

INFECTION AND IMMUNITY

Volume 45

August 1984

No. 2

BACTERIAL INFECTIONS AND IMMUNITY

- Effect of Mouse Lymphokines and Cloned Mouse Interferon- γ on the Interaction of *Rickettsia prowazekii* with Mouse Macrophage-Like RAW264.7 Cells.** Jenifer Turco and Herbert H. Winkler 303-308
- Immunochemical Characterization of High-Molecular-Weight Polysaccharide from Fisher Immunity 3 *Pseudomonas aeruginosa*.** Gerald B. Pier, Matthew Pollack, and Mark Cohen 309-313
- Zinc Concentration and Survival in Rats Infected with *Salmonella typhimurium*.** Rosalie Tocco-Bradley and Matthew J. Kluger 332-338
- Comparison of *Chlamydia psittaci* Isolates by DNA Restriction Endonuclease Analysis.** Margaret McClenaghan, Alan J. Herring, and Ian D. Aitken 384-389
- Identification of an Iron-Regulated 37,000-Dalton Protein in the Cell Envelope of *Neisseria gonorrhoeae*.** Timothy A. Mietzner, Geraldine H. Luginbuhl, Eric Sandstrom, and Stephen A. Morse 410-416
- Phagosomal Membranes of *Mycobacterium bovis* BCG-Immune Alveolar Macrophages Are Resistant to Disruption by *Mycobacterium tuberculosis* H37Rv.** Eva S. Leake, Quentin N. Myrvik, and Mary J. Wright 443-446
- Characterization of *Neisseria gonorrhoeae* Protein II Phase Variation By Use of Monoclonal Antibodies.** William J. Black, Richard S. Schwalbe, I. Nachamkin, and Janne G. Cannon 453-457
- Kinetic Analysis of Microbe Opsonification Based on Stimulated Polymorphonuclear Leukocyte Oxygenation Activity.** Robert C. Allen and Michael M. Lieberman 475-482

FUNGAL AND PARASITIC INFECTIONS AND IMMUNITY

- Ultrastructure of *Candida parapsilosis* Endocarditis.** Thomas J. Marrie, John H. Cooper, and John W. Costerton 390-398
- Effect of Silica on Resistance of Mice to *Entamoeba histolytica* Infection.** E. Ghadirian and P. A. L. Kongshavn 399-402
- Longitudinal Study on the In Vitro Immune Response to *Plasmodium falciparum* in Sudan.** John A. Vande Waa, James B. Jensen, Mustafa A. S. Akood, and Riad Bayoumi 505-510

ORAL MICROBIOLOGY AND IMMUNITY

- Effect of Fluoride on Growth and Acid Production by *Streptococcus mutans* in Dental Plaque.** J. S. van der Hoeven and H. C. M. Franken 356-359
- Fractionation of Hemagglutinating and Bacterial Binding Adhesins of *Bacteroides gingivalis*.** Janet Boyd and Barry C. McBride 403-409
- Serological Characterization of *Streptococcus mutans* Serotype Polysaccharide g and Its Different Molecular Weight Forms.** Kazuko Takada, Jadwiga Wyszomirska, and T. Shiota 464-469

PATHOGENESIS

- Properties of Crude *Campylobacter jejuni* Heat-Labile Enterotoxin.** Frederick A. Klipstein and Richard F. Engert 314-319
- Pathogenicity of Anaerobic Gram-Positive Cocci.** Itzhak Brook and Richard I. Walker 320-324

Continued on following page

Phenotypic Distinctiveness of <i>Staphylococcus aureus</i> Strains Associated with Toxic Shock Syndrome. James K. Todd, Amalia Franco-Buff, David W. Lawellin, and Michael L. Vasil	339–344
Role of Heme Compounds and Haptoglobin in <i>Vibrio vulnificus</i> Pathogenicity. Sherry D. Helms, James D. Oliver, and James C. Travis	345–349
Influence of Fine Structure of Lipid A on <i>Limulus</i> Amebocyte Lysate Clotting and Toxic Activities. Kuni Takayama, Nilofer Qureshi, Christian R. H. Raetz, Edgar Ribí, Jon Peterson, John L. Cantrell, Frederick C. Pearson, Jeffry Wiggins, and Arthur G. Johnson	350–355
Properties and Requirements for Production of a Macrophage Product Which Suppresses Steroid Production by Adrenocortical Cells. John C. Mathison, Ann C. La Forest, and Richard J. Ulevitch.....	360–366
Group A Streptococcal Peptidoglycan-Polysaccharide Inhibits Phagocytic Activity of Human Polymorphonuclear Leukocytes. Patricia A. Leong and Myron S. Cohen	378–383
Transposon-Mediated Mutagenesis and Recombination in <i>Vibrio cholerae</i>. John W. Newland, Bruce A. Green, and Randall K. Holmes	428–432
Binding Sites for Streptococci and Staphylococci in Fibronectin. Pentti Kuusela, Tapio Vartio, Matti Vuento, and Erling B. Myhre.....	433–436
Pulmonary Clearance of Encapsulated and Unencapsulated <i>Haemophilus influenzae</i> Strains. Galen B. Toews, Sergio Viroslav, David A. Hart, and Eric J. Hansen	437–442
Extracellular Phospholipase A₂ and Lysophospholipase Produced by <i>Vibrio vulnificus</i>. Jacqueline Testa, Larry W. Daniel, and Arnold S. Kreger	458–463
Isolation and Characterization of Transposon-Induced Mutants of <i>Pseudomonas aeruginosa</i> Deficient in Production of Exoenzyme S. Thalia I. Nicas and Barbara H. Iglewski	470–474
Sequential Metabolic Alterations in the Myocardium During Influenza and Tularemia in Mice. Nils-Gunnar Ilbäck, Göran Friman, William R. Beisel, and Anthony J. Johnson.....	491–497
Modifying Effects of Exercise on Clinical Course and Biochemical Response of the Myocardium in Influenza and Tularemia in Mice. Nils-Gunnar Ilbäck, Göran Friman, William R. Beisel, Anthony J. Johnson, and Richard F. Berendt	498–504
<i>Corynebacterium ulcerans</i> and <i>Corynebacterium pseudotuberculosis</i> Responses to DNA Probes Derived from Corynebacteriophage β and <i>Corynebacterium diphtheriae</i>. Neal Groman, J. Schiller, and J. Russell	511–517
Preparation of Procoligenoids from <i>Escherichia coli</i> Heat-Labile Enterotoxins. Richard A. Finkelstein, Carmen V. Sciortino, Luanne C. Rieke, Marlyn F. Burks, and Mary Boesman-Finkelstein.....	518–521
Attachment of Human and Pig (K88) Enterotoxigenic <i>Escherichia coli</i> Strains to Either Human or Porcine Small Intestinal Cells. Carl F. Deneke, Katherine McGowan, A. D. Larson, and Sherwood L. Gorbach	522–524
Colonization Factors Associated with Enterotoxigenic <i>Escherichia coli</i> Isolated in Thailand. Suchitra Changchawalit, Peter Echeverria, David N. Taylor, Udom Leksomboon, Chalard Tirapat, Boonchuey Eampokalap, and Bernard Rowe.....	525–527
Hemolysin of <i>Streptococcus faecalis</i> Subspecies <i>zymogenes</i> Contributes to Virulence in Mice. Yasuyoshi Ike, Hajime Hashimoto, and Don B. Clewell ...	528–530
Detection of Free Endotoxin in Cerebrospinal Fluid by the <i>Limulus</i> Lysate Test. Robert S. Munford, Catherine L. Hall, and Lee Grimm.....	531–533

- Distinctive Patterns of Adherence of Enteropathogenic *Escherichia coli* to HeLa Cells.** Isabel C. A. Scaletsky, M. Lourdes M. Silva, and Luiz R. Trabulsi 534–536

IMMUNE MECHANISMS

- Microbicidal Activity and Morphological Characteristics of Lung Macrophages in *Mycobacterium bovis* BCG Cell Wall-Induced Lung Granuloma in Mice.** Kazuyuki Kato, Ken-ichi Yamamoto, Harue Okuyama, and Takuro Kimura 325–331
- Mechanism of Lipopolysaccharide-Induced Immunosuppression: Immunological Activity of B Cell Subsets Responding to T-Dependent or T-Independent Antigens in Lipopolysaccharide-Preinjected Mice.** Takehiko Uchiyama, Yusuke Kamagata, and Morimasa Yoshioka 367–371
- Flow Microfluorometry Analysis of Alterations in T-Lymphocyte Subsets During Murine Listeriosis.** Susan R. Watson, T. J. Redington, T. B. Miller, and Ward E. Bullock 372–377
- Endogenous Interferon Production by Endotoxin-Responsive Macrophages Provides an Autostimulatory Differentiation Signal.** Stefanie N. Vogel and Diana Fertsch 417–423
- Augmentation of Protective and Antibacterial Activity Induced by Muramyl Dipeptides in CBA/N Defective Mice with X-Linked Immunodeficiency for *Salmonella enteritidis* Infection.** Kazuyasu Onozuka, Tatsuo Saito-Taki, and Masayasu Nakano 424–427
- Activation of Murine Polymorphonuclear Neutrophils for Fungicidal Activity with Supernatants from Antigen-Stimulated Immune Spleen Cell Cultures.** Elmer Brummer and David A. Stevens..... 447–452
- Demonstration of Interleukin 1 Activity in Apparently Homogeneous Specimens of the pI 5 Form of Rabbit Endogenous Pyrogen.** Daniel F. Hanson and Patrick A. Murphy..... 483–490
