

## TABLE OF CONTENTS

### SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors	455
--	-----

### MINIREVIEW

Chemical Biology Applied to the Study of Bacterial Pathogens	Rebecca Anthouard, Victor J. DiRita	456–469
--	-------------------------------------	---------

### MOLECULAR PATHOGENESIS

Prolonged Growth of a Clinical <i>Staphylococcus aureus</i> Strain Selects for a Stable Small-Colony-Variant Cell Type	Long M. G. Bui, Peter Hoffmann, John D. Turnidge, Peter S. Zilm, Stephen P. Kidd	470–481
--	--	---------

Critical Roles of <i>Clostridium difficile</i> Toxin B Enzymatic Activities in Pathogenesis	Shan Li, Lianfa Shi, Zhiyong Yang, Yongrong Zhang, Gregorio Perez-Cordon, Tuxiong Huang, Jeremy Ramsey, Numan Oezguen, Tor C. Savidge, Hanping Feng	502–513
---	---	---------

Transcriptional Profiling of Human Epithelial Cells Infected with Plasmid-Bearing and Plasmid-Deficient <i>Chlamydia trachomatis</i>	Stephen F. Porcella, John H. Carlson, Daniel E. Sturdevant, Gail L. Sturdevant, Kishore Kanakabandi, Kimmo Virtaneva, Hannah Wilder, William M. Whitmire, Lihua Song, Harlan D. Caldwell	534–543
--	--	---------

Role of Anaerobiosis in Capsule Production and Biofilm Formation in <i>Vibrio vulnificus</i>	Britney L. Phippen, James D. Oliver	551–559
--	-------------------------------------	---------

Pleiotropic Effects of Cell Wall Amidase LytA on <i>Streptococcus pneumoniae</i> Sensitivity to the Host Immune Response	Elisa Ramos-Sevillano, Ana Urzainqui, Susana Campuzano, Miriam Moscoso, Fernando González-Camacho, Mirian Domenech, Santiago Rodríguez de Córdoba, Francisco Sánchez-Madrid, Jeremy S. Brown, Ernesto García, Jose Yuste	591–603
--	--	---------

Clinical Implications of Oral Candidiasis: Host Tissue Damage and Disseminated Bacterial Disease	Eric F. Kong, Sona Kuchariková, Patrick Van Dijck, Brian M. Peters, Mark E. Shirtliff, Mary Ann Jabra-Rizk	604–613
--	--	---------

Impact of the <i>glpQ2</i> Gene on Virulence in a <i>Streptococcus pneumoniae</i> Serotype 19A Sequence Type 320 Strain	Yi-Ping Chuang, Zih-Rong Peng, Shun-Fu Tseng, Yu-Chun Lin, Huey-Kang Sytwu, Yu-Chia Hsieh	682–692
---	---	---------

<i>Mycobacterium abscessus</i> Phospholipase C Expression Is Induced during Coculture within Amoebae and Enhances <i>M. abscessus</i> Virulence in Mice	Jean Claude Bakala N’Goma, Vincent Le Moigne, Nathalie Soismier, Laura Laencina, Fabien Le Chevalier, Anne-Laure Roux, Isabelle Poncin, Carole Serveau-Avesque, Martin Rottman, Jean-Louis Gaillard, Gilles Etienne, Roland Brosch, Jean-Louis Herrmann, Stéphane Canaan, Fabienne Girard-Misguich	780–791
---	--	---------

## CELLULAR MICROBIOLOGY: PATHOGEN-HOST CELL MOLECULAR INTERACTIONS

**An Inducible and Secreted Eukaryote-Like Serine/Threonine Kinase of *Salmonella enterica* Serovar Typhi Promotes Intracellular Survival and Pathogenesis**

Nagaraja Theeya, Atri Ta, Sayan Das, Rahul S. Mandal, Oishee Chakrabarti, Saikat Chakrabarti, Amar N. Ghosh, Santasabuj Das 522–533

**The Environment of “*Mycobacterium avium* subsp. *hominissuis*” Microaggregates Induces Synthesis of Small Proteins Associated with Efficient Infection of Respiratory Epithelial Cells**

Lmar Babrak, Lia Danelishvili, Sasha J. Rose, Tiffany Kornberg, Luiz E. Bermudez 625–636

***Coxiella burnetii* Effector Proteins That Localize to the Parasitophorous Vacuole Membrane Promote Intracellular Replication**

Charles L. Larson, Paul A. Beare, Daniel E. Voth, Dale Howe, Diane C. Cockrell, Robert J. Bastidas, Raphael H. Valdivia, Robert A. Heinzen 661–670

**The Tyrosine Kinase BceF and the Phosphotyrosine Phosphatase BceD of *Burkholderia contaminans* Are Required for Efficient Invasion and Epithelial Disruption of a Cystic Fibrosis Lung Epithelial Cell Line**

Ana S. Ferreira, Inês N. Silva, Fábio Fernandes, Ruth Pilkington, Máire Callaghan, Siobhán McClean, Leonilde M. Moreira 812–821

**Transcriptomic and Proteomic Analyses Reveal Key Innate Immune Signatures in the Host Response to the Gastrointestinal Pathogen *Campylobacter concisus***

Nadeem O. Kaakoush, Nandan P. Deshpande, Si Ming Man, Jose A. Burgos-Portugal, Faisal A. Khattak, Mark J. Raftery, Marc R. Wilkins, Hazel M. Mitchell 832–845

## BACTERIAL INFECTIONS

**Role of Dendritic Cells in the Pathogenesis of Whipple’s Disease**

Katina Schinnerling, Anika Geelhaar-Karsch, Kristina Allers, Julian Friebe, Kristina Conrad, Christoph Loddenkemper, Anja A. Kühl, Ulrike Erben, Ralf Ignatius, Verena Moos, Thomas Schneider 482–491

**Dietary Polyunsaturated Fatty Acids Increase Survival and Decrease Bacterial Load during Septic *Staphylococcus aureus* Infection and Improve Neutrophil Function in Mice**

Sara L. Svahn, Louise Grahnemo, Vilborg Pálsdóttir, Intawat Nookaew, Karl Wendt, Britt Gabriellsson, Erik Schéle, Anna Benrick, Niklas Andersson, Staffan Nilsson, Maria E. Johansson, John-Olov Jansson 514–521

***bis*-Molybdopterin Guanine Dinucleotide Is Required for Persistence of *Mycobacterium tuberculosis* in Guinea Pigs**

Monique J. Williams, Crystal A. Shanley, Andrew Zilavy, Blas Peixoto, Claudia Manca, Gilla Kaplan, Ian M. Orme, Valerie Mizrahi, Bavesh D. Kana 544–550

***Edwardsiella tarda* MliC, a Lysozyme Inhibitor That Participates in Pathogenesis in a Manner That Parallels Ivy**

Mo-Fei Li, Chong Wang, Li Sun 583–590

***Klebsiella pneumoniae* Translocates across the Intestinal Epithelium via Rho GTPase- and Phosphatidylinositol 3-Kinase/Akt-Dependent Cell Invasion**

Chun-Ru Hsu, Yi-Jiun Pan, Ju-Yun Liu, Chun-Tang Chen, Tzu-Lung Lin, Jin-Town Wang 769–779

**Correlation between Nasal Microbiome Composition and Remote Purulent Skin and Soft Tissue Infections**

Ryan C. Johnson, Michael W. Ellis, Jeffrey B. Lanier, Carey D. Schlett, Tianyuan Cui, D. Scott Merrell 802–811

**Mechanisms of Protection against *Clostridium difficile* Infection by the Monoclonal Antitoxin Antibodies Actoxumab and Bezlotoxumab**

Zhiyong Yang, Jeremy Ramsey, Therwa Hamza, Yongrong Zhang, Shan Li, Harris G. Yfantis, Dong Lee, Lorraine D. Hernandez, Wolfgang Seghezzi, Jamie M. Furneisen, Nicole M. Davis, Alex G. Therien, Hanping Feng 822–831

## HOST RESPONSE AND INFLAMMATION

- IL12R $\beta$ 1 $\Delta$ TM Is a Secreted Product of *il12rb1* That Promotes Control of Extrapulmonary Tuberculosis** Aurelie A. Ray, Jeffrey J. Fountain, Halli E. Miller, Andrea M. Cooper, Richard T. Robinson 560–571
- Requirement for *Serratia marcescens* Cytolysin in a Murine Model of Hemorrhagic Pneumonia** Norberto González-Juarbe, Chris A. Mares, Cecilia A. Hinojosa, Jorge L. Medina, Angelene Cantwell, Peter H. Dube, Carlos J. Orihuela, Molly A. Bergman 614–624
- Toll-Like Receptor 2 and NLRP3 Cooperate To Recognize a Functional Bacterial Amyloid, Curli** Glenn J. Rapsinski, Meghan A. Wynosky-Dolfi, Gertrude O. Oppong, Sarah A. Tursi, R. Paul Wilson, Igor E. Brodsky, Çağla Tükel 693–701
- B Cells Modulate Systemic Responses to *Pneumocystis murina* Lung Infection and Protect On-Demand Hematopoiesis via T Cell-Independent Innate Mechanisms when Type I Interferon Signaling Is Absent** Teri R. Hoyt, Erin Dobrinen, Irina Kochetkova, Nicole Meissner 743–758
- THEMIS Is Required for Pathogenesis of Cerebral Malaria and Protection against Pulmonary Tuberculosis** Sabrina Torre, Sebastien P. Faucher, Nassima Fodil, Silayuv E. Bongfen, Joanne Berghout, Jeremy A. Schwartzentruber, Jacek Majewski, Mark Lathrop, Andrea M. Cooper, Silvia M. Vidal, Philippe Gros 759–768
- Impact of Resolvin E1 on Murine Neutrophil Phagocytosis in Type 2 Diabetes** Bruno S. Herrera, Hatice Hasturk, Alpdogan Kantarci, Marcelo O. Freire, Olivia Nguyen, Shevali Kansal, Thomas E. Van Dyke 792–801

## FUNGAL AND PARASITIC INFECTIONS

- Myeloid-Derived Suppressor Cells Impair Alveolar Macrophages through PD-1 Receptor Ligation during *Pneumocystis* Pneumonia** Guang-Sheng Lei, Chen Zhang, Chao-Hung Lee 572–582
- Protection from Systemic *Candida albicans* Infection by Inactivation of the Sts Phosphatases** Shamooun Naseem, David Frank, James B. Konopka, Nick Carpino 637–645
- Dectin-2 Deficiency Promotes Th2 Response and Mucin Production in the Lungs after Pulmonary Infection with *Cryptococcus neoformans*** Yuri Nakamura, Ko Sato, Hideki Yamamoto, Kana Matsumura, Ikumi Matsumoto, Toshiki Nomura, Tomomitsu Miyasaka, Keiko Ishii, Emi Kanno, Masahiro Tachi, Sho Yamasaki, Shinobu Saijo, Yoichiro Iwakura, Kazuyoshi Kawakami 671–681
- Granzyme-Mediated Regulation of Host Defense in the Liver in Experimental *Leishmania donovani* Infection** Henry W. Murray, Marisa Mitchell-Flack, Hua Zheng, Xiaojing Ma 702–712
- CD73-Generated Adenosine Is Critical for Immune Regulation during *Toxoplasma gondii* Infection** Deeqa A. Mahamed, Leon E. Toussaint, Margaret S. Bynoe 721–729

## MICROBIAL IMMUNITY AND VACCINES

- IgG4 Subclass-Specific Responses to *Staphylococcus aureus* Antigens Shed New Light on Host-Pathogen Interaction** Jasper Swierstra, Stephanie Debets, Corné de Vogel, Nicole Lemmens-den Toom, Nelianna Verkaik, Nadjia Ramdani-Bouguessa, Marcel F. Jonkman, Jan Maarten van Dijl, Ahmed Fahal, Alex van Belkum, Willem van Wamel 492–501

<b>Acquisition of Antibodies against <i>Plasmodium falciparum</i> Merozoites and Malaria Immunity in Young Children and the Influence of Age, Force of Infection, and Magnitude of Response</b>	Danielle I. Stanisc, Freya J. I. Fowkes, Melanie Koinari, Sarah Javati, Enmoore Lin, Benson Kiniboro, Jack S. Richards, Leanne J. Robinson, Louis Schofield, James W. Kazura, Christopher L. King, Peter Zimmerman, Ingrid Felger, Peter M. Siba, Ivo Mueller, James G. Beeson	646–660
<b>Immunization with the <i>Entamoeba histolytica</i> Surface Metalloprotease EhMSP-1 Protects Hamsters from Amebic Liver Abscess</b>	Eduardo C. Roncolato, José E. Teixeira, José E. Barbosa, Leandra N. Zambelli Ramalho, Christopher D. Huston	713–720
<b>Recombinant Protein Truncation Strategy for Inducing Bactericidal Antibodies to the Macrophage Infectivity Potentiator Protein of <i>Neisseria meningitidis</i> and Circumventing Potential Cross-Reactivity with Human FK506-Binding Proteins</b>	Magdalena K. Bielecka, Nathalie Devos, Mélanie Gilbert, Miao-Chiu Hung, Vincent Weynants, John E. Heckels, Myron Christodoulides	730–742
<b>ERRATUM</b>		
<b>Erratum for Ang et al., An <i>ethA-ethR</i>-Deficient <i>Mycobacterium bovis</i> BCG Mutant Displays Increased Adherence to Mammalian Cells and Greater Persistence <i>In Vivo</i>, Which Correlate with Altered Mycolic Acid Composition</b>	Michelle Lay Teng Ang, Siti Zarina Zainul Rahim, Guanghou Shui, Petronela Dianišková, Jan Madacki, Wenwei Lin, Vanessa Hui Qi Koh, Julia Maria Martinez Gomez, Sukumar Sudarkodi, Anne Bendt, Markus Wenk, Katarína Mikušová, Jana Korduláková, Kevin Pethe, Sylvie Alonso	846
<b>AUTHOR CORRECTIONS</b>		
<b>Correction for Fares et al., Matrix Metalloproteinases 2 and 9 Are Differentially Expressed in Patients with Indeterminate and Cardiac Clinical Forms of Chagas Disease</b>	Rafaelle Christine Gomes Fares, Juliana de Assis Silva Gomes, Luciana Ribeiro Garzoni, Mariana Caldas Waghabi, Roberto Magalhães Saraiva, Nayara Ingrid Medeiros, Roberta Oliveira-Prado, Luiz Henrique Conde Sangenis, Mayara da Costa Chambela, Fernanda Fortes de Araújo, Andréa Teixeira-Carvalho, Marcos Paulo Damásio, Vanessa Azevedo Valente, Karine Silvestre Ferreira, Giovane Rodrigo Sousa, Manoel Otávio da Costa Rocha, Rodrigo Correa-Oliveira	847–848
<b>Correction for Jin et al., BDCA1-Positive Dendritic Cells (DCs) Represent a Unique Human Myeloid DC Subset That Induces Innate and Adaptive Immune Responses to <i>Staphylococcus aureus</i> Infection</b>	Jun-O Jin, Wei Zhang, Jiang-yuan Du, Qing Yu	849

*Cover photograph* (Copyright © 2015, American Society for Microbiology. All Rights Reserved.): Forty days after aerosol infection with *Mycobacterium tuberculosis*, mouse mediastinal lymph nodes were stained to visualize acid-fast bacilli (AFB, purple) and host cells (blue). A magnification of  $\times 100$  is used in the raindrop-shaped insets; the top, middle, and bottom insets are from animals with decreasing sensitivity to interleukin 12 (IL-12) (top, C57BL/6; middle, IL12R $\beta$ 1 $\Delta$ TM<sup>-/-</sup>; bottom, *il12rb1*<sup>-/-</sup>). Animals with the highest IL-12 sensitivity (C57BL/6) have the lowest AFB burden, while animals with lowest IL-12 sensitivity (*il12rb1*<sup>-/-</sup>) have the highest AFB burden; this study demonstrates that between these two extremes are IL12R $\beta$ 1 $\Delta$ TM<sup>-/-</sup> animals. A  $\times 10$  magnification of a sample from an uninfected animal is used as the image background. (See related article on page 560.)
