INSTRUCTIONS TO AUTHORS

2008 Instructions to Authors

1–20

SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors

21–22

MINIREVIEW

Intestinal Immune Response to Human *Cryptosporidium* sp. Infection

Birte Pantenburg, Sara M. Dann, Heuy-Ching Wang, Prema Robinson, Alejandro Castellanos-Gonzalez, Dorothy E. Lewis, and A. Clinton White, Jr.

23–29

MOLECULAR PATHOGENESIS

Cytotoxicity in Macrophages Infected with Rough *Brucella* Mutants Is Type IV Secretion System Dependent

Jianwu Pei, Qingmin Wu, Melissa Kahl-McDonagh, and Thomas A. Ficht

30–37

A LysR-Type Transcriptional Regulator in *Burkholderia cenocepacia* Influences Colony Morphology and Virulence

Steve P. Bernier, David T. Nguyen, and Pamela A. Sokol

38–47

A Carcinoembryonic Antigen-Related Cell Adhesion Molecule 1 Homologue Plays a Pivotal Role in Nontypeable *Haemophilus influenzae* Colonization of the Chinchilla Nasopharynx via the Outer Membrane Protein P5-Homologous Adhesin

James E. Bookwalter, Joseph A. Jurcisek, Scott D. Gray-Owen, Soledad Fernandez, Glen McGillivray, and Lauren O. Bakaletz

48–55

Outer Membrane Protein Sequence Variation in Lambs Experimentally Infected with *Anaplasma phagocytophilum*

Erik G. Granquist, Snorre Stuen, Anna M. Lundgren, Margrethe Bråten, and Anthony F. Barbet

120–126

Functional Role of the PE Domain and Immunogenicity of the *Mycobacterium tuberculosis* Triacylglycerol Hydrolase LipY

Kanhu C. Mishra, Chantal de Chastellier, Yeddula Narayana, Pablo Bifani, Alistair K. Brown, Gurdyal S. Besra, Vishwa M. Katoch, Beenu Joshi, Kithiganahalli N. Balaji, and Laurent Kremer

127–140

Staphylococcus epidermidis *saeR* Is an Effector of Anaerobic Growth and a Mediator of Acute Inflammation

L. D. Handke, K. L. Rogers, M. E. Olson, G. A. Somerville, T. J. Jerrells, M. E. Rupp, P. M. Dunman, and P. D. Fey

141–152

Critical Role of RecN in Recombinational DNA Repair and Survival of *Helicobacter pylori*

Ge Wang and Robert J. Maier

153–160

Global Transcriptome Analysis of *Borrelia burgdorferi* during Association with Human Neuroglial Cells

Jill A. Livengood, Virginia L. Schmit, and Robert D. Gilmore, Jr.

298–307

Defining Targets for Complement Components C4b and C3b on the Pathogenic Neisseriae

Lisa A. Lewis, Sanjay Ram, Alpana Prasad, Sunita Gulati, Silke Getzlaff, Anna M. Blom, Ulrich Vogel, and Peter A. Rice

339–350

Continued on following page

Enteropathogenic <i>Escherichia coli</i> O125:H6 Triggers Attaching and Effacing Lesions on Human Intestinal Biopsy Specimens Independently of Nck and TccP/TccP2	Li Bai, Stephanie Schüller, Andrew Whale, Aurelie Mousnier, Olivier Marches, Lei Wang, Tadasuke Ooka, Robert Heuschkel, Franco Torrente, James B. Kaper, Tânia A. T. Gomes, Jianguo Xu, Alan D. Phillips, and Gad Frankel	361–368
The NleE/OspZ Family of Effector Proteins Is Required for Polymorphonuclear Transepithelial Migration, a Characteristic Shared by Enteropathogenic <i>Escherichia coli</i> and <i>Shigella flexneri</i> Infections	Daniel V. Zurawski, Karen L. Mumy, Luminita Badea, Julia A. Prentice, Elizabeth L. Hartland, Beth A. McCormick, and Anthony T. Maurelli	369–379
CELLULAR MICROBIOLOGY: PATHOGEN-HOST CELL MOLECULAR INTERACTIONS		
Phagocytosis of <i>Borrelia burgdorferi</i>, the Lyme Disease Spirochete, Potentiates Innate Immune Activation and Induces Apoptosis in Human Monocytes	Adriana R. Cruz, Meagan W. Moore, Carson J. La Vake, Christian H. Eggers, Juan C. Salazar, and Justin D. Radolf	56–70
<i>Mycoplasma gallisepticum</i> Invades Chicken Erythrocytes during Infection	Gunther Vogl, Astrid Plaickner, Susan Szathmary, László Stipkovits, Renate Rosengarten, and Michael P. Szostak	71–77
Effects of CXCL10 on Dendritic Cell and CD4⁺ T-Cell Functions during <i>Leishmania amazonensis</i> Infection	René E. Vasquez, Lijun Xin, and Lynn Soong	161–169
The <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> MAP3464 Gene Encodes an Oxidoreductase Involved in Invasion of Bovine Epithelial Cells through the Activation of Host Cell Cdc42	Marta Alonso-Hearn, Dilip Patel, Lia Danelishvili, Lisbeth Meunier-Goddik, and Luiz E. Bermudez	170–178
Temporal Regulation of Interleukin-12p70 (IL-12p70) and IL-12-Related Cytokines in Splenic Dendritic Cell Subsets during <i>Leishmania donovani</i> Infection	Asher Maroof and Paul M. Kaye	239–249
Cytotoxicity of <i>Mycoplasma mycoides</i> subsp. <i>mycoides</i> Small Colony Type to Bovine Epithelial Cells	Daniela F. Bischof, Carole Janis, Edy M. Vilei, Giuseppe Bertoni, and Joachim Frey	263–269
Bystander Macrophage Apoptosis after <i>Mycobacterium tuberculosis</i> H37Ra Infection	Deirdre M. Kelly, Annemieke M. C. ten Bokum, Seonadh M. O'Leary, Mary P. O'Sullivan, and Joseph Keane	351–360
BACTERIAL INFECTIONS		
Surfactant-Associated Protein A Provides Critical Immunoprotection in Neonatal Mice	Caroline L. S. George, Kelli L. Goss, David K. Meyerholz, Fred S. Lamb, and Jeanne M. Snyder	380–390
Role of the BBA64 Locus of <i>Borrelia burgdorferi</i> in Early Stages of Infectivity in a Murine Model of Lyme Disease	Mahulena Maruskova, M. Dolores Esteve-Gassent, Valerie L. Sexton, and J. Seshu	391–402
Host Transmission of <i>Salmonella enterica</i> Serovar Typhimurium Is Controlled by Virulence Factors and Indigenous Intestinal Microbiota	Trevor D. Lawley, Donna M. Bouley, Yana E. Hoy, Christine Gerke, David A. Relman, and Denise M. Monack	403–416
HOST RESPONSE AND INFLAMMATION		
Fibrotic Response as a Distinguishing Feature of Resistance and Susceptibility to Pulmonary Infection with <i>Mycobacterium tuberculosis</i> in Mice	Jean-François Marquis, André Nantel, Ronald LaCourse, Lynn Ryan, Robert J. North, and Philippe Gros	78–88

Flagellin Suppresses the Inflammatory Response and Enhances Bacterial Clearance in a Murine Model of <i>Pseudomonas aeruginosa</i> Keratitis	Ashok Kumar, Linda D. Hazlett, and Fu-Shin X. Yu	89–96
L-Ficolin/Mannose-Binding Lectin-Associated Serine Protease Complexes Bind to Group B Streptococci Primarily through <i>N</i>-Acetylneuraminic Acid of Capsular Polysaccharide and Activate the Complement Pathway	Youko Aoyagi, Elisabeth E. Adderson, Craig E. Rubens, John F. Bohnsack, Jin G. Min, Misao Matsushita, Teizo Fujita, Yoshiyuki Okuwaki, and Shinji Takahashi	179–188
Mechanisms of Dexamethasone-Mediated Inhibition of Toll-Like Receptor Signaling Induced by <i>Neisseria meningitidis</i> and <i>Streptococcus pneumoniae</i>	Trine H. Mogensen, Randi S. Berg, Søren R. Paludan, and Lars Østergaard	189–197
Toll-Like Receptor 2-Mediated Interleukin-8 Expression in Gingival Epithelial Cells by the <i>Tannerella forsythia</i> Leucine-Rich Repeat Protein BspA	Shinsuke Onishi, Kiyonobu Honma, Shuang Liang, Panagiota Stathopoulou, Denis Kinane, George Hajishengallis, and Ashu Sharma	198–205
Lipoteichoic Acid Is Important in Innate Immune Responses to Gram-Positive Bacteria	Ho Seong Seo, Suzanne M. Michalek, and Moon H. Nahm	206–213
Nonpathogenic <i>Escherichia coli</i> Strain Nissle 1917 Inhibits Signal Transduction in Intestinal Epithelial Cells	Nobuhiko Kamada, Kenichi Maeda, Nagamu Inoue, Tadakazu Hisamatsu, Susumu Okamoto, Kyong Su Hong, Takaya Yamada, Noriaki Watanabe, Kanji Tsuchimoto, Haruhiko Ogata, and Toshifumi Hibi	214–220
<i>Brucella abortus</i> Inhibits Major Histocompatibility Complex Class II Expression and Antigen Processing through Interleukin-6 Secretion via Toll-Like Receptor 2	Paula Barrionuevo, Juliana Cassataro, M. Victoria Delpino, Astrid Zwerdling, Karina A. Pasquevich, Clara García Samartino, Jorge C. Wallach, Carlos A. Fossati, and Guillermo H. Giambartolomei	250–262
<i>Mycoplasma pneumoniae</i>-Derived Lipopeptides Induce Acute Inflammatory Responses in the Lungs of Mice	Takashi Shimizu, Yutaka Kida, and Koichi Kuwano	270–277
c-Jun NH₂-Terminal Kinase 2 Inhibits Gamma Interferon Production during <i>Anaplasma phagocytophilum</i> Infection	Joao H. F. Pedra, Jochen Mattner, Jian Tao, Steven M. Kerfoot, Roger J. Davis, Richard A. Flavell, Philip W. Askenase, Zhinan Yin, and Erol Fikrig	308–316
Gingipains from <i>Porphyromonas gingivalis</i> Increase the Chemotactic and Respiratory Burst-Priming Properties of the 77-Amino-Acid Interleukin-8 Variant	Irundika H. K. Dias, Lindsay Marshall, Peter A. Lambert, Iain L. C. Chapple, John B. Matthews, and Helen R. Griffiths	317–323
Immune Distribution and Localization of Phosphoantigen-Specific Vγ2Vδ2 T Cells in Lymphoid and Nonlymphoid Tissues in <i>Mycobacterium tuberculosis</i> Infection	Dan Huang, Yun Shen, Liyou Qiu, Crystal Y. Chen, Ling Shen, Jim Estep, Robert Hunt, Daphne Vasconcelos, George Du, Pyone Aye, Andrew A. Lackner, Michelle H. Larsen, William R. Jacobs, Jr., Barton F. Haynes, Norman L. Letvin, and Zheng W. Chen	426–436
FUNGAL AND PARASITIC INFECTIONS		
Use of a Genetically Engineered Strain To Evaluate the Pathogenic Potential of Yeast Cell and Filamentous Forms during <i>Candida albicans</i> Systemic Infection in Immunodeficient Mice	Stephen P. Saville, Anna L. Lazzell, Ashok K. Chaturvedi, Carlos Monteagudo, and Jose L. Lopez-Ribot	97–102

Highly Polymorphic Family of Glycosylphosphatidylinositol-Anchored Surface Antigens with Evidence of Developmental Regulation in <i>Toxoplasma gondii</i>	Angela M. Pollard, Krystal N. Onatolu, Luisa Hiller, Kasturi Haldar, and Laura J. Knoll	103–110
Essential Role of Chitinase in the Development of the Filarial Nematode <i>Acanthocheilonema viteae</i>	Babila Tachu, Smitha Pillai, Richard Lucius, and Thomas Pogonka	221–228
Preclinical Evaluation of the Safety and Immunogenicity of a Vaccine Consisting of <i>Plasmodium falciparum</i> Liver-Stage Antigen 1 with Adjuvant AS01B Administered Alone or Concurrently with the RTS,S/AS01B Vaccine in Rhesus Primates	S. Pichyangkul, U. Kum-Arb, K. Yongvanitchit, A. Limsalakpetch, M. Gettayacamin, D. E. Lanar, L. A. Ware, V. A. Stewart, D. G. Heppner, P. Mettens, J. D. Cohen, W. R. Ballou, and M. M. Fukuda	229–238
Autophagy during Proliferation and Encystation in the Protozoan Parasite <i>Entamoeba invadens</i>	Karina Picazarri, Kumiko Nakada-Tsukui, and Tomoyoshi Nozaki	278–288
Toll-Like Receptor 9-Dependent Macrophage Activation by <i>Entamoeba histolytica</i> DNA	Catherine P. A. Ivory, Michael Prystajecy, Christian Jobin, and Kris Chadee	289–297
Oral Vaccination with <i>Salmonella enterica</i> as a Cruzipain-DNA Delivery System Confers Protective Immunity against <i>Trypanosoma cruzi</i>	Silvia I. Cazorla, Pablo D. Becker, Fernanda M. Frank, Thomas Ebensen, María J. Sartori, Ricardo S. Corral, Emilio L. Malchiodi, and Carlos A. Guzmán	324–333
<i>Pneumocystis carinii</i> Exhibits a Conserved Meiotic Control Pathway	Joshua W. Burgess, Theodore J. Kottom, and Andrew H. Limper	417–425
Impairment of Infectivity and Immunoprotective Effect of a <i>LYTI</i> Null Mutant of <i>Trypanosoma cruzi</i>	M. Paola Zago, Alejandra B. Barrio, Rubén M. Cardozo, Tomás Duffy, Alejandro G. Schijman, and Miguel A. Basombrío	443–451
MICROBIAL IMMUNITY AND VACCINES		
Highly Attenuated <i>Bordetella pertussis</i> Strain BPZE1 as a Potential Live Vehicle for Delivery of Heterologous Vaccine Candidates	Si Ying Ho, Shi Qian Chua, Damian G. W. Foo, Camille Loch, Vincent T. Chow, Chit Laa Poh, and Sylvie Alonso	111–119
A DNA Fusion Vaccine Induces Bactericidal Antibodies to a Peptide Epitope from the PorA Porin of <i>Neisseria meningitidis</i>	Delin Zhu, Jeannette N. Williams, Jason Rice, Freda K. Stevenson, John E. Heckels, and Myron Christodoulides	334–338
Recombinant Holotoxoid Vaccine against Botulism	Christina L. Pier, William H. Tepp, Marite Bradshaw, Eric A. Johnson, Joseph T. Barbieri, and Michael R. Baldwin	437–442

Cover photograph (Copyright © 2008, American Society for Microbiology. All Rights Reserved.): Global changes in the proteome of cells infected with the protozoan parasite *Toxoplasma gondii* are profound, especially in host mitochondria. Shown is a human foreskin fibroblast infected with *T. gondii*, revealing a section through the apical end of the parasite. Among the organelles readily apparent in the parasite are the club-shaped rhoptries, the small ovoid micronemes, and the electron-dense secretory granule. The vacuolar membrane surrounding the parasite is associated intimately with a host mitochondrion and the endoplasmic reticulum. Additional mitochondrial profiles are evident in the host cytoplasm. Evidence from this study reveals significant changes in the proteome composition of the mitochondria in infected cells. Original magnification, $\times 14,000$. (Related paper is M. M. Nelson, A. R. Jones, J. C. Carmen, A. P. Sinai, R. Burchmore, and J. M. Wastling, [Epub ahead of print] doi:10.1128/LAI.01115-07.)
