

NEW

ACCURATE[®] ACCU-RID[™]

PLATES

SINGLE RADIAL IMMUNODIFFUSION PLATES

COMPLEMENT FACTORS:

C₃C, C₄

IMMUNOGLOBULINS:

IgG, IgM, IgA

SERUM PROTEINS:

α I-Antitrypsin
C-Reactive Protein
Haptoglobin
Orosomucoid
Transferrin

CONVENIENCE AND ECONOMY

The new square shape provides 16 test wells per plate. Once opened **Accu-RID[™]** plates can be used repeatedly for up to 4 weeks if stored inverted at 2-8°C in the sealable bag provided.

The **Accu-RID[™]** measuring rule is available for rapid accurate measurement of zone sizes.

VERSATILITY

Accu-RID[™] plates can be used in either:

- A kinetic technique for greatest **Accuracy**, using **Accu-RID[™]** calibrated standards
- or
- An end point technique for rapid results, using a single Plate Control reagent in combination with a Conversion Table.

ANNUAL MEETING CASSETTES

Cassettes of the annual meeting sessions are now available for purchase from AVW Audio Visual, Inc.

Here's how the annual meeting cassettes can be valuable long after the American Society for Microbiology meeting is over:

- Provides an excellent 'refresher course' for the future.
- Provides an invaluable educational and training tool.
- Provides access to important information for those unable to attend.

Get your AVW annual meeting cassettes by using the handy order form below.

American Society for Microbiology March 22-28, 1986 Washington, D.C.

SATURDAY, MARCH 22, 1986	
WORKSHOP "A": RAPID TESTING FOR INFECTIOUS DISEASES	
ASM-WA1	Rapid Detection of Bacteremias & Respiratory Infections \$8.00
ASM-WA2	Rapid Detection of Urinary Tract Infections \$8.00
ASM-WA3	Rapid Detection of Genital Infections \$8.00
ASM-WA4	Rapid Detection of Diarrheal Diseases \$8.00
ASM-WA5	Role of Rapid Detection in the Diagnosis of Infectious Diseases \$8.00
SPECIAL: WORKSHOP "A", ALL TAPES IN BINDER \$32.00	
WORKSHOP "B": CLINICAL APPLICATIONS OF DNA PROBES	
ASM-WB1	Role of DNA Probes in the Clinical Laboratory: An Overview \$8.00
ASM-WB2	Viral Diagnosis Through the Use of DNA Probes \$8.00
ASM-WB3	Evaluation Criteria for Probe Usage in the Clinical Laboratory \$8.00
ASM-WB4	Commercial Development of DNA Probe System for the Clinical Laboratory \$8.00
SPECIAL: WORKSHOP "B", ALL TAPES IN BINDER \$28.00	
MARCH 23, 1986	
WORKSHOP "C": PARASITIC INFECTIONS IN THE COMPROMISED HOST	
ASM-WC1	Review of New Techniques, Collection Methods, and Quality Control \$8.00
ASM-WC2	Review of Important Intestinal Protozoa (2 tapes) \$16.00
ASM-WC3	Review of Helminths in the Compromised Host \$8.00
ASM-WC4	Aids and Parasitic Infections \$8.00
ASM-WC5	Other Parasitic Organisms Found in the Compromised Host \$8.00
ASM-WC6	Update on Malaria \$8.00
SPECIAL: WORKSHOP "C", ALL TAPES IN BINDERS \$48.00	
SESSIONS	
MONDAY, MARCH 24, 1986	
ASM-02	Immunodeficiency, Immunomodulation, and Infection \$16.00
ASM-03	Interferon, Immunity, and Intracellular Pathogens \$16.00
ASM-09	In Vivo Models of the Immunobiology and Pathogenesis of Human Microbial Infections \$16.00
ASM-28	Current Problems in Antimicrobial Susceptibility Testing \$16.00
ASM-30	Aids-Infection Control Implications \$16.00
ASM-38	Listeriosis: An Emerging Food-Borne Disease \$16.00
ASM-40	Leprosy and the Leprosy Bacillus: Recent Developments in Genetics, Physiology, Immunology and Diagnosis \$16.00
ASM-65	Impact of Recent Changes in Cap Workload Recording on the Microbiology Laboratory \$16.00
TUESDAY, MARCH 25, 1986	
ASM-71	The Low-Calcium Response and Virulence in the Yersiniae \$16.00
ASM-76	Current Topics in Clinical Microbiology: The Diagnosis of HTLV-III/LAV Infection in Clinical Microbiology Labs \$16.00
ASM-77	Exotoxin Excretion by Gram-Negative Bacteria \$16.00
ASM-78	Current Topics in Antimicrobial Therapy \$16.00
ASM-113	Clostridium Difficile Associated Colitis \$16.00
ASM-114	Current Topics in Pediatric Clinical Microbiology: Rapid Diagnosis of Infections in Children \$16.00

The Pathogenic Neisseriae

Proceedings of the Fourth International Symposium on the Pathogenic Neisseriae, Pacific Grove, California

Editor:

Gary K. Schoolnik

Coeditors:

Geo. F. Brooks, Stanley Falkow, Carl E. Frasch, Joan S. Knapp, J. Allen McCutchan, and Stephen A. Morse

The Fourth International Symposium on the Pathogenic Neisseriae focused on new work on the genetics, immunobiology, epidemiology, and control of *N. gonorrhoeae* and *N. meningitidis*, applying the latest advances in molecular biology. These studies, which contribute to fundamental concepts about the pathogenic strategy of mucosal pathogens, are presented in *The Pathogenic Neisseriae*.

The articles reflect significant progress in the cloning of genes encoding gonococcal virulence determinants, in creating and employing useful libraries of monoclonal antibodies to gonococci to further define gonococcal epidemiology, in investigating a novel mechanism for epithelial cell invasion by gonococci and meningococci, and in developing a group B meningococcal vaccine. Among other important findings in the book is the revelation, through visually remarkable electron micrographs, of an apparently orderly and analogous pathogenic sequence for gonococcus-human fallopian tube and meningococcus-nasal epithelium interactions.

Sections in the book include:

- Epidemiology of *Neisseria gonorrhoeae* Infections
- Neisserial Genetics
- Cell Surface Proteins of *Neisseria gonorrhoeae*: Pathogenic Roles and Implications for Vaccine Development
- *Neisseria gonorrhoeae* Pathobiology: Peptidoglycan, Lipopolysaccharide, and Iron-Regulated Proteins
- *Neisseria gonorrhoeae* Pathobiology: Interactions with Serum and Polymorphonuclear Leukocytes
- *Neisseria meningitidis*: Epidemiology, Pathobiology, and Vaccine Development

IMPORTANT READING FOR THE LAB OR CLINIC

The book will be of particular interest to scientists studying microbial pathogenesis, genetic mechanisms of antigenic variation, new strategies for vaccine development, and the cell surface of prokaryotes. It will be a valuable reference tool for infectious disease clinicians and public health professionals and for university, medical school, and industrial biotechnology laboratories.
