

INFECTION AND IMMUNITY

Volume 55

January 1987

No. 1

BACTERIAL INFECTIONS AND IMMUNITY

| | |
|---|---------|
| Characterization of Neuraminidases Produced by Various Serotypes of Group B Streptococci. Jacqueline G. Brown and David C. Straus | 1-6 |
| Analysis of T-Cell-Dependent and -Independent Antigens of <i>Rickettsia conorii</i> with Monoclonal Antibodies. Hui M. Feng, David H. Walker, and Jia G. Wang | 7-15 |
| Shared Epitopes between <i>Mycoplasma pneumoniae</i> Major Adhesin Protein P1 and a 140-Kilodalton Protein of <i>Mycoplasma genitalium</i>. Janice Morrison-Plummer, Anna Lazzell, and Joel B. Baseman | 49-56 |
| Tear and Serum Antibody Response to <i>Chlamydia trachomatis</i> Antigens during Acute Chlamydial Conjunctivitis in Monkeys as Determined by Immunoblotting. Harlan D. Caldwell, Scott Stewart, Shirley Johnson, and Hugh Taylor | 93-98 |
| Differential Growth Characteristics and Immunogenicity of Tight and Coasting Temperature-Sensitive Mutants of <i>Pseudomonas aeruginosa</i>. Anne Morris Hooke, Daniel O. Sordelli, M. Cristina Cerquetti, and Joseph A. Bellanti | 99-103 |
| Chemical Characterization of Binding Properties of Opacity-Associated Protein II from <i>Neisseria gonorrhoeae</i>. Debra Bessen and Emil C. Gotschlich | 141-147 |
| Protein Sources of Heme for <i>Haemophilus influenzae</i>. Terrence L. Stull | 148-153 |
| Cloning of the Filamentous Hemagglutinin of <i>Bordetella pertussis</i> and Its Expression in <i>Escherichia coli</i>. Douglas R. Brown and Charlotte D. Parker | 154-161 |
| Biosynthesis and Disulfide Cross-Linking of Outer Membrane Components during the Growth Cycle of <i>Chlamydia trachomatis</i>. Wilbert J. Newhall V. | 162-168 |
| Presence and Expression of Aerobactin Genes in Virulent Avian Strains of <i>Escherichia coli</i>. Jean-Pierre Lafont, Maryvonne Dho, H el ene M. D'Hauteville, Annie Bree, and Philippe J. Sansonetti | 193-197 |
| Prairie Dog Model for Antimicrobial Agent-Induced <i>Clostridium difficile</i> Diarrhea. E. L. Muller, H. A. Pitt, and W. L. George | 198-200 |
| A Murine Monoclonal Antibody Specific for the Outer Core Oligosaccharide of <i>Salmonella</i> Lipopolysaccharide. Raymond S. W. Tsang, K. H. Chan, P. Y. Chau, K. C. Wan, M. H. Ng, and Siegfried Schlecht | 211-216 |
| Role of Natural Killer Cells in Infection with the Mouse Pneumonitis Agent (Murine <i>Chlamydia trachomatis</i>). Dwight M. Williams, Julius Schachter, and Barry Grubbs | 223-226 |
| <i>Rickettsia prowazekii</i> Requires Host Cell Serine and Glycine for Growth. Faye E. Austin, Jenifer Turco, and Herbert H. Winkler | 240-244 |
| Purification, Partial Characterization, and Identification of a Skin-Reactive Protein Antigen of <i>Mycobacterium bovis</i> BCG. Jacqueline De Bruyn, Roger Bosmans, Mireille Turneer, Maurice Weckx, Jean Nyabenda, Jean-Paul Van Vooren, Paul Falmagne, Harald G. Wiker, and Morten Harboe | 245-252 |
| Induction of Mucosal Immunoglobulin A Immune Response by Preparations of <i>Neisseria gonorrhoeae</i> Porin Proteins. Suzan H. M. Jeurissen, Taede Sminia, and E. Coen Beuvery | 253-257 |
| <i>Brucella</i> Outer Membrane Lipoprotein Shares Antigenic Determinants with <i>Escherichia coli</i> Braun Lipoprotein and Is Exposed on the Cell Surface. Mar a J. G omez-Miguel, Ignacio Moriy n, and Jos e L pez | 258-262 |

Continued on following page

| | |
|--|---------|
| Correlation between Virulence and Colony Morphology in <i>Vibrio vulnificus</i>. Linda M. Simpson, Virginia K. White, Sandra F. Zane, and James D. Oliver | 269–272 |
| Characterization of Protein I from Serum-Sensitive and Serum-Resistant Transformants of <i>Neisseria gonorrhoeae</i>. Ralph C. Judd, Milton Tam, and Keith Joiner | 273–276 |

FUNGAL AND PARASITIC INFECTIONS AND IMMUNITY

| | |
|--|---------|
| <i>Histoplasma capsulatum</i> Fails to Trigger Release of Superoxide from Macrophages. Linda Gropp Eissenberg and William E. Goldman | 29–34 |
| A Membrane-Associated Neuraminidase in <i>Entamoeba histolytica</i> Trophozoites. Ifeanyi A. Udezulu and Gordon J. Leitch | 181–186 |
| Glycoprotein Recognition Mediates Attachment of <i>Plasmodium chabaudi</i> to Mouse Erythrocytes. Mario H. Rodriguez and Michele Jungery | 187–192 |
| Isolation of <i>Coccidioides immitis</i> F Antigen by Immunoaffinity Chromatography with Monospecific Antiserum. Rebecca A. Cox, Lorene A. Britt, and Rodney A. Michael | 227–232 |
| Induction of a Macrophage-Suppressive Lymphokine by Soluble Cryptococcal Antigens and Its Association with Models of Immunologic Tolerance. Rebecca Blackstock, Jeffrey M. McCormack, and Nancy K. Hall..... | 233–239 |

ORAL MICROBIOLOGY AND IMMUNITY

| | |
|--|---------|
| Functional Characterization of Extracellular Vesicles Produced by <i>Bacteroides gingivalis</i>. Daniel Grenier and Denis Mayrand | 111–117 |
| Expression of <i>Streptococcus sanguis</i> Antigens in <i>Escherichia coli</i>: Cloning of a Structural Gene for Adhesion Fimbriae. Paula M. Fives-Taylor, Francis L. Macrina, Todd J. Pritchard, and Sandra S. Peene | 123–128 |
| Effects of Oxygen on Glucose-Limited Growth of <i>Streptococcus mutans</i>. Takao Kodama, Kazuhiro Fukui, Tatsuya Shimamoto, Hiroyuki Ohta, Susumu Kokeguchi, and Keijiro Kato | 169–173 |
| Inhibition of Gingival Fibroblast Growth by <i>Bacteroides gingivalis</i>. Hannu Larjava, Veli-Jukka Uitto, Erkki Eerola, and Markus Haapasalo | 201–205 |
| Production of Immunoglobulin M (IgM) Autoantibodies to IgG in Rabbits Inoculated with <i>Mycoplasma salivarium</i> Cells Grown in Medium Supplemented with Rabbit Serum. Tsuguo Watanabe, Ken-ichiro Shibata, and Koji Hasegawa | 263–265 |
| Immunological Study of Cross-Reactive Polysaccharide Antigens (Types a, d, and h) of Oral <i>Streptococcus</i> spp. with Monoclonal Antibodies. Fusao Ota, Hirohisa Kato, and Komei Fukui..... | 266–268 |

PATHOGENESIS

| | |
|---|-------|
| Effect of Acetylation on Arthropathic Activity of Group A Streptococcal Peptidoglycan-Polysaccharide Fragments. Stephen A. Stimpson, Robert A. Lerch, David R. Cleland, David P. Yarnall, Richard L. Clark, William J. Cromartie, and John H. Schwab | 16–23 |
| Role of the A Subunit of Pertussis Toxin in Alteration of Chinese Hamster Ovary Cell Morphology. Drusilla L. Burns, James G. Kenimer, and Charles R. Manclark | 24–28 |
| Purification and Characterization of <i>Clostridium sordellii</i> Lethal Toxin and Cross-Reactivity with <i>Clostridium difficile</i> Cytotoxin. Michel R. Popoff | 35–43 |
| Production of an Extracellular Toxic Complex by Various Strains of <i>Klebsiella pneumoniae</i>. David C. Straus | 44–48 |

| | |
|---|---------|
| Requirement of a Properly Acylated $\beta(1-6)$-D-Glucosamine Disaccharide Bisphosphate Structure for Efficient Manifestation of Full Endotoxic and Associated Bioactivities of Lipid A. Ichiro Takahashi, Shozo Kotani, Haruhiko Takada, Masachika Tsujimoto, Tomohiko Ogawa, Tetsuo Shiba, Shoichi Kusumoto, Michiharu Yamamoto, Akira Hasegawa, Makoto Kiso, Masahiro Nishijima, Fumio Amano, Yuzuru Akamatsu, Kazuhiro Harada, Shigenori Tanaka, Haruki Okamura, and Toshihide Tamura | 57-68 |
| Adhesion of Enteropathogenic <i>Escherichia coli</i> to Human Intestinal Enterocytes and Cultured Human Intestinal Mucosa. Stuart Knutton, David R. Lloyd, and Alexander S. McNeish | 69-77 |
| Role of Plasmid-Encoded Adherence Factors in Adhesion of Enteropathogenic <i>Escherichia coli</i> to HEp-2 Cells. Stuart Knutton, Mary M. Baldini, James B. Kaper, and Alexander S. McNeish | 78-85 |
| Identification of a New Fimbrial Structure in Enterotoxigenic <i>Escherichia coli</i> (ETEC) Serotype O148:H28 Which Adheres to Human Intestinal Mucosa: a Potentially New Human ETEC Colonization Factor. Stuart Knutton, David R. Lloyd, and Alexander S. McNeish | 86-92 |
| Mechanism of Leukotriene Generation in Polymorphonuclear Leukocytes by Staphylococcal Alpha-Toxin. Norbert Suttorp, Werner Seeger, Joachim Zucker-Reimann, Ladislaus Roka, and Sucharit Bhakdi | 104-110 |
| Molecular Basis for the Pathological Actions of <i>Clostridium perfringens</i> Iota Toxin. Lance L. Simpson, Bradley G. Stiles, Hector H. Zepeda, and Tracy D. Wilkins | 118-122 |
| <i>Bordetella pertussis</i> Adenylate Cyclase: Isolation and Purification by Calmodulin-Sepharose 4B Chromatography. Richard L. Friedman | 129-134 |
| <i>Bordetella pertussis</i> Adenylate Cyclase: Effects of Affinity-Purified Adenylate Cyclase on Human Polymorphonuclear Leukocyte Functions. Richard L. Friedman, Roger L. Fiederlein, Lewis Glasser, and John N. Galgiani | 135-140 |
| Sialic Acid of Group B <i>Neisseria meningitidis</i> Regulates Alternative Complement Pathway Activation. Gary A. Jarvis and Neylan A. Vedros | 174-180 |
| Virulence Factors of <i>Bordetella bronchiseptica</i> Associated with the Production of Infectious Atrophic Rhinitis and Pneumonia in Experimentally Infected Neonatal Swine. R. Martin Roop II, Hugo P. Veit, Richard J. Sinsky, Sandra P. Veit, Erik L. Hewlett, and Ervin T. Kornegay | 217-222 |
| Expression of Iron-Regulated Proteins in <i>Yersinia</i> Species and Their Relation to Virulence. Elisabeth Carniel, Daniel Mazigh, and Henri H. Mollaret | 277-280 |

IMMUNE MECHANISMS

| | |
|--|---------|
| Formation of Transmural Complement Pores in Serum-Sensitive <i>Escherichia coli</i>. Sucharit Bhakdi, Gabriele Kuller, Marion Muhly, Susanne Fromm, Gerhard Seibert, and Jürgen Parrisius | 206-210 |
|--|---------|
