

INFECTION AND IMMUNITY

Volume 58

June 1990

No. 6

MOLECULAR AND CELLULAR PATHOGENESIS

- Effects of Adhesins from Mannose-Resistant *Escherichia coli* on Mediator Release from Human Lymphocytes, Monocytes, and Basophils and from Polymorphonuclear Granulocytes.** Y. Ventur, J. Scheffer, J. Hacker, W. Goebel, and W. König 1500–1508
- Inhibition of *Streptococcus mutans* Glucosyltransferase Activity by Antiserum to a Subsequence Peptide.** Mark T. Dertzbaugh and Francis L. Macrina 1509–1513
- Roles of the Disulfide Bond and the Carboxy-Terminal Region of the S1 Subunit in the Assembly and Biosynthesis of Pertussis Toxin.** Rudy Antoine and Camille Loch 1518–1526
- Effect of Proteolytic Activity on Virulence of *Candida albicans* in Burned Mice.** Alice N. Neely and Ian Alan Holder 1527–1531
- Modification of the Glycolipid-Binding Specificity of Vero Cytotoxin by Polymyxin B and Other Cyclic Amphipathic Peptides.** Susan Head, Karam Ramotar, and Clifford Lingwood 1532–1537
- Construction and Analysis of *TnphoA* Mutants of Enteropathogenic *Escherichia coli* Unable To Invade HEP-2 Cells.** Michael S. Donnenberg, Stephen B. Calderwood, Arthur Donohue-Rolfe, Gerald T. Keusch, and James B. Kaper 1565–1571
- Signal Transduction in Human Platelets and Inflammatory Mediator Release Induced by Genetically Cloned Hemolysin-Positive and -Negative *Escherichia coli* Strains.** B. König, W. Schönfeld, J. Scheffer, and W. König 1591–1599
- Identification of a Bacteriophage Containing a Silent Staphylococcal Variant Enterotoxin Gene (*sezA*⁺).** Mary T. Soltis, John J. Mekalanos, and Marsha J. Betley 1614–1619
- Pili of *Vibrio cholerae* Non-O1.** Noboru Nakasone and Masaaki Iwanaga 1640–1646
- Effect of *Staphylococcus aureus* Delta-Toxin on Human Granulocyte Functions and Platelet-Activating-Factor Metabolism.** S. Kasimir, W. Schönfeld, J. E. Alouf, and W. König 1653–1659
- Bovine Pulmonary Endothelial Cell Damage Mediated by *Pasteurella haemolytica* Pathogenic Factors.** Mike A. Breider, Sarmishtha Kumar, and Richard E. Corstvet 1671–1677
- Characterization of the Pilin Gene of *Moraxella bovis* Dalton 2d and Expression of Pili from *M. bovis* in *Pseudomonas aeruginosa*.** T. C. Elleman, Peter A. Hoyne, and Anthony W. D. Lepper 1678–1684
- Cloning, Sequencing, and Expression of Two Class B Endoflagellar Genes of *Treponema pallidum* subsp. *pallidum* Encoding the 34.5- and 31.0-Kilodalton Proteins.** Cheryl I. Champion, James N. Miller, Michael A. Lovett, and David R. Blanco 1697–1704
- Interaction of *Treponema denticola* TD-4, GM-1, and MS25 with Human Gingival Fibroblasts.** A. Weinberg and S. C. Holt 1720–1729
- Adherence of Mutans Streptococci to Other Oral Bacteria.** Richard J. Lamont and Burton Rosan 1738–1743
- Identification of *Campylobacter jejuni* Surface Proteins That Bind to Eucaryotic Cells In Vitro.** Merivane A. de Melo and Jean-Claude Pechère 1749–1756

Continued on following page

Phenotypic Evaluation of Acapsular Transposon Mutants of <i>Vibrio vulnificus</i>. Anita C. Wright, Linda M. Simpson, James D. Oliver, and J. Glenn Morris, Jr.	1769–1773
Effects of Cations and Osmotic Protectants on Cytolytic Activity of <i>Actinobacillus actinomycetemcomitans</i> Leukotoxin. Masayasu Iwase, Edward T. Lally, Peter Berthold, Helen M. Korchak, and Norton S. Taichman	1782–1788
Nonimmune Binding of Human Immunoglobulin A to Type II Group B Streptococci. Bascom F. Anthony, Nelydia F. Concepcion, Stephen M. Puentes, and Nathaniel R. Payne	1789–1795
The HpmA Hemolysin Is More Common than HlyA among <i>Proteus</i> Isolates. Kristin G. Swihart and Rodney A. Welch	1853–1860
Cytotoxic Activity of the <i>Proteus</i> Hemolysin HpmA. Kristin G. Swihart and Rodney A. Welch	1861–1869
Expression of <i>Salmonella typhimurium</i> Genes Required for Invasion Is Regulated by Changes in DNA Supercoiling. Jorge E. Galán and Roy Curtiss III	1879–1885
Inhibition of <i>Rickettsia conorii</i> Growth by Recombinant Tumor Necrosis Factor Alpha: Enhancement of Inhibition by Gamma Interferon. Esther Manor and Israel Sarov	1886–1890
Expression in <i>Escherichia coli</i> of a High-Molecular-Weight Protective Surface An- tigen Found in Nontypeable and Type b <i>Haemophilus influenzae</i>. W. R. Thomas, M. G. Callow, R. J. Dilworth, and A. A. Audesho	1909–1913
Diarrhea and Intestinal Invasiveness of <i>Aeromonas</i> Strains in the Removable In- testinal Tie Rabbit Model. G. Pazzaglia, R. B. Sack, A. L. Bourgeois, J. Froehlich, and J. Eckstein	1924–1931
Identification, Sequencing, and Expression of <i>Mycobacterium leprae</i> Superoxide Dismutase, a Major Antigen. Harry S. Thangaraj, F. Ian Lamb, Elaine O. Davis, Peter J. Jenner, Loice H. Jeyakumar, and M. Joseph Colston	1937–1942
Calcium Is Required for Binding of <i>Escherichia coli</i> Hemolysin (HlyA) to Eryth- rocyte Membranes. David F. Boehm, Rodney A. Welch, and Irvin S. Snyder	1951–1958
Domains of <i>Escherichia coli</i> Hemolysin (HlyA) Involved in Binding of Calcium and Erythrocyte Membranes. David F. Boehm, Rodney A. Welch, and Irvin S. Snyder	1959–1964
A Proteolytic Enzyme Secreted by <i>Proteus mirabilis</i> Degrades Immunoglobulins of the Immunoglobulin A1 (IgA1), IgA2, and IgG Isotypes. L. M. Loomes, B. W. Senior, and M. A. Kerr	1979–1985
Direct Evidence that the FimH Protein Is the Mannose-Specific Adhesin of <i>Esche- richia coli</i> Type 1 Fimbriae. Karen A. Krogfelt, Hans Bergmans, and Per Klemm	1995–1998
Anaerobiosis, Type 1 Fimbriae, and Growth Phase Are Factors That Affect Inva- sion of HEp-2 Cells by <i>Salmonella typhimurium</i>. R. K. Ernst, D. M. Dombroski, and J. M. Merrick	2014–2016

BACTERIAL INFECTIONS

Mucinophilic and Chemotactic Properties of <i>Pseudomonas aeruginosa</i> in Relation to Pulmonary Colonization in Cystic Fibrosis. James W. Nelson, Michael W. Tredgett, John K. Sheehan, David J. Thornton, Derek Notman, and John R. W. Govan	1489–1495
--	-----------

Cloning and Expression in <i>Escherichia coli</i> of a <i>Haemophilus influenzae</i> Type b Lipooligosaccharide Synthesis Gene(s) That Encodes a 2-Keto-3-Deoxy-octulosonic Acid Epitope. Stanley M. Spinola, Yousef Abu Kwaik, Alan J. Lesse, Anthony A. Campagnari, and Michael A. Apicella	1558-1564
Haemocin, the Bacteriocin Produced by <i>Haemophilus influenzae</i>: Species Distribution and Role in Colonization. John J. LiPuma, Harry Richman, and Terrence L. Stull	1600-1605
Production and Characterization of Monoclonal Antibodies against the Lethal Factor Component of <i>Bacillus anthracis</i> Lethal Toxin. Stephen F. Little, Stephen H. Leppla, and Arthur M. Friedlander	1606-1613
Microflora Associated with Experimental Root Surface Caries in Humans. Bente Nyvad and Mogens Kilian	1628-1633
The <i>Borrelia burgdorferi</i> Flagellum-Associated 41-Kilodalton Antigen (Flagellin): Molecular Cloning, Expression, and Amplification of the Gene. Reinhard Wallich, Sabine E. Moter, Markus M. Simon, Klaus Ebnet, Antje Heiberger, and Michael D. Kramer	1711-1719
Expression of Antigens from Chromosomal and Linear Plasmid DNA of <i>Borrelia coriaceae</i>. Guey-Chuen Perng and Rance B. LeFebvre	1744-1748
Inoculation of Barrier-Born Pigs with <i>Helicobacter pylori</i>: a Useful Animal Model for Gastritis Type B. L. Engstrand, S. Gustavsson, A. Jörgensen, A. Schwan, and A. Scheynius	1763-1768
Demonstration of Cross-Reactivity between Bacterial Antigens and Class I Human Leukocyte Antigens by Using Monoclonal Antibodies to <i>Shigella flexneri</i>. Kristina M. Williams and Richard B. Raybourne	1774-1781
Erythrocyte Receptor (CD2)-Bearing T Lymphocytes Are Affected by Diet in Experimental Pulmonary Tuberculosis. Rebecca A. Bartow and David N. McMurray	1843-1847
A Domestic Ferret Model of Immunity to <i>Campylobacter jejuni</i>-Induced Enteric Disease. Judith A. Bell and Dean D. Manning	1848-1852
Genetic Population Structure, Clonal Phylogeny, and Pathogenicity of <i>Salmonella paratyphi</i> B. Robert K. Selander, Pilar Beltran, Noel H. Smith, Ruth M. Barker, Pamela B. Crichton, David C. Old, James M. Musser, and Thomas S. Whittam	1891-1901
The Gene Coding for Protein p60 of <i>Listeria monocytogenes</i> and Its Use as a Specific Probe for <i>Listeria monocytogenes</i>. Stephan Köhler, Michaela Leimeister-Wächter, Trinad Chakraborty, Friedrich Lottspeich, and Werner Goebel	1943-1950
Binding of Colloidal Gold-Labeled Salivary Proline-Rich Proteins to <i>Actinomyces viscosus</i> Type 1 Fimbriae. K.-P. Leung, W. E. Nesbitt, W. Fischlschweiger, D. I. Hay, and W. B. Clark	1986-1991
<i>Helicobacter pylori</i> Urease Activity Is Toxic to Human Gastric Epithelial Cells. Duane T. Smoot, Harry L. T. Mobley, Gwynn R. Chippendale, John F. Lewison, and James H. Resau	1992-1994
Proteolysis of <i>Clostridium perfringens</i> Type A Enterotoxin during Purification. Kyong Bin Park and Ronald G. Labbé	1999-2001
Polymerase Chain Reaction and Synthetic DNA Probes: a Means of Distinguishing the Causative Agents of Syphilis and Yaws? Gerda T. Noordhoek, Brigitte Wieles, Jaap J. van der Sluis, and Jan D. A. van Embden	2011-2013

Restriction Fragment Length Polymorphism in the Cytadhesin P1 Gene of Human Clinical Isolates of <i>Mycoplasma pneumoniae</i>. Shatha F. Dallo, John R. Horton, Chung J. Su, and Joel B. Baseman	2017–2020
Variation in Virulence among Oculogenital Serovars of <i>Chlamydia trachomatis</i> in Experimental Genital Tract Infection. James I. Ito, Jr., Joseph M. Lyons, and Lucy P. Airo-Brown	2021–2023

HOST RESPONSE AND INFLAMMATION

Effect of In Vivo T-Cell Depletion on the Effector T-Cell Function of Immunity to <i>Eimeria falciformis</i>. Mary I. Stiff and John P. Vasilakos	1496–1499
A Role In Vivo for Tumor Necrosis Factor Alpha in Host Defense against <i>Chlamydia trachomatis</i>. Dwight M. Williams, D. Mitchell Magee, Lynda F. Bonewald, Jeffrey G. Smith, Cheryl A. Bleicker, Gerald I. Byrne, and Julius Schachter	1572–1576
Strain Differences in Sensitivity of Rats to <i>Mycoplasma arthritidis</i> ISR 1 Infection Are Under Multiple Gene Control. Alfred Binder, Klaus Gärtner, Hans J. Hedrich, Walter Hermanns, Helga Kirchhoff, and Kurt Wonigeit.	1584–1590
Recombinant Granulocyte Colony-Stimulating Factor and Lipopolysaccharide Maintain the Phenotype of and Superoxide Anion Generation by Neutrophils. Yukito Ichinose, Nobuyuki Hara, Mitsuo Ohta, Hiroshi Aso, Hideki Chikama, Masayuki Kawasaki, Ichiro Kubota, Tetsuya Shimizu, and Katsuro Yagawa	1647–1652
Containment as a Mechanism of Nonspecific Enhancement of Defenses against Bacterial Infection. Hiram C. Polk, Jr., Peter M. Lamont, and Robert B. Galland	1807–1811
Disparate Mechanisms of Induction of Procoagulant Activity by Live and Inactivated Bacteria and Viruses. Stephen B. Sinclair, Ori D. Rotstein, and Gary A. Levy	1821–1827

FUNGAL AND PARASITIC INFECTIONS

A Model of Sustained Gastrointestinal Colonization by <i>Candida albicans</i> in Healthy Adult Mice. George Samonis, Elias J. Anaissie, Beverly Rosenbaum, and Gerald P. Bodey	1514–1517
Functional Analysis of <i>Histoplasma capsulatum</i>-Reactive T-Cell Hybridomas. George S. Deepe, Jr., and George D. Brunner	1538–1544
Isolation and Characterization of Cell Surface Mutants of <i>Candida albicans</i>. William L. Whelan, Jean Michel Delga, Elsa Wadsworth, Thomas J. Walsh, Kyung Joo Kwon-Chung, Richard Calderone, and Peter N. Lipke	1552–1557
Interactions between Adherent Mononuclear Cells and Lymphocytes from Granulomas of Mice with Schistosomiasis <i>Mansoni</i>. David E. Elliott, Samia Ragheb, Samuel R. Wellhausen, and Dov L. Boros	1577–1583
Repetitive DNA Elements Characteristic of Pathogenic <i>Entamoeba histolytica</i> Strains Can Also Be Detected after Polymerase Chain Reaction in a Cloned Nonpathogenic Strain. David Mirelman, Rivka Bracha, Shmuel Rozenblatt, and Leonard I. Garfinkel	1660–1663
Production of the Hexitol D-Mannitol by <i>Cryptococcus neoformans</i> In Vitro and in Rabbits with Experimental Meningitis. Brian Wong, John R. Perfect, Sandra Beggs, and Kathleen A. Wright.	1664–1670

Identification of <i>Pneumocystis carinii</i> Chromosomes and Mapping of Five Genes. Bettina Lundgren, Robin Cotton, Jens D. Lundgren, Jeffrey C. Edman, and Joseph A. Kovacs.	1705–1710
Localization and Activity of Various Lysosomal Proteases in <i>Leishmania amazonensis</i>-Infected Macrophages. Eric Prina, Jean-Claude Antoine, Bernd Wiederanders, and Heidrun Kirschke	1730–1737
Immune and Nonimmune Regulation of the Population of <i>Trypanosoma musculi</i> in Infected Host Mice. Julia W. Albright, Miguel Pierantoni, and Joseph F. Albright	1757–1762
Effect of Friend Leukemia Virus Infection on Susceptibility to <i>Candida albicans</i>. Marlena A. Moors, Sylvia M. Jones, Karen K. Klyczek, Thomas J. Rogers, Helen R. Buckley, and Kenneth J. Blank	1796–1801
Pathogenic and Nonpathogenic Strains of <i>Entamoeba histolytica</i> Can Be Differentiated by Monoclonal Antibodies to the Galactose-Specific Adherence Lectin. William A. Petri, Jr., Terry F. H. G. Jackson, Vinodh Gathiram, Kendra Kress, Linda D. Saffer, Terri L. Snodgrass, Martin D. Chapman, Zvi Keren, and David Mirelman	1802–1806
Detection of Antigens with Affinity for Host Cell Membrane Polypeptides in Culture Supernatants of <i>Trypanosoma cruzi</i>. Cheryl D. Davis and Raymond E. Kuhn	1812–1816
Identification of λgt11 Clones Encoding the Major Antigenic Determinants Expressed by <i>Theileria parva</i> Sporozoites. Keith Paul Iams, Roger Hall, Paul Webster, and Anthony J. Musoke	1828–1834
Characteristics of <i>Candida albicans</i> Adherence to Mouse Tissues. Jim E. Cutler, Diane L. Brawner, Kevin C. Hazen, and Mark A. Jutila	1902–1908
Opsonization of <i>Cryptococcus neoformans</i> by a Family of Isotype-Switch Variant Antibodies Specific for the Capsular Polysaccharide. Annette M. Schlageter and Thomas R. Kozel	1914–1918
Passive Immunization against <i>Cryptococcus neoformans</i> with an Isotype-Switch Family of Monoclonal Antibodies Reactive with Cryptococcal Polysaccharide. Joan E. Sanford, David M. Lupan, Annette M. Schlageter, and Thomas R. Kozel	1919–1923
The Liver as a Major Site of Immunological Elimination of Murine Trypanosome Infection, Demonstrated with the Liver Perfusion Model. Julia W. Albright, Gary W. Long, and Joseph F. Albright	1965–1970
Failure To Demonstrate a Major Role for Kupffer Cells and Radiosensitive Leukocytes in Immunoglobulin-Mediated Elimination of <i>Trypanosoma musculi</i>. P. A. L. Kongshavn, K. Shaw, E. Ghadirian, and O. Ulczak	1971–1978
The Spermicidal Compound Nonoxynol-9 Increases Adhesion of <i>Candida</i> Species to Human Epithelial Cells In Vitro. Jacqueline A. McGroarty, Fouad Soboh, Andrew W. Bruce, and Gregor Reid	2005–2007

MICROBIAL IMMUNITY AND VACCINES

Pilins from the B Serogroup of <i>Bacteroides nodosus</i>: Characterization, Expression, and Cross-Protection. Thomas C. Elleman, David J. Stewart, Kenneth G. Finney, Peter A. Hoyne, and Colin W. Ward	1545–1551
--	-----------

Safety, Immunogenicity, and Efficacy against Cholera Challenge in Humans of a Typhoid-Cholera Hybrid Vaccine Derived from <i>Salmonella typhi</i> Ty21a. Carol O. Tacket, Bruce Forrest, Renato Morona, Stephen R. Attridge, Justin LaBrooy, Ben D. Tall, Mardi Reymann, Derrick Rowley, and Myron M. Levine.....	1620-1627
Inhibition of <i>Trichomonas vaginalis</i> Motility by Monoclonal Antibodies Is Associated with Reduced Adherence to HeLa Cell Monolayers. John N. Krieger, Bruce E. Torian, John Hom, and Milton R. Tam.....	1634-1639
Immune T Cells Sorted by Flow Cytometry Confer Protection against Infection with <i>Treponema pallidum</i> subsp. <i>pertenue</i> in Hamsters. Hsi Liu, Bret M. Steiner, Jeffrey D. Alder, David K. Baertschy, and Ronald F. Schell.....	1685-1690
A Strong Antibody Response to the Periplasmic C-Terminal Domain of the OmpA Protein of <i>Escherichia coli</i> Is Produced by Immunization with Purified OmpA or with Whole <i>E. coli</i> or <i>Salmonella typhimurium</i> Bacteria. Ritvaleena Puohiniemi, Marjatta Karvonen, Jaana Vuopio-Varkila, Anna Muotiala, Ilkka M. Helander, and Matti Sarvas.....	1691-1696
Heterogeneity of Intestinal Receptors for <i>Escherichia coli</i> Heat-Stable Enterotoxin. Keith Ivens, Helene Gazzano, Peter O'Hanley, and Scott A. Waldman.....	1817-1820
Immunogenic Properties of <i>Pseudomonas aeruginosa</i> Mucoïd Exopolysaccharide. Carol V. Garner, Denise DesJardins, and Gerald B. Pier.....	1835-1842
Epitope Analysis of the F4 (K88) Fimbrial Antigen Complex of Enterotoxigenic <i>Escherichia coli</i> by Using Monoclonal Antibodies. Fred G. van Zijderveld, Julius Anakotta, Ruud A. M. Brouwers, Ank M. van Zijderveld, Douwe Bakker, and Frits K. de Graaf.....	1870-1878
Liposomes Containing Anti-Idiotypic Antibodies: an Oral Vaccine To Induce Protective Secretory Immune Responses Specific for Pathogens of Mucosal Surfaces. Susan Jackson, Jiri Mestecky, Noel K. Childers, and Suzanne M. Michalek.....	1932-1936
Specific Immunoglobulin A-Secreting Cells in Peripheral Blood of Humans Following Oral Immunization with a Bivalent <i>Salmonella typhi-Shigella sonnei</i> Vaccine or Infection by Pathogenic <i>S. sonnei</i>. Lillian Van De Verg, Deirdre A. Herrington, James R. Murphy, Steven S. Wasserman, Samuel B. Formal, and Myron M. Levine.....	2002-2004
Two Distinct Outer Membrane Serotype Subcomplexes of <i>Neisseria meningitidis</i> Serogroup A. Rainer Bläsïus, Wolfgang Strittmatter, Brian Crowe, and Mark Achtman.....	2008-2010

ERRATA

Protein Phosphorylation by Protein Kinase C in HEp-2 Cells Infected with Enteropathogenic <i>Escherichia coli</i>. T. J. Baldwin, S. F. Brooks, S. Knutton, H. A. Manjarrez Hernandez, A. Aitken, and P. H. Williams.....	2024
Inhibition of Human Lymphoproliferative Responses by Mycobacterial Phenolic Glycolipids. Jean-Jacques Fournie, Elizabeth Adams, Raymond J. Mullins, and Antony Basten.....	2024
