Relationship between Delayed Hypersensitivity Response and Acquired Cell-Mediated Immunity in C57BL/6J Mice Infected with *Leishmania donovani*

JAMES R. FAHEY AND ROBERT HERMAN

Department of Biological Sciences and Bureau of Biological Research, Rutgers University, New Brunswick, New Jersey 08903

Vol. 49, no. 2, p. 447, line 32: "100 g of streptomycin" should read "100 μ g of streptomycin."
p. 449, Table 1, column 3: ">8" should read "<8."

Enhanced Oxidative Burst in Immunologically Activated but Not Elicited Polymorphonuclear Leukocytes Correlates with Fungicidal Activity

ELMER BRUMMER, ALAN M. SUGAR, AND DAVID A. STEVENS

Division of Infectious Diseases, Departments of Medicine, Santa Clara Valley Medical Center, and Institute for Medical Research, San Jose, California 95128, and Stanford University, Stanford, California 94305

Vol. 49, no. 2, p. 400, Fig. 5: The symbol for DMSO in the legend was omitted. Figure 5 and the legend should have appeared as shown below.

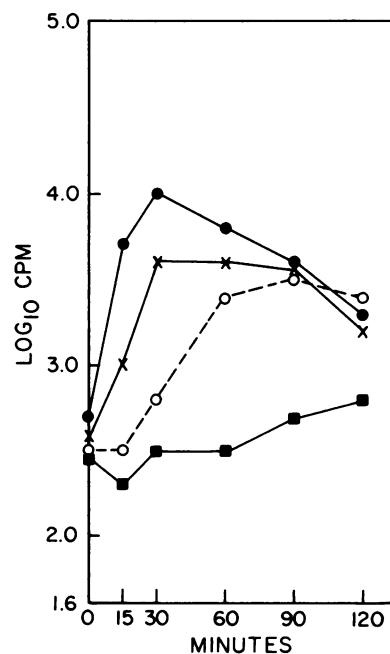

FIG. 5. Effect of catalase or DMSO on CL generated by the interaction of PMN, *B. dermatitidis* (10^6), and luminol (8μ g) in 10% fresh mouse serum. Shown are counts per minute produced by *B. dermatitidis* plus activated PMN alone (●), with 300 mM DMSO (×), or with 20,000 U of catalase per ml (■). Also shown are counts per minute generated by elicited PMN plus *B. dermatitidis* (○) under the same conditions.
