SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors	2577
--	------

MOLECULAR PATHOGENESIS

The Intermediate Region of <i>Helicobacter pylori</i> VacA Is a Determinant of Toxin Potency in a Jurkat T Cell Assay	Christian González-Rivera, Holly M. Scott Algood, Jana N. Radin, Mark S. McClain, and Timothy L. Cover	2578–2588
Contribution of Urease to Colonization by Shiga Toxin-Producing <i>Escherichia coli</i>	Susan R. Steyert and James B. Kaper	2589–2600
YghG (GspS _β) Is a Novel Pilot Protein Required for Localization of the GspS _β Type II Secretion System Secretin of Enterotoxigenic <i>Escherichia coli</i>	Timothy G. Strozen, Gang Li, and S. Peter Howard	2608–2622
Role of the Vpe Carbohydrate Permease in <i>Escherichia coli</i> Urovirulence and Fitness <i>In Vivo</i>	Vanessa Martinez-Jéhanne, Christophe Pichon, Laurence du Merle, Olivier Poupel, Nadège Cayet, Christiane Bouchier, and Chantal Le Bouguéneec	2655–2666
Identification of Coli Surface Antigen 23, a Novel Adhesin of Enterotoxigenic <i>Escherichia coli</i>	Felipe Del Canto, Douglas J. Botkin, Patricio Valenzuela, Vsevolod Popov, Fernando Ruiz-Perez, James P. Nataro, Myron M. Levine, O. Colin Stine, Mihai Pop, Alfredo G. Torres, and Roberto Vidal	2791–2801
Decreased Expression of Type 1 Fimbriae by a <i>pst</i> Mutant of Uropathogenic <i>Escherichia coli</i> Reduces Urinary Tract Infection	Sébastien Crépin, Sébastien Houle, Marie-Ève Charbonneau, Michaël Mourez, Josée Harel, and Charles M. Dozois	2802–2815
O-Polysaccharide Glycosylation Is Required for Stability and Function of the Collagen Adhesin EmaA of <i>Aggregatibacter actinomycetemcomitans</i>	Gaoyan Tang, Teresa Ruiz, and Keith P. Mintz	2868–2877

CELLULAR MICROBIOLOGY: PATHOGEN-HOST CELL MOLECULAR INTERACTIONS

The Rickettsial OmpB β-Peptide of <i>Rickettsia conorii</i> Is Sufficient To Facilitate Factor H-Mediated Serum Resistance	Sean P. Riley, Jennifer L. Patterson, and Juan J. Martinez	2735–2743
Pneumococcal Interactions with Epithelial Cells Are Crucial for Optimal Biofilm Formation and Colonization <i>In Vitro</i> and <i>In Vivo</i>	Laura R. Marks, G. Iyer Parameswaran, and Anders P. Hakansson	2744–2760
Localization of <i>Aggregatibacter actinomycetemcomitans</i> Cytolethal Distending Toxin Subunits during Intoxication of Live Cells	Monika Damek-Poprawa, Jae Yeon Jang, Alla Volgina, Jonathan Korostoff, and Joseph M. DiRienzo	2761–2770
<i>Legionella pneumophila</i> Pathogenesis in the <i>Galleria mellonella</i> Infection Model	Clare R. Harding, Gunnar N. Schroeder, Stuart Reynolds, Artemis Kosta, James W. Collins, Aurélie Mousnier, and Gad Frankel	2780–2790
Staphylococcal Superantigen-Like Protein 3 Binds to the Toll-Like Receptor 2 Extracellular Domain and Inhibits Cytokine Production Induced by <i>Staphylococcus aureus</i> , Cell Wall Component, or Lipopeptides in Murine Macrophages	Ryosuke Yokoyama, Saotomo Itoh, Go Kamoshida, Takemasa Takii, Satoshi Fujii, Tsutomu Tsuji, and Kikuo Onozaki	2816–2825

Continued on following page

Identification of Signaling Pathways Mediating Cell Cycle Arrest and Apoptosis Induced by <i>Porphyromonas gingivalis</i> in Human Trophoblasts	Hiroaki Inaba, Masae Kuboniwa, Hideyuki Sugita, Richard J. Lamont, and Atsuo Amano	2847–2857
Role of Lipid Rafts and Flagellin in Invasion of Colonic Epithelial Cells by Shiga-Toxigenic <i>Escherichia coli</i> O113:H21	Trisha J. Rogers, Cheleste M. Thorpe, Adrienne W. Paton, and James C. Paton	2858–2867
Unique Biological Activity of the Botulinum D/C Mosaic Neurotoxin in Murine Species	Keiji Nakamura, Tomoko Kohda, Yuto Shibata, Kentaro Tsukamoto, Hideyuki Arimitsu, Mitsunori Hayashi, Masafumi Mukamoto, Nobuyuki Sasakawa, and Shunji Kozaki	2886–2893
The Hydrophilic Translocator for <i>Vibrio parahaemolyticus</i>, T3SS2, Is Also Translocated	Xiaohui Zhou, Jennifer M. Ritchie, Hirotaka Hiyoshi, Tetsuya Iida, Brigid M. Davis, Matthew K. Waldor, and Toshio Kodama	2940–2947
Implication of Antigenic Conversion of <i>Helicobacter pylori</i> Lipopolysaccharides That Involve Interaction with Surfactant Protein D	Shin-ichi Yokota, Ken-ichi Amano, Chiaki Nishitani, Shigeru Ariki, Yoshio Kuroki, and Nobuhiro Fujii	2956–2962
Enhanced Basophil Reactivities during Severe Malaria and Their Relationship with the <i>Plasmodium falciparum</i> Histamine-Releasing Factor Translationally Controlled Tumor Protein	Stéphane Pelleau, Sylvie Diop, Méry Dia Badiane, Joana Vitte, Pierre Beguin, Farida Nato, Bernard M. Diop, Pierre Bongrand, Daniel Parzy, and Ronan Jambou	2963–2970
BACTERIAL INFECTIONS		
Differential Contribution of <i>Bacillus anthracis</i> Toxins to Pathogenicity in Two Animal Models	Haim Levy, Shay Weiss, Zeev Altboum, Josef Schlomovitz, Itai Glinert, Assa Sittner, Avigdor Shafferman, and David Kobiler	2623–2631
The <i>Clostridium difficile</i> <i>spo0A</i> Gene Is a Persistence and Transmission Factor	Laura J. Deakin, Simon Clare, Robert P. Fagan, Lisa F. Dawson, Derek J. Pickard, Michael R. West, Brendan W. Wren, Neil F. Fairweather, Gordon Dougan, and Trevor D. Lawley	2704–2711
Comparative Analysis of the Interaction of <i>Helicobacter pylori</i> with Human Dendritic Cells, Macrophages, and Monocytes	Michael Fehlings, Lea Drobbe, Verena Moos, Pablo Renner Viveros, Jana Hagen, Macarena Beigier-Bompadre, Ervinna Pang, Elena Belogolova, Yuri Churin, Thomas Schneider, Thomas F. Meyer, Toni Aebischer, and Ralf Ignatius	2724–2734
Urease Activity Represents an Alternative Pathway for <i>Mycobacterium tuberculosis</i> Nitrogen Metabolism	Wenwei Lin, Vanessa Mathys, Emily Lei Yin Ang, Vanessa Hui Qi Koh, Julia María Martínez Gómez, Michelle Lay Teng Ang, Siti Zarina Zainul Rahim, Mai Ping Tan, Kevin Pethe, and Sylvie Alonso	2771–2779
Distinguishing the Contribution of Type 1 Pili from That of Other QseB-Misregulated Factors when QseC Is Absent during Urinary Tract Infection	Maria Kostakioti, Maria Hadjifrangiskou, Corinne K. Cusumano, Thomas J. Hannan, James W. Janetka, and Scott J. Hultgren	2826–2834
<i>Edwardsiella tarda</i> Eta1, an <i>In Vivo</i>-Induced Antigen That Is Involved in Host Infection	Yun Sun, Wen-Jiang Zheng, Yong-Hua Hu, Bo-Guang Sun, and Li Sun	2948–2955

HOST RESPONSE AND INFLAMMATION

- Interactions between Polymorphonuclear Leukocytes and *Pseudomonas aeruginosa* Biofilms on Silicone Implants *In Vivo***
Maria van Gennip, Louise Dahl Christensen, Morten Alhede, Klaus Qvortrup, Peter Østrup Jensen, Niels Høiby, Michael Givskov, and Thomas Bjarnsholt 2601–2607
- Intestinal Epithelial Cells Modulate Antigen-Presenting Cell Responses to Bacterial DNA**
J. L. Campeau, S. Y. Salim, E. J. Albert, N. Hotte, and K. L. Madsen 2632–2644
- Role of Mouse Peptidoglycan Recognition Protein PGLYRP2 in the Innate Immune Response to *Salmonella enterica* Serovar Typhimurium Infection *In Vivo***
Joeeun Lee, Kaoru Geddes, Catherine Streutker, Dana J. Philpott, and Stephen E. Girardin 2645–2654
- The Sphingosine-1-Phosphate Analogue FTY720 Impairs Mucosal Immunity and Clearance of the Enteric Pathogen *Citrobacter rodentium***
Carola T. Murphy, Lindsay J. Hall, Grainne Hurley, Aoife Quinlan, John MacSharry, Fergus Shanahan, Kenneth Nally, and Silvia Melgar 2712–2723
- Roles of Inflammatory Caspases during Processing of Zebrafish Interleukin-1 β in *Francisella noatunensis* Infection**
Lucia N. Vojtech, Nicole Scharping, James C. Woodson, and John D. Hansen 2878–2885
- Immune-Activating Properties of Panton-Valentine Leukocidin Improve the Outcome in a Model of Methicillin-Resistant *Staphylococcus aureus* Pneumonia**
Pauline Yoong and Gerald B. Pier 2894–2904
- Neutrophils Are Essential for Containment of *Vibrio cholerae* to the Intestine during the Proinflammatory Phase of Infection**
Jessica Queen and Karla J. Fullner Satchell 2905–2913
- Campylobacter jejuni*-Mediated Induction of CC and CXC Chemokines and Chemokine Receptors in Human Dendritic Cells**
Lan Hu, Mechelle D. Bray, Yansheng Geng, and Dennis J. Kopecko 2929–2939

FUNGAL AND PARASITIC INFECTIONS

- Alveolar Macrophages in Neonatal Mice Are Inherently Unresponsive to *Pneumocystis murina* Infection**
Cathryn Kurkjian, Melissa Hollifield, J. Louise Lines, Amy Rogosky, Kerry M. Empey, Mahboob Qureshi, Stephen A. Brown, and Beth A. Garvy 2835–2846
- Fine Specificity of *Plasmodium vivax* Duffy Binding Protein Binding Engagement of the Duffy Antigen on Human Erythrocytes**
Asim A. Siddiqui, Jia Xainli, Jesse Schloegel, Lenore Carias, Francis Ntumngia, Menachem Shoham, Joanne L. Casey, Michael Foley, John H. Adams, and Christopher L. King 2920–2928

MICROBIAL IMMUNITY AND VACCINES

- Design of Meningococcal Factor H Binding Protein Mutant Vaccines That Do Not Bind Human Complement Factor H**
Rolando Pajon, Peter T. Beernink, and Dan M. Granoff 2667–2677
- A Chimeric Toxin Vaccine Protects against Primary and Recurrent *Clostridium difficile* Infection**
Haiying Wang, Xingmin Sun, Yongrong Zhang, Shan Li, Kevin Chen, Lianfa Shi, Weijia Nie, Raj Kumar, Saul Tzipori, Jufang Wang, Tor Savidge, and Hanping Feng 2678–2688
- Fur-Regulated Iron Uptake System of *Edwardsiella ictaluri* and Its Influence on Pathogenesis and Immunogenicity in the Catfish Host**
Javier Santander, Greg Golden, Soo-Young Wanda, and Roy Curtiss III 2689–2703
- Antiphagocytic Function of an IgG Glycosyl Hydrolase from *Streptococcus equi* subsp. *equi* and Its Use as a Vaccine Component**
Margareta Flock, Lars Frykberg, Markus Sköld, Bengt Guss, and Jan-Ingmar Flock 2914–2919

LETTERS TO THE EDITOR

***dupA*₁ Is Associated with Duodenal Ulcer and High Interleukin-8 Secretion from the Gastric Mucosa**

Nawfal R. Hussein, Shahlaa M. Abdullah, Azad M. Salih, and Mahde A. Assafi 2971–2972

Reply to “*dupA*₁ Is Associated with Duodenal Ulcer and High Interleukin-8 Secretion from the Gastric Mucosa”

Seiji Shiota, David Y. Graham, and Yoshio Yamaoka 2973

ERRATUM

Two DHH Subfamily 1 Proteins Contribute to Pneumococcal Virulence and Confer Protection against Pneumococcal Disease

L. E. Cron, K. Stol, P. Burghout, S. van Selm, E. R. Simonetti, H. J. Bootsma, and P. W. M. Hermans 2974
