. Fraser, James C. Feeley, C. B. Fliermans, and Ramon J. Seidler.

### ORDERING INFORMATION

Publication date: February 1984  
371 pages. Clothbound. ISBN: 0-914826-58-1.  
\$39.00. Price subject to change.

**AMERICAN  
BOARD OF  
MEDICAL  
LABORATORY  
IMMUNOLOGY**

**invites your inquiry about  
Certification through ABMLI.**

If you meet the minimum eligibility requirement of four years' acceptable postdoctoral training and experience, you may be eligible for the written and oral examinations administered by ABMLI.

Board certification is recognized by federal government agencies as attesting to professional competence to direct laboratories specializing in medical immunology.

# RESEARCH SCIENTIST

The Bristol-Myers Company Pharmaceutical Research and Development Division has an excellent opportunity for a Research Scientist to join its Microbiology Department. Selected candidate will participate in a research program designed to evaluate new anti-infective agents in systemic and localized bacterial infections in rodents.

To qualify, you will need a PhD degree in Microbiology or an MS degree in Microbiology with 3-5 years experience setting up experimental animal infections with human or domestic animal pathogenic micro-organisms.

We offer an excellent starting salary, comprehensive benefits and a working environment conducive to your professional growth. For prompt, confidential consideration, forward your resume with salary history and requirement, to:

*Research reports from many advancing fronts of microbiology—*

# MICROBIOLOGY—1984

**EDITORS: Loretta Leive and David Schlessinger**

This newest addition to the annual Microbiology series features recent research on many current topics in microbiology and includes several symposia from the ASM Annual Meeting 1983 and the 1983 Interscience Conference on Antimicrobial Agents and Chemotherapy. Contents include:

## ***Cellular and Molecular Biology***

- Bacterial Periplasmic Transport Systems
- Regulation of Gene Expression: Genetic, Functional, and Structural Approaches to Understanding Protein-DNA Interactions
- Transcriptional Regulation of Bacteriophages
- Gene Manipulations in the Exploitation and Study of Fungi

## ***Infectious Agents***

- *Bordetella pertussis*: Pathogenesis and Prevention of Whooping Cough
- Update on Parasitic Diseases
- Coccidiosis: Parasitic Infections Old and New
- Molecular Biology of Rickettsiae
- Hansen's Disease

## ***Host Versus Parasite***

- Natural Killer Cells: Killing of Microorganisms
- Immunology of Tuberculosis and Leprosy: a Symposium
- Mechanisms of Resistance to Beta-Lactam Antibiotics
- Respiratory Virus Infections and Antiviral Agents

### **Ordering Information:**

April 1984. 400 pages.  
Clothbound.  
ISBN: 0-914826-61-1.  
ASM Members: \$17.00.  
Nonmembers: \$27.00.  
Prices are subject to change. Allow 4-6 weeks for delivery.

# The General Store for Monoclonal Antibodies to Human Immunoglobulins & Subclasses

## Specific Monoform<sup>®</sup> Monoclonal Antibodies

Miles makes a selection of monoclonal antibodies to human immunoglobulins to provide specificities appropriate to different applications. Each Monoform Monoclonal Antibody inherently exhibits very consistent properties. Antibodies from different clones exhibit different properties even when directed against the same antigen. For example, Monoform<sup>®</sup> Anti-Human IgG, code no. 63-050, will form visible antigen-antibody complexes in liquid, while Monoform<sup>®</sup> Anti-Human IgG, code no. 63-051, will form precipitin complexes in agarose gel. Miles offers variety so you can select antibodies suitable to your research or manufacturing needs.

Monoform<sup>®</sup> Monoclonal Antibodies are de-lipidized from the ascites fluid of tumor bearing mice.

Monoform<sup>®</sup> Monoclonal Antibodies against hormones and mouse lymphocyte markers are also available. For more information, contact Miles Scientific, Division of Miles Laboratories, Inc., 30W475 North Aurora Road, Naperville, IL 60566 telephone: 800-348-7465 in Illinois 312-357-3720.

Monoform Antibodies	Code No.	Ig Class	ELISA Titer	Clone
IgA	63-052	IgG <sub>1</sub>	1x10 <sup>5</sup>	GA-1
IgE	63-058	IgG <sub>1</sub>	5x10 <sup>4</sup>	GE-1
IgG Lppt	63-050	IgG <sub>1</sub>	1x10 <sup>5</sup>	GG-5
IgG Gppt	63-051	IgG <sub>1</sub>	1x10 <sup>5</sup>	GG-4
IgG (Fc)	63-071	IgG <sub>1</sub>	5x10 <sup>4</sup>	GG-7
IgG (Fab)	63-070	IgG <sub>1</sub>	5x10 <sup>4</sup>	GG-6
IgG <sub>1</sub> (Fab)	63-080	IgG <sub>1</sub>	1x10 <sup>5</sup>	SL-16
IgG <sub>1</sub> (Fc)	63-060	IgG <sub>1</sub>	8x10 <sup>4</sup>	SG-11
IgG <sub>1</sub> (Fc)	63-061	IgG <sub>1</sub>	1x10 <sup>5</sup>	GOM-1
IgG <sub>1</sub>	63-081	IgG <sub>1</sub>	1x10 <sup>4</sup>	FH-22
IgG <sub>1</sub>	63-062	IgG <sub>1</sub>	1x10 <sup>5</sup>	SJ-33
IgG <sub>1</sub> (Fab)	63-065	IgG <sub>1</sub>	7x10 <sup>4</sup>	SL-13
IgG <sub>1</sub>	63-063	IgG <sub>1</sub>	1x10 <sup>4</sup>	SK-44
IgG <sub>1</sub>	63-064	IgM	1x10 <sup>5</sup>	SK-40
IgM	63-055	IgG <sub>1</sub>	1x10 <sup>5</sup>	MB-11
λ-Chains	63-067	IgG <sub>1</sub>	1x10 <sup>5</sup>	LA-84
λ-Chains	63-068	IgG <sub>1</sub>	1x10 <sup>5</sup>	KP-53
<b>Alkaline Phosphatase Conjugates:</b>				
IgG	63-270	IgG <sub>1</sub>	8x10 <sup>4</sup>	GG-5
IgM	63-271	IgG <sub>1</sub>	8x10 <sup>4</sup>	MB-11
