

TABLE OF CONTENTS

SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors	391
--	-----

MINIREVIEW

Microbial Modulation of Host Immunity with the Small Molecule Phosphorylcholine	Sarah E. Clark, Jeffrey N. Weiser	392–401
---	-----------------------------------	---------

MOLECULAR PATHOGENESIS

Interplay between Manganese and Iron in Pneumococcal Pathogenesis: Role of the Orphan Response Regulator RitR	Cheryl-Lynn Y. Ong, Adam J. Potter, Claudia Trappetti, Mark J. Walker, Michael P. Jennings, James C. Paton, Alastair G. McEwan	421–429
---	--	---------

EptC of <i>Campylobacter jejuni</i> Mediates Phenotypes Involved in Host Interactions and Virulence	Thomas W. Cullen, John P. O'Brien, David R. Hendrixson, David K. Giles, Rhonda I. Hobb, Stuart A. Thompson, Jennifer S. Brodbelt, M. Stephen Trent	430–440
---	--	---------

Intracellularly Induced Cyclophilins Play an Important Role in Stress Adaptation and Virulence of <i>Brucella abortus</i>	Mara S. Roset, Lucía García Fernández, Vito G. DelVecchio, Gabriel Briones	521–530
---	--	---------

Novel Cholix Toxin Variants, ADP-Ribosylating Toxins in <i>Vibrio cholerae</i> Non-O1/Non-O139 Strains, and Their Pathogenicity	Sharda Prasad Awasthi, Masahiro Asakura, Nityananda Chowdhury, Sucharit Basu Neogi, Atsushi Hinenoya, Hossain M. Golbar, Jyoji Yamate, Eiji Arakawa, Toshiji Tada, T. Ramamurthy, Shinji Yamasaki	531–541
---	---	---------

Carbon Storage Regulator A Contributes to the Virulence of <i>Haemophilus ducreyi</i> in Humans by Multiple Mechanisms	Dharanesh Gangaiah, Wei Li, Kate R. Fortney, Diane M. Janowicz, Sheila Ellinger, Beth Zwickl, Barry P. Katz, Stanley M. Spinola	608–617
--	---	---------

CELLULAR MICROBIOLOGY: PATHOGEN-HOST CELL MOLECULAR INTERACTIONS

TRIF Mediates Toll-Like Receptor 2-Dependent Inflammatory Responses to <i>Borrelia burgdorferi</i>	Tanja Petnicki-Ocwieja, Erin Chung, David I. Acosta, Laurie T. Ramos, Ok S. Shin, Sanjukta Ghosh, Lester Kobzik, Xin Li, Linden T. Hu	402–410
--	---	---------

Association with Soil Bacteria Enhances p38-Dependent Infection Resistance in <i>Caenorhabditis elegans</i>	Sirena Montalvo-Katz, Hao Huang, Michael David Appel, Maureen Berg, Michael Shapira	514–520
---	---	---------

Active Escape of <i>Orientia tsutsugamushi</i> from Cellular Autophagy	Youngho Ko, Ji-Hye Choi, Na-Young Ha, Ik-Sang Kim, Nam-Hyuk Cho, Myung-Sik Choi	552–559
--	---	---------

Bruton's Tyrosine Kinase Regulates <i>Shigella flexneri</i> Dissemination in HT-29 Intestinal Cells	Ana-Maria Dragoi, Arthur M. Talman, Hervé Agaisse	598–607
---	---	---------

BACTERIAL INFECTIONS

Tannic Acid Inhibits <i>Staphylococcus aureus</i> Surface Colonization in an IsaA-Dependent Manner	David E. Payne, Nicholas R. Martin, Katherine R. Parzych, Alex H. Rickard, Adam Underwood, Blaise R. Boles	496–504
--	--	---------

Site of Isolation Determines Biofilm Formation and Virulence Phenotypes of <i>Streptococcus pneumoniae</i> Serotype 3 Clinical Isolates	Claudia Trappetti, Erika van der Maten, Zarina Amin, Adam J. Potter, Austen Y. Chen, Paula M. van Mourik, Andrew J. Lawrence, Adrienne W. Paton, James C. Paton	505–513
Genetic Determinants of Intrinsic Colistin Tolerance in <i>Acinetobacter baumannii</i>	M. Indriati Hood, Kyle W. Becker, Christelle M. Roux, Paul M. Dunman, Eric P. Skaar	542–551
<i>Helicobacter pylori</i> Stores Nickel To Aid Its Host Colonization	Stéphane L. Benoit, Erica F. Miller, Robert J. Maier	580–584
HOST RESPONSE AND INFLAMMATION		
M-Ficolin Binds Selectively to the Capsular Polysaccharides of <i>Streptococcus pneumoniae</i> Serotypes 19B and 19C and of a <i>Streptococcus mitis</i> Strain	Troels R. Kjaer, Annette G. Hansen, Uffe B. S. Sørensen, Anne T. Holm, Grith L. Sørensen, Jens C. Jensenius, Steffen Thiel	452–459
Natural Killer Cells Protect against Mucosal and Systemic Infection with the Enteric Pathogen <i>Citrobacter rodentium</i>	Lindsay J. Hall, Carola T. Murphy, Grainne Hurley, Aoife Quinlan, Fergus Shanahan, Kenneth Nally, Silvia Melgar	460–469
Impaired Early Cytokine Responses at the Site of Infection in a Murine Model of Type 2 Diabetes and Melioidosis Comorbidity	Kelly A. Hodgson, Brenda L. Govan, Anna K. Walduck, Natkunam Ketheesan, Jodie L. Morris	470–477
Epithelial Cells Augment Barrier Function via Activation of the Toll-Like Receptor 2/Phosphatidylinositol 3-Kinase Pathway upon Recognition of <i>Salmonella enterica</i> Serovar Typhimurium Curli Fibrils in the Gut	Gertrude O. Oppong, Glenn J. Rapsinski, Tiffany N. Newman, Jessalyn H. Nishimori, Steven G. Biesecker, Çağla Tükel	478–486
Activation of the Nlrp1b Inflammasome by Reduction of Cytosolic ATP	Kuo-Chieh Liao, Jeremy Mogridge	570–579
FUNGAL AND PARASITIC INFECTIONS		
The 3-Hydroxy-Methylglutaryl Coenzyme A Lyase <i>HCLI</i> Is Required for Macrophage Colonization by Human Fungal Pathogen <i>Histoplasma capsulatum</i>	Dervla T. Isaac, Alison Coady, Nancy Van Prooyen, Anita Sil	411–420
Multilaboratory Approach to Preclinical Evaluation of Vaccine Immunogens for Placental Malaria	Michal Fried, Marion Avril, Richa Chaturvedi, Pablo Fernandez, Joseph Lograsso, David Narum, Morten A. Nielsen, Andrew V. Oleinikov, Mafalda Resende, Ali Salanti, Tracy Saveria, Kathryn Williamson, Alassane Dicko, Artur Scherf, Joseph D. Smith, Thor G. Theander, Patrick E. Duffy	487–495
MICROBIAL IMMUNITY AND VACCINES		
Identification of a Potent Combination of Key <i>Plasmodium falciparum</i> Merozoite Antigens That Elicit Strain-Transcending Parasite-Neutralizing Antibodies	Alok K. Pandey, K. Sony Reddy, Tajali Sahar, Sonal Gupta, Hina Singh, E. Jyotheeswara Reddy, Mohd Asad, Faiza A. Siddiqui, Pankaj Gupta, Bijender Singh, Kunal R. More, Asif Mohammed, Chetan E. Chitnis, Virander S. Chauhan, Deepak Gaur	441–451

Transcriptional Regulation of the *nadA* Gene in *Neisseria meningitidis* Impacts the Prediction of Coverage of a Multicomponent Meningococcal Serogroup B Vaccine

Luca Fagnocchi, Alessia Biolchi, 560–569
 Francesca Ferlicca, Giuseppe
 Boccadifuoco, Brunella Brunelli,
 Sébastien Brier, Nathalie Norais,
 Emiliano Chiarot, Giuliano Bensi, J.
 Simon Kroll, Mariagrazia Pizza, John
 Donnelly, Marzia Monica Giuliani,
 Isabel Delany

Interleukin-6 Is Essential for Primary Resistance to *Francisella tularensis* Live Vaccine Strain Infection

Sherry L. Kurtz, Oded Foreman, 585–597
 Catharine M. Bosio, Miriam R. Anver,
 Karen L. Elkins

AUTHOR'S CORRECTION

Mannose-Capped Lipoarabinomannan from *Mycobacterium tuberculosis* Induces Soluble Tumor Necrosis Factor Receptor Production through Tumor Necrosis Factor Alpha-Converting Enzyme Activation

Jillian M. Richmond, Elizabeth R. 618
 Duffy, Jinhee Lee, Kavon Kaboli, Yun
 Seong Kim, Daniel G. Remick, Hardy
 Kornfeld, William W. Cruikshank

RETRACTION

***yadBC* of *Yersinia pestis*, a New Virulence Determinant for Bubonic Plague**

Stanislav Forman, Christine R. Wulff, 619
 Tanya Myers-Morales, Clarissa Cowan,
 Robert D. Perry, Susan C. Straley

Cover photograph (Copyright © 2013, American Society for Microbiology.): The role of natural killer (NK) cells during enteric infection was determined using C57BL/6 mice treated with anti-asialo GM1 (to deplete NK cells) or control IgG every 3 or 4 days. These mice were then infected with *lux*-tagged (i.e., light-producing) *Citrobacter rodentium* (the murine pathogen related to human diarrheagenic *Escherichia coli*). On day 7 postinfection, *in vivo* whole-body bioluminescent images were captured and displayed as pseudocolor images (IgG control [left]; NK cell depleted [right]). Red represents the most-intense light emission, while blue corresponds to the weakest signal. Images were processed using LivingImage software 2.50 and falsely colored using GIMP 2 software. (See related article on p. 460)
