

INFECTION AND IMMUNITY

Volume 57

June 1989

No. 6

BACTERIAL INFECTIONS AND IMMUNITY

- In Vivo Expression and Variation of *Escherichia coli* Type 1 and P Pili in the Urine of Adults with Acute Urinary Tract Infections.** Petras V. Kisielius, William R. Schwan, Susan K. Amundsen, James L. Duncan, and Anthony J. Schaeffer 1656-1662
- Inactivation of Human Gamma Interferon by *Pseudomonas aeruginosa* Proteases: Elastase Augments the Effects of Alkaline Protease Despite the Presence of α_2 -Macroglobulin.** Rebecca T. Horvat, Matthew Clabaugh, Cindy Duval-Jobe, and Michael J. Parmely 1668-1674
- Human Milk Immunoglobulin A Antibodies to *Shigella* Virulence Determinants.** Thomas G. Cleary, Donald K. Winsor, Delores Reich, Guillermo Ruiz-Palacios, and Juan J. Calva 1675-1679
- Fixation of *Clostridium difficile* Toxin A and Cholera Toxin to Intestinal Brush Border Membranes from Axenic and Conventional Mice.** F. Lucas, G. W. Elmer, E. Brot-Laroche, and G. Corthier 1680-1683
- Subunit Structure of the Variable V-1 Antigen of *Mycoplasma pulmonis*.** H. L. Watson, K. Dybvig, D. K. Blalock, and G. H. Cassell 1684-1690
- Heterogeneity of the L-Rhamnose Residue in the Outer Core of *Pseudomonas aeruginosa* Lipopolysaccharide, Characterized by Using Human Monoclonal Antibodies.** Shin-Ichi Yokota, Hiroshi Ochi, Hiroshi Ohtsuka, Masuhiro Kato, and Hiroshi Noguchi 1691-1696
- Serotype 8- and Serocluster-Specific Surface-Expressed Antigens of *Ureaplasma urealyticum*.** D. Thirkell, Alison D. Myles, and W. C. Russell 1697-1701
- Roles of Interferon and Cellular Adhesion Molecules in Bacterial Activation of Human Natural Killer Cells.** Robert A. Lindemann 1702-1706
- Complement Activation and C3 Binding by Serum-Sensitive and Serum-Resistant Strains of *Pseudomonas aeruginosa*.** Neal L. Schiller, Richard A. Hatch, and Keith A. Joiner 1707-1713
- Mechanisms of Recrudescence of *Mycobacterium bovis* BCG Infection in Mice.** Josephine H. Cox, Bruce C. Knight, and Juraj Ivanyi 1719-1724
- Impact of Protein Malnutrition on Exogenous Reinfection with *Mycobacterium tuberculosis*.** David N. McMurray, Rebecca A. Bartow, and Carole L. Mintzer 1746-1749
- Dependence of Proliferation of *Bacteroides forsythus* on Exogenous N-Acetylmuramic Acid.** C. Wyss 1757-1759
- Isolation of *Rickettsia prowazekii* with Reduced Sensitivity to Gamma Interferon.** Jenifer Turco and Herbert H. Winkler 1765-1772
- Accumulation of Chlamydial Lipopolysaccharide Antigen in the Plasma Membranes of Infected Cells.** Susan T. Karimi, Robert H. Schloemer, and Charles E. Wilde III 1780-1785
- Retention of Bacterial Lipopolysaccharide at the Site of Subcutaneous Injection.** Takashi Yokochi, Yoshiko Inoue, Junko Yokoo, Yoshinobu Kimura, and Nobuo Kato 1786-1791

Continued on following page

Protective Effect of Recombinant Murine Granulocyte-Macrophage Colony-Stimulating Factor against <i>Pseudomonas aeruginosa</i> Infection in Leukocytopenic Mice. Takeshi Tanaka, Seiichi Okamura, Kaoru Okada, Akira Suga, Nobuyuki Shimono, Norihiko Ohhara, Yoshio Hirota, Yoshiro Sawae, and Yoshiyuki Niho.....	1792-1799
<i>Vibrio cholerae</i> Expresses Cell Surface Antigens during Intestinal Infection Which Are Not Expressed during In Vitro Culture. Gunhild Jonson, Ann-Mari Svennerholm, and Jan Holmgren	1809-1815
Two-Dimensional Gel Electrophoresis and Immunoblotting of <i>Campylobacter pylori</i> Proteins. Bruce E. Dunn, Guillermo I. Perez-Perez, and Martin J. Blaser	1825-1833
Enhancement of Immunoglobulin G Responses in Mice against Hepatitis B Virus Surface Antigen, Influenza Virus Hemagglutinin Vaccine, and Tetanus Toxoid by 6-O-Acylated Muramyl Dipeptides. Teisuke Furuya, Yoshio Kumazawa, Hiroaki Takimoto, Terukazu Nagumo, Mitsuru Watanabe, Chikara Aizawa, Makoto Kiso, Akira Hasegawa, and Kikuo Nomoto.....	1839-1844
Lectinlike Properties of Pertussis Toxin. Gregory J. Tyrrell, Mark S. Pepler, Robert A. Bonnah, Clifford G. Clark, Pele Chong, and Glen D. Armstrong	1854-1857
Effect of a <i>purA</i> Mutation on Efficacy of <i>Salmonella</i> Live-Vaccine Vectors. Dennis F. Sigwart, Bruce A. D. Stocker, and John D. Clements	1858-1861
Characterization of the Selective Inhibition of Growth of Virulent <i>Legionella pneumophila</i> by Supplemented Mueller-Hinton Medium. Carl E. Catrenich and William Johnson	1862-1864

FUNGAL AND PARASITIC INFECTIONS AND IMMUNITY

Immunological and Nonimmunological Control of Severity of <i>Trypanosoma musculi</i> Infections in C3H and C57BL/6 Inbred Mice. Julia W. Albright and Joseph F. Albright	1647-1655
Metacyclic Neutralizing Effect of Monoclonal Antibody 10D8 Directed to the 35- and 50-Kilodalton Surface Glycoconjugates of <i>Trypanosoma cruzi</i>. Nobuko Yoshida, Renato A. Mortara, Marcia F. Araguth, Jorge C. Gonzalez, and Marisa Russo.....	1663-1667
Cytokine Activation of Murine Macrophages for In Vitro Killing of <i>Entamoeba histolytica</i> Trophozoites. M. Denis and K. Chadee	1750-1756
Characterization of a Suppressor Factor That Regulates Phagocytosis by Macrophages in Murine Cryptococcosis. Rebecca Blackstock, N. K. Hall, and N. C. Hernandez	1773-1779
In Vivo Immune Responses to <i>Candida albicans</i> Modified by Treatment with Recombinant Murine Gamma Interferon. Ronald E. Garner, Uma Kuruganti, Christine W. Czarniecki, Henry H. Chiu, and Judith E. Domer	1800-1808
Relatedness of Structures of a Major Immunogen in <i>Trichomonas vaginalis</i> Isolates. J. F. Alderete and K. A. Neale.....	1849-1853

VIRULENCE FACTORS, PATHOGENESIS, AND HOST RESPONSE

Expression of the Heat-Modifiable Major Outer Membrane Protein of <i>Haemophilus influenzae</i> Type b Is Unrelated to Virulence. Mark S. Hanson, Leslie D. Cope, and Eric J. Hansen.....	1639-1646
Plasmid-Influenced Changes in <i>Mycobacterium avium</i> Catalase Activity. Michele L. Pethel and Joseph O. Falkinham III.....	1714-1718

Dissociation of Catalytic and Invasive Activities of <i>Bordetella pertussis</i> Adenylate Cyclase. Anastassios Raptis, Leslie Knipling, and J. Wolff	1725–1730
Cloning and Temperature-Dependent Expression in <i>Escherichia coli</i> of a <i>Legionella pneumophila</i> Gene Coding for a Genus-Common 60-Kilodalton Antigen. Paul S. Hoffman, Charles A. Butler, and Frederick D. Quinn ...	1731–1739
Cloning and Expression of the Streptococcal C5a Peptidase Gene in <i>Escherichia coli</i>: Linkage to the Type 12 M Protein Gene. Cecil C. Chen and P. Patrick Cleary	1740–1745
Immune Response to Dimeric Subunits of the Pertussis Toxin B Oligomer. Sally Z. Hausman, Drusilla L. Burns, Van C. Sickler, and Charles R. Manclark	1760–1764
Cell Surface Molecules Involved in Early Events in T-Cell Mitogenic Stimulation by Staphylococcal Enterotoxins. Steven M. Vroegop and Stephen E. Buxser	1816–1824
Role of Adherence in Pathogenesis of <i>Enterococcus faecalis</i> Urinary Tract Infection and Endocarditis. Carlos A. Guzmán, Carla Pruzzo, Giuseppina LiPira, and Letizia Calegari	1834–1838
Immunopharmacological Activities of 2-Keto-3-Deoxyoctonic Acid-(α2\rightarrow6)-Linked 4-O-Phosphono-D-Glucosamine Derivatives Carrying N- and 3-O-Acyl Substituents. Yoshio Kumazawa, Motohiro Matsuura, J. Yuzuru Homma, Teisuke Furuya, Hiroaki Takimoto, Kazunari Inagaki, Terukazu Nagumo, Makoto Kiso, and Akira Hasegawa	1845–1848
Group A Streptococcal Pyrogenic Exotoxin (Scarlet Fever Toxin) Type A and Blastogen A Are the Same Protein. Patrick M. Schlievert and Ernest D. Gray	1865–1867
Inactivation of Various Proteinase Inhibitors and the Complement System in Human Plasma by the 56-Kilodalton Proteinase from <i>Serratia marcescens</i>. Akhteruzzaman Molla, Takaaki Akaike, and Hiroshi Maeda	1868–1871
