

INFECTION AND IMMUNITY

Volume 55

October 1987

No. 10

BACTERIAL INFECTIONS AND IMMUNITY

- Genes for Immunodominant Protein Antigens Are Highly Homologous in *Mycobacterium tuberculosis*, *Mycobacterium africanum*, and the Vaccine Strain *Mycobacterium bovis* BCG.** Melvin C. Lu, Mary H. Lien, Ronald E. Becker, Holliday C. Heine, Adrienne M. Buggs, Dasa Lipovsek, Ranu Gupta, Phillips W. Robbins, Clemens M. Grosskinsky, S. Catherine Hubbard, and Richard A. Young 2378–2382
- Primary Murine *Chlamydia trachomatis* Pneumonia in B-Cell-Deficient Mice.** Dwight M. Williams, Barry Grubbs, and Julius Schachter 2387–2390
- Monoclonal Antibody to Human Renal Glomeruli Cross-React with Streptococcal M Protein.** Peter Goroncy-Bermes, James B. Dale, Edwin H. Beachey, and Wolfgang Opferkuch 2416–2419
- Nonoxidative Antimicrobial Effects of Human Polymorphonuclear Leukocyte Granule Proteins on *Chlamydia* spp. In Vitro.** Karen B. Register, Carolyn H. Davis, Priscilla B. Wyrick, William M. Shafer, and John K. Spitznagel 2420–2427
- Characterization of an Immunoprotective Protein Complex of *Anaplasma marginale* by Cloning and Expression of the Gene Coding for Polypeptide Am105L.** Anthony F. Barbet, Guy H. Palmer, Peter J. Myler, and Travis C. McGuire 2428–2435
- Fate of *Legionella pneumophila* Philadelphia-1 Strain in Resident, Elicited, Activated, and Immune Peritoneal Macrophages of Guinea Pigs.** Shin-ichi Yoshida, Yasuo Mizuguchi, Yoshihiko Nikaido, Masao Mitsuyama, and Kikuo Nomoto 2477–2482
- Establishment and Characterization of a T-Cell Line Specific for *Rickettsia tsutsugamushi*.** Kazuya Kodama, Shinichi Kawamura, Masaki Yasukawa, and Yuzuru Kobayashi 2490–2495
- Adoptive Transfer of Immunity to *Treponema pallidum* Nichols Infection in Inbred Strain 2 and C4D Guinea Pigs.** Victoria Wicher, Konrad Wicher, Adam Jakubowski, and Shaheen M. Nakeeb 2502–2508
- Hypochlorous Acid-Promoted Loss of Metabolic Energy in *Escherichia coli*.** William C. Barrette, Jr., J. Michael Albrich, and James K. Hurst 2518–2525

FUNGAL AND PARASITIC INFECTIONS AND IMMUNITY

- Recognition of the Galactose- or N-Acetylgalactosamine-Binding Lectin of *Entamoeba histolytica* by Human Immune Sera.** William A. Petri, Jr., M. Patricia Joyce, Jennifer Broman, Roger D. Smith, Cheryl F. Murphy, and Jonathan I. Ravdin 2327–2331
- Characterization of the *Cryptosporidium* Antigens from Sporulated Oocysts of *Cryptosporidium parvum*.** Benjamin J. Luft, Dawn Payne, Douglas Woodmansee, and Charles W. Kim 2436–2441
- Susceptibility of Pathogenic and Nonpathogenic *Naegleria* spp. to Complement-Mediated Lysis.** Leslie Y. Whiteman and Francine Marciano-Cabral 2442–2447

Continued on following page

Pregnancy and Humoral Immune Response in Mice Chronically Infected by *Trypanosoma cruzi*. Yves Carlier, Maria Teresa Rivera, Carine Truyens, Michel Goldman, Philippe Lambert, Jocelyne Flament, Denise Bauwens, and Bernard Vray 2496–2501

ORAL MICROBIOLOGY AND IMMUNITY

Immunosuppressive Effects of *Centipeda periodontii*: Selective Cytotoxicity for Lymphocytes and Monocytes. Bruce J. Shenker, Peter Berthold, Patricia Dougherty, and Katherine K. Porter 2332–2340

Protection of Gnotobiotic Rats against Dental Caries by Passive Immunization with Bovine Milk Antibodies to *Streptococcus mutans*. Suzanne M. Michalek, Richard L. Gregory, Cecily C. Harmon, Jenny Katz, Gloria J. Richardson, Tracy Hilton, Steven J. Filler, and Jerry R. McGhee 2341–2347

Role of Sialic Acid in Saliva-Mediated Aggregation of *Pseudomonas aeruginosa* Isolated from Cystic Fibrosis Patients. Kunio Komiyama, Brian F. Habbick, and Satwant K. Tumber 2364–2369

***Bacteroides gingivalis*-*Actinomyces viscosus* Cohesive Interactions as Measured by a Quantitative Binding Assay.** Susanne Schwarz, Richard P. Ellen, and David A. Grove 2391–2397

Protective Secretory Immunoglobulin A Antibodies in Humans following Oral Immunization with *Streptococcus mutans*. Richard L. Gregory and Steven J. Filler 2409–2415

Effect of Immunization on Experimental *Bacteroides gingivalis* Infection in a Murine Model. Priscilla B. Chen, Mirdza E. Neiders, Stephen J. Millar, Homer S. Reynolds, and Joseph J. Zambon 2534–2537

Cloning and Characterization of *Streptococcus mutans* LM7 plasmid pAM7. Sumihare Noji, Satsuki Date, Yoshimitsu Abiko, Hisashi Takiguchi, and Shigehiko Taniguchi 2538–2540

PATHOGENESIS

Identification and Characterization of the *Pasteurella haemolytica* Leukotoxin. Yung-Fu Chang, Ry Young, David Post, and Douglas K. Struck 2348–2354

The Erythrocyte and Epithelial Cell Receptors for *Haemophilus influenzae* Are Expressed Independently. Loek van Alphen, Joyce Poole, Lea Geelen, and H. C. Zanen 2355–2358

Characterization of Plasmids Encoding the Adherence Factor of Enteropathogenic *Escherichia coli*. James P. Nataro, Kevin O. Maher, Palmer Mackie, and James B. Kaper 2370–2377

Comparative Analysis of the Localization of Lipoteichoic Acid in *Streptococcus agalactiae* and *Streptococcus pyogenes*. Stephen J. Mattingly and Barbara P. Johnston 2383–2386

Interaction of Soluble Fibronectin with Group B Streptococci. Karina M. Butler, Carol J. Baker, and Morven S. Edwards 2404–2408

Expression of M Type 12 Protein by a Group A Streptococcus Exhibits Phaselike Variation: Evidence for Coregulation of Colony Opacity Determinants and M Protein. Warren J. Simpson and P. Patrick Cleary 2448–2455

Physiology of the Potentiation of Lethal Endotoxin Shock by Streptococcal Pyrogenic Exotoxin in Rabbits. Toshimi Murai, Yoshiyuki Ogawa, Hironoshin Kawasaki, and Seizaburo Kanoh 2456–2460

Construction and Characterization of *Bordetella pertussis* Toxin Mutants. William J. Black and Stanley Falkow 2465–2470

Lipid X Ameliorates Pulmonary Hypertension and Protects Sheep from Death Due to Endotoxin. Douglas T. Golenbock, James A. Will, Christian R. H. Raetz, and Richard A. Proctor	2471-2476
Influences of Conjugal Genetic Transfer Functions of Colicin V Plasmids on Adhesion of <i>Escherichia coli</i> to Murine Intestinal Tissue. Jill Darken and Dwayne C. Savage	2483-2489
Pathogenic Capacity of Proteases from <i>Serratia marcescens</i> and <i>Pseudomonas aeruginosa</i> and Their Suppression by Chicken Egg White Ovomacroglobulin. Akhteruzzaman Molla, Yasuhiro Matsumura, Tetsuro Yamamoto, Ryoichi Okamura, and Hiroshi Maeda	2509-2517
Production of a Unique Cytotoxin by <i>Campylobacter jejuni</i>. Richard L. Guerrant, Christine A. Wanke, Ross A. Pennie, Leah J. Barrett, Aldo A. M. Lima, and Alison D. O'Brien	2526-2530
Use of Monoclonal Antibodies to Protein F of <i>Pseudomonas aeruginosa</i> as Oponins for Phagocytosis by Macrophages. Janet L. Battershill, David P. Speert, and Robert E. W. Hancock	2531-2533

IMMUNE MECHANISMS

Functional Capacity of Marginated and Bone Marrow Reserve Granulocytes. Russell W. Steele, Christopher R. Steele, Neylon S. Pilkington, Jr., and Ronald K. Charlton	2359-2363
Oxidative Response of Human Neutrophils, Monocytes, and Alveolar Macrophages Induced by Unopsonized Surface-Adherent <i>Staphylococcus aureus</i>. Melissa L. Devalon, Greg R. Elliott, and Warren F. Regelmann	2398-2403
Impairment of Macrophage Function by Inhibitors of Ornithine Decarboxylase Activity. Felipe Kierszenbaum, Julia J. Wirth, Peter P. McCann, and Albert Sjoerdsma	2461-2464
