

TABLE OF CONTENTS

SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors	475
--------------------------------------------------------------------------	-----

MINIREVIEW

An Inside Job: Hacking into Janus Kinase/Signal Transducer and Activator of Transcription Signaling Cascades by the Intracellular Protozoan <i>Toxoplasma gondii</i>	Eric Y. Denkers, David J. Bzik, Barbara A. Fox, and Barbara A. Butcher	476–482
-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------	---------

MOLECULAR PATHOGENESIS

OmpT Outer Membrane Proteases of Enterohemorrhagic and Enteropathogenic <i>Escherichia coli</i> Contribute Differently to the Degradation of Human LL-37	Jenny-Lee Thomassin, John R. Brannon, Bernard F. Gibbs, Samantha Gruenheid, and Hervé Le Moulal	483–492
-----------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------	---------

The Repeat-In-Toxin Family Member TosA Mediates Adherence of Uropathogenic <i>Escherichia coli</i> and Survival during Bacteremia	Patrick D. Vigil, Travis J. Wiles, Michael D. Engstrom, Lev Prasov, Matthew A. Mulvey, and Harry L. T. Mobley	493–505
------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------	---------

<i>Streptococcus suis</i> Capsular Polysaccharide Inhibits Phagocytosis through Destabilization of Lipid Microdomains and Prevents Lactosylceramide-Dependent Recognition	Mathieu Houde, Marcelo Gottschalk, Fleur Gagnon, Marie-Rose Van Calsteren, and Mariela Segura	506–517
----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------	---------

Effects of Amino Acid Supplementation on Porin Expression and ToxR Levels in <i>Vibrio cholerae</i>	Alexandra R. Mey, Stephanie A. Craig, and Shelley M. Payne	518–528
------------------------------------------------------------------------------------------------------------	------------------------------------------------------------	---------

Anthrax Edema Toxin Impairs Clearance in Mice	Inka Sastalla, Shixing Tang, Devorah Crown, Shihui Liu, Michael A. Eckhaus, Indira K. Hewlett, Stephen H. Leppla, and Mahtab Moayeri	529–538
------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------	---------

Use of Recombinase-Based <i>In Vivo</i> Expression Technology To Characterize <i>Enterococcus faecalis</i> Gene Expression during Infection Identifies <i>In Vivo</i>-Expressed Antisense RNAs and Implicates the Protease Eep in Pathogenesis	Kristi L. Frank, Aaron M. T. Barnes, Suzanne M. Grindle, Dawn A. Manias, Patrick M. Schlievert, and Gary M. Dunny	539–549
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------	---------

VimA-Dependent Modulation of Acetyl Coenzyme A Levels and Lipid A Biosynthesis Can Alter Virulence in <i>Porphyromonas gingivalis</i>	A. Wilson Aruni, J. Lee, D. Osbourne, Y. Dou, F. Roy, A. Muthiah, D. S. Boskovic, and H. M. Fletcher	550–564
----------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------	---------

The <i>Neisseria meningitidis</i> ZnuD Zinc Receptor Contributes to Interactions with Epithelial Cells and Supports Heme Utilization when Expressed in <i>Escherichia coli</i>	Pradeep Kumar, Soma Sannigrahi, and Yih-Ling Tzeng	657–667
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------	---------

Sialylation of Lipooligosaccharides Is Dispensable for the Virulence of <i>Haemophilus ducreyi</i> in Humans	Stanley M. Spinola, Wei Li, Kate R. Fortney, Diane M. Janowicz, Beth Zwickl, Barry P. Katz, and Robert S. Munson, Jr.	679–687
---------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------	---------

Enterohemorrhagic <i>Escherichia coli</i> Virulence Regulation by Two Bacterial Adrenergic Kinases, QseC and QseE	Jacqueline Njoroge and Vanessa Sperandio	688–703
--------------------------------------------------------------------------------------------------------------------------	------------------------------------------	---------

Infection of Mice by <i>Salmonella enterica</i> Serovar Enteritidis Involves Additional Genes That Are Absent in the Genome of Serovar Typhimurium	Cecilia A. Silva, Carlos J. Blondel, Carolina P. Quezada, Steffen Porwollik, Helene L. Andrews-Polymeris, Cecilia S. Toro, Mercedes Zaldivar, Inés Contreras, Michael McClelland, and Carlos A. Santiviago	839–849
-----------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------

Role of CD11b/CD18 in the Process of Intoxication by the Adenylate Cyclase Toxin of <i>Bordetella pertussis</i>	Joshua C. Eby, Mary C. Gray, Annabelle R. Mangan, Gina M. Donato, and Erik L. Hewlett	850–859
CELLULAR MICROBIOLOGY: PATHOGEN-HOST CELL MOLECULAR INTERACTIONS		
Small Intestinal Intraepithelial Lymphocytes Expressing CD8 and T Cell Receptor $\gamma\delta$ Are Involved in Bacterial Clearance during <i>Salmonella enterica</i> Serovar Typhimurium Infection	Zhiyuan Li, Cai Zhang, Zhixia Zhou, Jianhua Zhang, Jian Zhang, and Zhigang Tian	565–574
The Vsa Shield of <i>Mycoplasma pulmonis</i> Is Antiphagocytic	Brandon M. Shaw, Warren L. Simmons, and Kevin Dybvig	704–709
Free Lipid A Isolated from <i>Porphyromonas gingivalis</i> Lipopolysaccharide Is Contaminated with Phosphorylated Dihydroceramide Lipids: Recovery in Diseased Dental Samples	Frank C. Nichols, Bekim Bajrami, Robert B. Clark, William Housley, and Xudong Yao	860–874
BACTERIAL INFECTIONS		
Pathoadaptive Conditional Regulation of the Type VI Secretion System in <i>Vibrio cholerae</i> O1 Strains	Takahiko Ishikawa, Dharmesh Sabharwal, Jeanette Bröms, Debra L. Milton, Anders Sjöstedt, Bernt Eric Uhlin, and Sun Nyunt Wai	575–584
Critical Role of LuxS in the Virulence of <i>Campylobacter jejuni</i> in a Guinea Pig Model of Abortion	Paul Plummer, Orhan Sahin, Eric Burrough, Rachel Sippy, Kathy Mou, Jessica Rabenold, Mike Yaeger, and Qijing Zhang	585–593
<i>In Vivo</i> Expression of <i>Helicobacter pylori</i> Virulence Genes in Patients with Gastritis, Ulcer, and Gastric Cancer	Francisco Avilés-Jiménez, Adriana Reyes-Leon, Erik Nieto-Patlán, Lori M. Hansen, Juan Burgueño, Irma P. Ramos, Margarita Camorlinga-Ponce, Hector Bermúdez, Juan M. Blancas, Lourdes Cabrera, Rosa María Ribas-Aparicio, Jay V. Solnick, and Javier Torres-López	594–601
<i>Bacillus subtilis</i> -Mediated Protection from <i>Citrobacter rodentium</i> -Associated Enteric Disease Requires <i>espH</i> and Functional Flagella	Sara E. Jones and Katherine L. Knight	710–719
Oral Infection with Signature-Tagged <i>Listeria monocytogenes</i> Reveals Organ-Specific Growth and Dissemination Routes in Guinea Pigs	Jody A. Melton-Witt, Susanne M. Rafelski, Daniel A. Portnoy, and Anna I. Bakardjiev	720–732
Establishment of a Real-Time, Quantitative, and Reproducible Mouse Model of Staphylococcus Osteomyelitis Using Bioluminescence Imaging	Haruki Funao, Ken Ishii, Shigenori Nagai, Aya Sasaki, Tomoyuki Hoshikawa, Mamoru Aizawa, Yasunori Okada, Kazuhiro Chiba, Shigeo Koyasu, Yoshiaki Toyama, and Morio Matsumoto	733–741
Development and Evaluation of an Ovine Antibody-Based Platform for Treatment of <i>Clostridium difficile</i> Infection	April Roberts, Joanna McGlashan, Ibrahim Al-Abdulla, Roger Ling, Harriet Denton, Steve Green, Ruth Coxon, John Landon, and Clifford Shone	875–882
Pathogenic Potential of <i>Campylobacter ureolyticus</i>	Jose A. Burgos-Portugal, Nadeem O. Kaakoush, Mark J. Raftery, and Hazel M. Mitchell	883–890

HOST RESPONSE AND INFLAMMATION

- Hematopoietic Stem-Progenitor Cells Restore Immunoreactivity and Improve Survival in Late Sepsis** Laura Brudecki, Donald A. Ferguson, Deling Yin, Gene D. Lesage, Charles E. McCall, and Mohamed El Gazzar 602–611
- Effect of Inflammatory Response on *In Vivo* Competition between Two Chlamydial Variants in the Guinea Pig Model of Inclusion Conjunctivitis** Roger G. Rank, Anne K. Bowlin, Kati I. Tormanen, Yin Wang, and Anthony T. Maurelli 612–619
- Lsr2 Peptides of *Mycobacterium leprae* Show Hierarchical Responses in Lymphoproliferative Assays, with Selective Recognition by Patients with Anergic Lepromatous Leprosy** Mehervani Chaduvula, A. Murtaza, Namita Misra, N. P. Shankar Narayan, V. Ramesh, H. K. Prasad, Rajni Rani, R. K. Chinnadurai, and Indira Nath 742–752
- Distinct Compartmentalization of NF- κ B Activity in Crypt and Crypt-Denuded Lamina Propria Precedes and Accompanies Hyperplasia and/or Colitis following Bacterial Infection** Parthasarathy Chandrakesan, Ishfaq Ahmed, Anisha Chinthalapally, Pomila Singh, Shanjana Awasthi, Shrikant Anant, and Shahid Umar 753–767

FUNGAL AND PARASITIC INFECTIONS

- Synergistic Interaction between *Candida albicans* and Commensal Oral Streptococci in a Novel *In Vitro* Mucosal Model** Patricia I. Diaz, Zhihong Xie, Takanori Sobue, Angela Thompson, Basak Biyikoglu, Austin Ricker, Laertis Ikonomou, and Anna Dongari-Bagtzoglou 620–632
- Toxoplasma gondii* Triggers Release of Human and Mouse Neutrophil Extracellular Traps** Delbert S. Abi Abdallah, Changyou Lin, Carissa J. Ball, Michael R. King, Gerald E. Duhamel, and Eric Y. Denkers 768–777
- Toll-Like Receptor 9-Dependent Activation of Bone Marrow-Derived Dendritic Cells by *URA5* DNA from *Cryptococcus neoformans*** Misuzu Tanaka, Keiko Ishii, Yuri Nakamura, Akiko Miyazato, Atsuko Maki, Yuzuru Abe, Tomomitsu Miyasaka, Hideki Yamamoto, Yukiko Akahori, Misaki Fue, Yurie Takahashi, Emi Kanno, Ryoko Maruyama, and Kazuyoshi Kawakami 778–786

MICROBIAL IMMUNITY AND VACCINES

- Kinetics of Humoral and Memory B Cell Response Induced by the *Plasmodium falciparum* 19-Kilodalton Merozoite Surface Protein 1 in Mice** Mwanaidi Y. Kafuye-Mlwiolo, Paushali Mukherjee, and Virander S. Chauhan 633–642
- Enhanced Bacteremia in Human Factor H Transgenic Rats Infected by *Neisseria meningitidis*** David M. Vu, Jutamas Shaughnessy, Lisa A. Lewis, Sanjay Ram, Peter A. Rice, and Dan M. Granoff 643–650
- Poly-*N*-Acetyl- β -(1-6)-Glucosamine Is a Target for Protective Immunity against *Acinetobacter baumannii* Infections** Leticia V. Bentancor, Jennifer M. O'Malley, Cagla Bozkurt-Guzel, Gerald B. Pier, and Tomás Maira-Litrán 651–656
- Limited Model Antigen Expression by Transgenic Fungi Induces Disparate Fates during Differentiation of Adoptively Transferred T Cell Receptor Transgenic CD4⁺ T Cells: Robust Activation and Proliferation with Weak Effector Function during Recall** Marcel Wüthrich, Karen Ermland, John C. Pick-Jacobs, Benjamin H. Gern, Christopher A. Frye, Thomas D. Sullivan, Meghan B. Brennan, Hanna I. Filutowicz, Kevin O'Brien, Keegan D. Korthauer, Stacey Schultz-Cherry, and Bruce S. Klein 787–797
- Live Attenuated *Salmonella* Vaccines against *Mycobacterium tuberculosis* with Antigen Delivery via the Type III Secretion System** María Dolores Juárez-Rodríguez, Lourdes T. Arteaga-Cortés, Rebin Kader, Roy Curtiss III, and Josephine E. Clark-Curtiss 798–814

Live Attenuated *Salmonella* Vaccines Displaying Regulated Delayed Lysis and Delayed Antigen Synthesis To Confer Protection against *Mycobacterium tuberculosis*

María Dolores Juárez-Rodríguez, Jiseon Yang, Rebin Kader, Praveen Alamuri, Roy Curtiss III, and Josephine E. Clark-Curtiss 815–831

Monoclonal Antibodies Neutralize *Bacillus cereus* Nhe Enterotoxin by Inhibiting Ordered Binding of Its Three Exoprotein Components

Andrea Didier, Richard Dietrich, Stephanie Gruber, Stefanie Bock, Maximilian Moravek, Tadashi Nakamura, Toril Lindbäck, Per Einar Granum, and Erwin Märtilbauer 832–838

MOLECULAR GENOMICS

Comparison of Asymptomatic Bacteriuria *Escherichia coli* Isolates from Healthy Individuals versus Those from Hospital Patients Shows that Long-Term Bladder Colonization Selects for Attenuated Virulence Phenotypes

Ellaine Salvador, Florian Wagenlehner, Christian-Daniel Köhler, Alexander Mellmann, Jörg Hacker, Catharina Svanborg, and Ulrich Dobrindt 668–678
