

INFECTION AND IMMUNITY

Volume 54

October 1986

No. 1

BACTERIAL INFECTIONS AND IMMUNITY

Protection of C3H/HeJ Mice from Lethal <i>Salmonella typhimurium</i> LT2 Infection by Immunization with Lipopolysaccharide-Lipid A-Associated Protein Complexes. James W. Killion and David C. Morrison	1-8
Ocular Sensitization of Mice by Live (But Not Irradiated) <i>Chlamydia trachomatis</i> Serovar A. Daniel G. Colley, Thomas G. Goodman, and Ibrahim S. Barsoum	9-12
Treponemal Infection Specifically Enhances Node T-Cell Regulation of Macrophage Activity. Dale R. Tabor, Omar Bagasra, and Richard F. Jacobs ...	21-27
Polyclonal Response of Human Lymphocytes to <i>Chlamydia trachomatis</i>. Liisa Räsänen, Matti Lehtinen, Maili Lehto, Jorma Paavonen, and Pauli Leinikki	28-31
Identification of the O-Linked Sialyloligosaccharides of Glycophorin A as the Erythrocyte Receptors for S-Fimbriated <i>Escherichia coli</i>. Jaakko Parkkinen, Gary N. Rogers, Timo Korhonen, Wolfgang Dahr, and Jukka Finne	37-42
Identification and Characterization of a Uroepithelial Cell Adhesin from a Uropathogenic Isolate of <i>Proteus mirabilis</i>. Susan K. Wray, Sheila I. Hull, Richard G. Cook, James Barrish, and Richard A. Hull	43-49
Genetic Control of Natural Resistance to Nontuberculous Mycobacterial Infections in Mice. Ian M. Orme, Richard W. Stokes, and Frank M. Collins	56-62
Antigenic and Physical Diversity of <i>Neisseria gonorrhoeae</i> Lipooligosaccharides. Robert Mandrell, Herman Schneider, Michael Apicella, Wendell Zollinger, Peter A. Rice, and J. McLeod Griffiss	63-69
Role of Capsule and O Antigen in Resistance of <i>Klebsiella pneumoniae</i> to Serum Bactericidal Activity. Juan M. Tomás, Vicente J. Benedí, Blanca Ciurana, and Juan Jofre	85-89
Fate of <i>Chlamydia trachomatis</i> in Human Monocytes and Monocyte-Derived Macrophages. Esther Manor and Israel Sarov	90-95
Heat-Modifiable Envelope Proteins of <i>Bordetella pertussis</i>. Sandra K. Armstrong and Charlotte D. Parker	109-117
Macrophage Uptake and Retention of Radiolabeled Glycopeptidolipid Antigens Associated with the Superficial L₁ Layer of <i>Mycobacterium intracellulare</i> Serovar 20. Lucilla C. Hooper, Marsha M. Johnson, Vimla R. Khera, and William W. Barrow	133-141
Characterization of a Protein from Normal Human Polymorphonuclear Leukocytes with Bactericidal Activity against <i>Pseudomonas aeruginosa</i>. Carolyn J. Hovde and Beulah H. Gray	142-148
Immunological Activity of a 38-Kilodalton Protein Purified from <i>Mycobacterium tuberculosis</i>. D. Young, L. Kent, A. Rees, J. Lamb, and J. Ivanyi	177-183
Antigonococcal Activity of Human Neutrophil Cathepsin G. William M. Shafer, Victor C. Onunka, and Larry E. Martin	184-188
Development of an Aerosol Model of Murine Respiratory Mycoplasmosis in Mice. Jerry K. Davis, Randall B. Thorp, Robert F. Parker, Harold White, Dan Dziedzic, Jim D'Arcy, and Gail H. Cassell	194-201

Continued on following page

Organization of Genes Encoding Two Outer Membrane Proteins of the Lyme Disease Agent <i>Borrelia burgdorferi</i> within a Single Transcriptional Unit. Timothy R. Howe, Frank W. LaQuier, and Alan G. Barbour	207–212
Characterization of Monoclonal Antibodies to a Crystal Protein of <i>Bacillus thuringiensis</i> subsp. <i>kurstaki</i>. Maja Huber-Lukač, Françoise Jaquet, Peter Luethy, Ralf Huetter, and Dietmar G. Braun	228–232
Polyclonal and Monoclonal Antibody Therapy for Experimental <i>Pseudomonas aeruginosa</i> Pneumonia. James E. Pennington, Gloria J. Small, Mark E. Lostrom, and Gerald B. Pier	239–244
Effect of Acute Nutritional Deprivation on Macrophage Colony-Stimulating Factor and Macrophage Progenitor Cells in Mice. Edward J. Wing, Lisa K. Barczynski, and Jeanette M. Sherbondy	245–249

FUNGAL AND PARASITIC INFECTIONS AND IMMUNITY

Analyses of Rat <i>Pneumocystis carinii</i> Antigens Recognized by Human and Rat Antibodies by Using Western Immunoblotting. Don C. Graves, Scott J. N. McNabb, Mark A. Worley, Tamyra D. Downs, and Michael H. Ivey	96–103
Experimental Evidence for the Role of Lipids in Adherence of <i>Candida</i> spp. to Human Buccal Epithelial Cells. M. A. Ghannoum, G. R. Burns, K. Abu Elteen, and S. S. Radwan	189–193
Control of Trypanodestructive Antibody Responses and Parasitemia in Mice Infected with <i>Trypanosoma (Duttonella) vivax</i>. S. M. Mahan, L. Hendershot, and S. J. Black	213–221
A Monoclonal Antibody to a Cell Wall Component of <i>Candida albicans</i>. Valérie Hopwood, Daniel Poulain, Bernard Fortier, Glyn Evans, and Alain Vernes	222–227
Experimental Intrauterine Infection of Adult BALB/c Mice with <i>Cryptosporidium</i> sp. Elisabeth M. Liebler, Joachim F. Pohlenz, and Douglas B. Woodmansee	255–259
Influence of Growth Conditions on Cell Surface Hydrophobicity of <i>Candida albicans</i> and <i>Candida glabrata</i>. Kevin C. Hazen, Balbina J. Plotkin, and Denise M. Klimas	269–271

ORAL MICROBIOLOGY AND IMMUNITY

Molecular Organization and Expression of the <i>gtfA</i> Gene of <i>Streptococcus mutans</i> LM7. Michael J. Pucci and Francis L. Macrina	77–84
Role of NADH Oxidase in the Oxidative Inactivation of <i>Streptococcus salivarius</i> Fructosyltransferase. Kazuhiko Abbe, Shoko Takahashi-Abbe, Roberta A. Schoen, and Charles L. Wittenberger	233–238
Interaction of a 60-Kilodalton D-Mannose-Containing Salivary Glycoprotein with Type 1 Fimbriae of <i>Escherichia coli</i>. Jegdish P. Babu, Soman N. Abraham, Mustafa K. Dabbous, and Edwin H. Beachey	104–108

PATHOGENESIS

Interference with Granulocyte Function by <i>Staphylococcus epidermidis</i> Slime. George M. Johnson, David A. Lee, Warren E. Regelman, Ernest D. Gray, Georg Peters, and Paul G. Quie	13–20
Isolation, Characterization, and Mapping of Tn5 Insertions into the 140-Megadalton Invasion Plasmid Defective in the Mouse Sereny Test in <i>Shigella flexneri</i> 2a. Chihiro Sasakawa, Souichi Makino, Kunio Kamata, and Masanosuke Yoshikawa	32–36

Cloning and Expression in <i>Escherichia coli</i> of the <i>Streptococcus pneumoniae</i> Gene Encoding Pneumolysin. James C. Paton, Anne M. Berry, Robert A. Lock, David Hansman, and Paul A. Manning	50-55
Characterization of Toxins A and B of <i>Clostridium difficile</i> with Monoclonal Antibodies. David M. Lyerly, Carol J. Phelps, Julianna Toth, and Tracy D. Wilkins	70-76
The Chicken Embryo as a Model for <i>Campylobacter</i> Invasion: Comparative Virulence of Human Isolates of <i>Campylobacter jejuni</i> and <i>Campylobacter coli</i>. Leanne H. Field, Virginia L. Headley, Judy L. Underwood, Shelley M. Payne, and L. Joe Berry	118-125
Influence of Iron on Growth, Morphology, Outer Membrane Protein Composition, and Synthesis of Siderophores in <i>Campylobacter jejuni</i>. Leanne H. Field, Virginia L. Headley, Shelley M. Payne, and L. Joe Berry	126-132
Degradation of Soluble Laminin and Depletion of Tissue-Associated Basement Membrane Laminin by <i>Pseudomonas aeruginosa</i> Elastase and Alkaline Protease. Louis W. Heck, Kazuyuki Morihara, and Dale R. Abrahamson ...	149-153
Interactions of Gonococci with HeLa Cells: Attachment, Detachment, Replication, Penetration, and the Role of Protein II. Debra Bessen and Emil C. Gotschlich	154-160
Cloning of Urease Gene Sequences from <i>Providencia stuartii</i>. Harry L. T. Mobley, Bradley D. Jones, and Ann E. Jerse	161-169
Lyophilized Airborne <i>Clostridium botulinum</i> Spores as Inocula That Intestinally Colonize Antimicrobially Pretreated Adult Mice. Hiroshi Sugiyama, Jami L. Prather, and Michael J. Woller	260-261
Copurification of <i>Leptospira interrogans</i> Serovar <i>pomona</i> Hemolysin and Sphingomyelinase C. Alan W. Bernheimer and Russell F. Bey	262-264
Transfer of the Plasmid for Exfoliative Toxin B Synthesis in Mixed Cultures on Nitrocellulose Membranes. Marvin Rogolsky, Bernard W. Beall, and Bill B. Wiley	265-268

IMMUNE MECHANISMS

Immunopotentiating Activities of Cell Walls, Peptidoglycans, and Teichoic Acids from Two Strains of <i>Listeria monocytogenes</i>. Andrew Paquet, Jr., Kirsten M. Raines, and Perriane C. Brownback	170-176
Passive Transfer of Mucosal Antibody to <i>Streptococcus equi</i> in the Foal. Jorge E. Galan, John F. Timoney, and Frederick W. Lengemann	202-206
Bactericidal Activities of Human Polymorphonuclear Leukocyte Proteins against <i>Escherichia coli</i> O111:B4 Coated with C5 or C8. Francesco Tedesco, Giandomenico Rottini, Lucia Roncelli, Marina Basaglia, Renzo Menegazzi, and Pierluigi Patriarca	250-254
