

## TABLE OF CONTENTS

### SPOTLIGHT

|  |     |
|--|-----|
| Articles of Significant Interest Selected from This Issue by the Editors | 391 |
|--|-----|

### MINIREVIEW

|   |                                   |         |
|---|-----------------------------------|---------|
| Microbial Modulation of Host Immunity with the Small Molecule Phosphorylcholine | Sarah E. Clark, Jeffrey N. Weiser | 392–401 |
|---|-----------------------------------|---------|

### MOLECULAR PATHOGENESIS

|   |  |         |
|---|--|---------|
| Interplay between Manganese and Iron in Pneumococcal Pathogenesis: Role of the Orphan Response Regulator RitR | Cheryl-Lynn Y. Ong, Adam J. Potter, Claudia Trappetti, Mark J. Walker, Michael P. Jennings, James C. Paton, Alastair G. McEwan | 421–429 |
|---|--|---------|

|   |  |         |
|---|--|---------|
| EptC of <i>Campylobacter jejuni</i> Mediates Phenotypes Involved in Host Interactions and Virulence | Thomas W. Cullen, John P. O'Brien, David R. Hendrixson, David K. Giles, Rhonda I. Hobb, Stuart A. Thompson, Jennifer S. Brodbelt, M. Stephen Trent | 430–440 |
|---|--|---------|

|   |  |         |
|---|--|---------|
| Intracellularly Induced Cyclophilins Play an Important Role in Stress Adaptation and Virulence of <i>Brucella abortus</i> | Mara S. Roset, Lucía García Fernández, Vito G. DelVecchio, Gabriel Briones | 521–530 |
|---|--|---------|

|   |   |         |
|---|---|---------|
| Novel Cholix Toxin Variants, ADP-Ribosylating Toxins in <i>Vibrio cholerae</i> Non-O1/Non-O139 Strains, and Their Pathogenicity | Sharda Prasad Awasthi, Masahiro Asakura, Nityananda Chowdhury, Sucharit Basu Neogi, Atsushi Hinenoya, Hossain M. Golbar, Jyoji Yamate, Eiji Arakawa, Toshiji Tada, T. Ramamurthy, Shinji Yamasaki | 531–541 |
|---|---|---------|

|  |   |         |
|--|---|---------|
| Carbon Storage Regulator A Contributes to the Virulence of <i>Haemophilus ducreyi</i> in Humans by Multiple Mechanisms | Dharanesh Gangaiah, Wei Li, Kate R. Fortney, Diane M. Janowicz, Sheila Ellinger, Beth Zwickl, Barry P. Katz, Stanley M. Spinola | 608–617 |
|--|---|---------|

### CELLULAR MICROBIOLOGY: PATHOGEN-HOST CELL MOLECULAR INTERACTIONS

|  |   |         |
|--|---|---------|
| TRIF Mediates Toll-Like Receptor 2-Dependent Inflammatory Responses to <i>Borrelia burgdorferi</i> | Tanja Petnicki-Ocwieja, Erin Chung, David I. Acosta, Laurie T. Ramos, Ok S. Shin, Sanjukta Ghosh, Lester Kobzik, Xin Li, Linden T. Hu | 402–410 |
|--|---|---------|

|   |   |         |
|---|---|---------|
| Association with Soil Bacteria Enhances p38-Dependent Infection Resistance in <i>Caenorhabditis elegans</i> | Sirena Montalvo-Katz, Hao Huang, Michael David Appel, Maureen Berg, Michael Shapira | 514–520 |
|---|---|---------|

|  |   |         |
|--|---|---------|
| Active Escape of <i>Orientia tsutsugamushi</i> from Cellular Autophagy | Youngho Ko, Ji-Hye Choi, Na-Young Ha, Ik-Sang Kim, Nam-Hyuk Cho, Myung-Sik Choi | 552–559 |
|--|---|---------|

|   |   |         |
|---|---|---------|
| Bruton's Tyrosine Kinase Regulates <i>Shigella flexneri</i> Dissemination in HT-29 Intestinal Cells | Ana-Maria Dragoi, Arthur M. Talman, Hervé Agaisse | 598–607 |
|---|---|---------|

### BACTERIAL INFECTIONS

|  |  |         |
|--|--|---------|
| Tannic Acid Inhibits <i>Staphylococcus aureus</i> Surface Colonization in an IsaA-Dependent Manner | David E. Payne, Nicholas R. Martin, Katherine R. Parzych, Alex H. Rickard, Adam Underwood, Blaise R. Boles | 496–504 |
|--|--|---------|

|   |   |         |
|---|---|---------|
| <b>Site of Isolation Determines Biofilm Formation and Virulence Phenotypes of <i>Streptococcus pneumoniae</i> Serotype 3 Clinical Isolates</b>  | Claudia Trappetti, Erika van der Maten, Zarina Amin, Adam J. Potter, Austen Y. Chen, Paula M. van Mourik, Andrew J. Lawrence, Adrienne W. Paton, James C. Paton   | 505–513 |
| <b>Genetic Determinants of Intrinsic Colistin Tolerance in <i>Acinetobacter baumannii</i></b>   | M. Indriati Hood, Kyle W. Becker, Christelle M. Roux, Paul M. Dunman, Eric P. Skaar   | 542–551 |
| <b><i>Helicobacter pylori</i> Stores Nickel To Aid Its Host Colonization</b>  | Stéphane L. Benoit, Erica F. Miller, Robert J. Maier  | 580–584 |
| <b>HOST RESPONSE AND INFLAMMATION</b>   |   |         |
| <b>M-Ficolin Binds Selectively to the Capsular Polysaccharides of <i>Streptococcus pneumoniae</i> Serotypes 19B and 19C and of a <i>Streptococcus mitis</i> Strain</b>  | Troels R. Kjaer, Annette G. Hansen, Uffe B. S. Sørensen, Anne T. Holm, Grith L. Sørensen, Jens C. Jensenius, Steffen Thiel  | 452–459 |
| <b>Natural Killer Cells Protect against Mucosal and Systemic Infection with the Enteric Pathogen <i>Citrobacter rodentium</i></b>   | Lindsay J. Hall, Carola T. Murphy, Grainne Hurley, Aoife Quinlan, Fergus Shanahan, Kenneth Nally, Silvia Melgar   | 460–469 |
| <b>Impaired Early Cytokine Responses at the Site of Infection in a Murine Model of Type 2 Diabetes and Melioidosis Comorbidity</b>  | Kelly A. Hodgson, Brenda L. Govan, Anna K. Walduck, Natkunam Ketheesan, Jodie L. Morris   | 470–477 |
| <b>Epithelial Cells Augment Barrier Function via Activation of the Toll-Like Receptor 2/Phosphatidylinositol 3-Kinase Pathway upon Recognition of <i>Salmonella enterica</i> Serovar Typhimurium Curli Fibrils in the Gut</b> | Gertrude O. Oppong, Glenn J. Rapsinski, Tiffany N. Newman, Jessalyn H. Nishimori, Steven G. Biesecker, Çağla Tükel  | 478–486 |
| <b>Activation of the Nlrp1b Inflammasome by Reduction of Cytosolic ATP</b>  | Kuo-Chieh Liao, Jeremy Mogridge   | 570–579 |
| <b>FUNGAL AND PARASITIC INFECTIONS</b>  |   |         |
| <b>The 3-Hydroxy-Methylglutaryl Coenzyme A Lyase <i>HCLI</i> Is Required for Macrophage Colonization by Human Fungal Pathogen <i>Histoplasma capsulatum</i></b>   | Dervla T. Isaac, Alison Coady, Nancy Van Prooyen, Anita Sil   | 411–420 |
| <b>Multilaboratory Approach to Preclinical Evaluation of Vaccine Immunogens for Placental Malaria</b>   | Michal Fried, Marion Avril, Richa Chaturvedi, Pablo Fernandez, Joseph Lograsso, David Narum, Morten A. Nielsen, Andrew V. Oleinikov, Mafalda Resende, Ali Salanti, Tracy Saveria, Kathryn Williamson, Alassane Dicko, Artur Scherf, Joseph D. Smith, Thor G. Theander, Patrick E. Duffy | 487–495 |
| <b>MICROBIAL IMMUNITY AND VACCINES</b>  |   |         |
| <b>Identification of a Potent Combination of Key <i>Plasmodium falciparum</i> Merozoite Antigens That Elicit Strain-Transcending Parasite-Neutralizing Antibodies</b>   | Alok K. Pandey, K. Sony Reddy, Tajali Sahar, Sonal Gupta, Hina Singh, E. Jyotheeswara Reddy, Mohd Asad, Faiza A. Siddiqui, Pankaj Gupta, Bijender Singh, Kunal R. More, Asif Mohammed, Chetan E. Chitnis, Virander S. Chauhan, Deepak Gaur  | 441–451 |

**Transcriptional Regulation of the *nadA* Gene in *Neisseria meningitidis* Impacts the Prediction of Coverage of a Multicomponent Meningococcal Serogroup B Vaccine**

Luca Fagnocchi, Alessia Biolchi, 560–569  
 Francesca Ferlicca, Giuseppe  
 Boccadifuoco, Brunella Brunelli,  
 Sébastien Brier, Nathalie Norais,  
 Emiliano Chiarot, Giuliano Bensi, J.  
 Simon Kroll, Mariagrazia Pizza, John  
 Donnelly, Marzia Monica Giuliani,  
 Isabel Delany

**Interleukin-6 Is Essential for Primary Resistance to *Francisella tularensis* Live Vaccine Strain Infection**

Sherry L. Kurtz, Oded Foreman, 585–597  
 Catharine M. Bosio, Miriam R. Anver,  
 Karen L. Elkins

**AUTHOR'S CORRECTION**

**Mannose-Capped Lipoarabinomannan from *Mycobacterium tuberculosis* Induces Soluble Tumor Necrosis Factor Receptor Production through Tumor Necrosis Factor Alpha-Converting Enzyme Activation**

Jillian M. Richmond, Elizabeth R. 618  
 Duffy, Jinhee Lee, Kavon Kaboli, Yun  
 Seong Kim, Daniel G. Remick, Hardy  
 Kornfeld, William W. Cruikshank

**RETRACTION**

***yadBC* of *Yersinia pestis*, a New Virulence Determinant for Bubonic Plague**

Stanislav Forman, Christine R. Wulff, 619  
 Tanya Myers-Morales, Clarissa Cowan,  
 Robert D. Perry, Susan C. Straley

*Cover photograph* (Copyright © 2013, American Society for Microbiology.): The role of natural killer (NK) cells during enteric infection was determined using C57BL/6 mice treated with anti-asialo GM1 (to deplete NK cells) or control IgG every 3 or 4 days. These mice were then infected with *lux*-tagged (i.e., light-producing) *Citrobacter rodentium* (the murine pathogen related to human diarrheagenic *Escherichia coli*). On day 7 postinfection, *in vivo* whole-body bioluminescent images were captured and displayed as pseudocolor images (IgG control [left]; NK cell depleted [right]). Red represents the most-intense light emission, while blue corresponds to the weakest signal. Images were processed using LivingImage software 2.50 and falsely colored using GIMP 2 software. (See related article on p. 460)
